This fully updated and revised edition of Michael Yahuda's extremely successful textbook introduces students to the international politics of the Asia Pacific region since 1945. Divided into three parts, the first presents a chronological overview of developments since 1945, the new second part looks at the post-cold war period, while the third focuses on the policies of the US, the USSR/Russia, China and Japan in the region. Yahuda analyses politics in terms of global, regional, and local trends, combining narrative with analysis. This new edition features: \* analysis of the economic crisis and the potential implications worldwide of East Asian economic recovery \* a chapter on the emergence of East Asia as a significant force in world affairs, focusing on the role of lesser powers such as Indonesia and Malaysia \* chapters considering prospects post-2000 and competing frameworks for security in the wake of nuclear tension between India and Pakistan \* the strengths and weaknesses of US hegemony in the new world order.

### **Imperfect Victories**

An instructive essay by poet and critic Ales Debeljak opens this introduction to the rich, post-World War II literary tradition of Slovenia, a nation that emerged from the former Yugoslavia in 1991 following a brief conflict that prefigured the Balkan conflicts that persist to this day. Part of one empire or another for centuries, Slovenia was denied a cultural identity of its own. Its writers, however, insisted on writing in their native tongue, thus keeping Slovenian culture alive in the written word. Contributors include Edvard Kocbek, Tomaz Salamun, Drago Jancar, Berta Bojetu-Boeta, and others.

### **The People's Emperor**

'An eminent writer has said that regiments great in history have this in common with mortals- through old in glory and honour, they have yet the vigour of youth. To none may the remark be more truthful applied than the Grenadier Guards' Thus wrote Chichester and Burges-Short in 1900 and, judging by the Regiment's history over the last fifty years, the words

ring as true as ever. For this history of Grenadier Guards is indeed a microcosm of all the proud endeavours of the British Army. There are few places of significance where the Regiment has not served: after the round-up of Nazis in 1945 in Germany and Austria, Grenadiers saw action in Palestine and in the jungles of Malaya, and subsequently served during emergencies in Cyprus, the Cameroons, British Guiana, Belize, Northern Ireland, the Gulf and with the United Nations, to indicate but some of the over seas postings which included the Falklands and Hong Kong. Grenadier have also been responsible for the protection of British Sovereigns and the great ceremonial events in London, including the funerals of King George VI and Winston Churchill. Oliver Lindsay has produced a rigorous work of history-his fourth book- rich in quotation after interviewing Grenadiers, serving and retired, of all generations. Drawing on their accounts as well as his own experiences - for he was a regular soldier for thirty-five years- he has written a book of extraordinary interest. Unique among such historians, he tells of the experiences of wives in such places as war-torn Germany in 1945. Tripoli and Cyprus. The story of Grenadiers who served with the Guards parachute Company and in the SAS is included. Five years in the writing, this comprehensive record included coverage of training, tactics, the pronounced changes in the armed forces and the views and anecdotes of the Non Commissioned Officers and Guardsmen. Profusely illustrated and with 14 detailed maps, this is a dedicated history of the senior infantry Regiment in the British Army and what is probably the most famous Regiment in the world.

Black Internationalist Feminism examines how African American women writers affiliated themselves with the post-World War II Black Communist Left and developed a distinct strand of feminism. This vital yet largely overlooked feminist tradition built upon and critically retheorized the postwar Left's "nationalist internationalism," which connected the liberation of Blacks in the United States to the liberation of Third World nations and the worldwide proletariat. Black internationalist feminism critiques racist, heteronormative, and masculinist articulations of nationalism while maintaining the importance of national liberation movements for achieving Black women's social, political, and economic rights. Cheryl Higashida shows how Claudia Jones, Lorraine Hansberry, Alice Childress, Rosa Guy, Audre Lorde, and Maya Angelou worked within and against established literary forms to demonstrate that nationalist internationalism was linked to struggles against heterosexism and patriarchy. Exploring a diverse range of plays, novels, essays, poetry, and reportage, Higashida illustrates how literature is a crucial lens for studying Black internationalist feminism because these authors were at the forefront of bringing the perspectives and problems of black women to light against their marginalization and silencing. In examining writing by Black Left women from 1945–1995, Black Internationalist Feminism contributes to recent efforts to rehistoricize the Old Left, Civil Rights, Black Power, and second-wave Black women's movements.

