First published in 1979 as the "Moto-X Fox Guide to Preparing the Yamaha YZ and IT for Competition," this 64-page book was written and photographed by famed 1970's Cycle News editor, racer and motocross journalist Jim "Jimmy the Greek" Gianatsis. It covers the development and racing history of the Yamaha 2-stroke and 4-stroke motocross and enduro bikes from the DT models raced by the Don Jones family in the early 1970s, through to to the exotic YZ, OW and TT-500 machines raced by Hakan Andersson, Pierre Karsmakers and Bob "Hurricane" Hannah up to 1979. Included is race bike preparation information from famed Yamaha factory rider Bob Hannah, his mechanic Keith McCarty, the top privateer Moto-X Fox Racing Team, as well as privateer mechanic Bevo Forte. There is also a section on IT model enduro bike preparation by Yamaha motocross and ISDT rider Chris Carter. Included is "Riding with the Hurricane" an eight chapter racing instruction guide with photos that Jim produced with Bob Hannah that was originally printed in Cycle News as a weekly series in 1978. Preparing the Yamaha YZ and IT for Competition is a classic dirt bike technical, tuning and riding manual that has been out of print and unavailable for 30 years. It serves as very interesting reading and a great historical reference guide for dirt bike fans both young and old. Many of the bike preparation and riding tips are still relevant today. A must have for any dirt bike enthusiast or collector.

Braving the Wilderness

Readers can relive the true golden age of high-performance classic speedboats in this book that covers these mighty wooden-hulled craft from around World War I until just before the second World War. This was an era when speed was still a new plaything, and speedboats and aircraft were raced as passionately as were automobiles; when massive mahogany speedboats powered by engines from suppliers such as Rolls-Royce competed fiercely against rivals from around the world. Classic speedboat enthusiasts will relish the cutaway drawings of these craft, as well as the choice archival photography and the modern color photography of these now-impeccably restored beauties.

The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be done. It's time to do it yourself. Get *The Build*.

European rivals, purpose-built race circuits replacing true road courses and a reduction in the number of Grand Prix classes. In other respects it has enjoyed remarkable continuity, as motor cycle racing has remained the domain of the major manufacturers anxious to promote the awareness of their road machines. Contemporary Grand Prix designs are clearly descended from the bikes raced in the 1950s. This book traces the major trends and developments during the last 50 years and it profiles the legendary riders, teams and innovators that have dominated the sport during this period. Concluding the history is a comprehensive and detailed results section which provides an invaluable source of reference for any motor cycle enthusiast.

#1 NEW YORK TIMES BESTSELLER • A timely and important book that challenges everything we think we know about cultivating true belonging in our communities, organizations, and culture, from the #1 bestselling author of *Rising Strong*, *Daring*

Greatly, and The Gifts of Imperfection Don't miss the hourlong Netflix special Brené Brown: The Call to Courage! HELLO SUNSHINE BOOK CLUB PICK "True belonging doesn't require us to change who we are. It requires us to be who we are." Social scientist Brené Brown, PhD, LMSW, has sparked a global conversation about the experiences that bring meaning to our lives—experiences of courage, vulnerability, love, belonging, shame, and empathy. In *Braving the Wilderness*, Brown redefines what it means to truly belong in an age of increased polarization. With her trademark mix of research, storytelling, and honesty, Brown will again change the cultural conversation while mapping a clear path to true belonging. Brown argues that we're experiencing a spiritual crisis of disconnection, and introduces four practices of true belonging that challenge everything we believe about ourselves and each other. She writes, "True belonging requires us to believe in and belong to ourselves so fully that we can find sacredness both in being a part of something and in standing alone when necessary. But in a culture that's rife with perfectionism and pleasing, and with the erosion of civility, it's easy to stay quiet, hide in our ideological bunkers, or fit in rather than show up as our true selves and brave the wilderness of uncertainty and criticism. But true belonging is not something we negotiate or accomplish with others; it's a daily practice that demands integrity and authenticity. It's a personal commitment that we carry in our hearts." Brown offers us the clarity and courage we need to find our way back to ourselves and to each other. And that path cuts right through the wilderness. Brown writes, "The wilderness is an untamed, unpredictable place of solitude and

searching. It is a place as dangerous as it is breathtaking, a place as sought after as it is feared. But it turns out to be the place of true belonging, and it's the bravest and most sacred place you will ever stand."

Hard copy: The United States is destroying itself from the inside out. The Corruption of America is a kind of moral decay a kind of greeda kind of desperate grasp for power. And it's destroying our nation. These corruptions do not need to exist. If individual Americans take it upon themselves to become better citizens, act with rational self-interest, and reject the "ethos of getting yours" we can correct these corruptions. That's why Stansberry Research founder Porter Stansberry published America 2020: The Survival Blueprint. Many are referring to it as the most valuable book in America "I love the book; it is so clear and concise. Though I have

studied a bit about the smartest way to survive what is coming, this put all the best ideas together in one place! My hat is off to you guys! - J.R. "Absolutely excellent book!! I need to buy another 12 for my family and friends." - K.B. "I read it the first day I had it. It is a great book that explains our current situation simply and very accurately. I intend to continue to use this book as a guide for investing and I will recommend it to my family and friends." - L.R. "This is a story all Americans should know about. I don't usually buy things off the Internet, but I am extremely glad that I made an exception in this case." - C.R.

This book gives an unparalleled, up-to-date, in-depth treatment of all kinds of flow phenomena encountered in centrifugal pumps including the complex interactions of fluid flow with vibrations and wear of materials. The scope includes all aspects of hydraulic design, 3D-flow phenomena and partload operation, cavitation, numerical flow calculations, hydraulic forces, pressure pulsations, noise, pump vibrations (notably bearing housing vibration diagnostics and remedies), pipe vibrations, pump characteristics and pump operation, design of intake structures, the effects of highly viscous flows, pumping of gas-liquid mixtures, hydraulic transport of solids, fatigue damage to impellers or diffusers, material selection under the aspects of fatigue, corrosion, erosion-corrosion or hydro-abrasive wear, pump selection, and hydraulic quality criteria. As a novelty, the 3rd ed. brings a

fully analytical design method for radial impellers, which eliminates the arbitrary choices inherent to former design procedures. The discussions of vibrations, noise, unsteady flow phenomena, stability, hydraulic excitation forces and cavitation have been significantly enhanced. To ease the use of the information, the methods and procedures for the various calculations and failure diagnostics discussed in the text are gathered in about 150 pages of tables which may be considered as almost unique in the open literature. The text focuses on practical application in the industry and is free of mathematical or theoretical ballast. In order to find viable solutions in practice, the physical mechanisms involved should be thoroughly understood. The book is focused on fostering this understanding which will benefit the pump engineer in industry as well as academia and students.