The Omaha Tribe of Nebraska has borne more than its fair share of the burden created by the federal government's wildly vacillating Indian policy. Mark R. Scherer's *Imperfect Victories* provides a detailed examination of the Omahas' tenacious efforts to overcome the damaging effects of shifting directions in federal policy during the last fifty years. The Omahas' struggles are particularly significant because the tribe often bore the initial impact of experimental legislation that would later be implemented nationally. Scherer details the disastrous consequences of postwar federal legislation that transferred control over Indian affairs to state authorities as a precursor to the wholesale termination of Indian tribalism. The legislation brought jurisdictional turmoil to the Omaha reservation and placed the Omahas in chronic conflict with local law enforcement agencies. As the tribe fought to become the first Indian group in the nation to escape the effects of that law through retrocession, they waged equally notable struggles for the redress of past wrongs with the Indian Claims Commission and in the federal courts. Scherer demonstrates that the Omahas' successes in those campaigns have been at best imperfect victories, coming only after years of hardship and failing to eliminate many underlying tensions and problems.

Irish Immigrants in New York City, 1945-1995 Linda Dowling Almeida The story of one of the most visible groups of immigrants in the major city of immigrants in the last half of the 20th century. "Almeida offers a dynamic portrait of Irish New York, one that keeps reinventing itself under new circumstances." —Hasia Diner, New York University "[Almeida's] close attention to changes in economics, culture, and politics on both sides of the Atlantic makes [this book] one of the more accomplished applications of the 'new social history' to a contemporary American ethnic group." —Roger Daniels, University of Cincinnati It is estimated that one in three New York City residents is an immigrant. No other American city has a population composed of so many different nationalities. Of these "foreign born," a relatively small percentage come directly from Ireland, but the Irish presence in the city—and America—is ubiquitous. In the 1990 census, Irish ancestry was claimed by over half a million New Yorkers and by 44 million nationwide. The Irish presence in popular American culture has also been highly visible. Yet for all the attention given to Irish Americans, surprisingly little has been said about post-World War II immigrants. Almeida's research takes important steps toward understanding modern Irish immigration. Comparing 1950s Irish immigrants with the "New Irish" of the 1980s, Almeida provides insights into the evolution of the Irish American identity and addresses the role of the United States and Ireland in shaping it. She finds, among other things, that social and

economic progress in Ireland has heightened expectations for Irish immigrants. But at the same time they face greater challenges in gaining legal residence, a situation that has led the New Irish to reject many organizations that long supported previous generations of Irish immigrants in favor of new ones better-suited to their needs. Linda Dowling Almeida, Adjunct Professor of History at New York University, has published articles on the "New Irish" in America and is a longtime member of the New York Irish History Roundtable. She also edited Volume 8 of the journal *New York Irish History*.

The Dallas Symphony Association is proud to publish this special edition of "The Anatomy of Peace" in memory of its author Emery Reves. The book's basic tenant is that the only condition required for peaceful human relations is the creation of a World Federation governed by one set of international laws. The "one law" concept is predicated on the interdependence of humankind and is built on a concern for the common good. Mr. Reves contends that separateness is the manifestation of differences, yet there is a connection among all people which must be recognized and nurtured. -- From publisher's description.

Few institutions are as well suited as the monarchy to provide a window on postwar Japan. The monarchy, which is also a family, has been significant both as a political and as a cultural institution. This comprehensive study analyzes numerous issues, including the role of individual emperors in shaping the institution, the manner in which the emperor's constitutional position as symbol has been interpreted, the emperor's intersection with politics through ministerial briefings, memories of Hirohito's wartime role, nationalistic movements in support of Foundation Day and the reign-name system, and the remaking of the once sacrosanct throne into a "monarchy of the masses" embedded in the postwar culture of democracy. The author stresses the monarchy's "postwariness," rather than its traditionality.

This book is the first comprehensive account of classical music on all British radio stations, BBC and commercial, between 1945 and 1995. It narrates the shifting development of those services, from before the launch of the Third Programme until after the start of Classic FM, examining the output from both qualitative and quantitative perspectives, as well as recounting some of the stories and anecdotes which enliven the tale. During these fifty years, British classical music radio featured spells of broad, multi-channel classical music radio, with aspirational and mainstream culture enjoying positive interactions, followed by periods of more restricted and exclusive output, in a paradigm of the place of high culture in UK society as a whole. The history was characterised by the recurring tensions between elite and popular provision, and the interplay of demands for highbrow and middlebrow output, and also sheds new light on the continuing relevance of class in Britain. It is an important and unique resource for those studying British history in the second half of the twentieth century, as well as being a compelling and diverting account for enthusiasts for classical music radio.

Management education and training was a key influence on Canadian capital and labour in the post-World War II decades, however it has been the subject of comparatively little academic inquiry. In many ways, historians have frequently learned about management behavior in unionized workplaces by examining labor-management relations. The management experience has thus often been seen through the eyes of rank-and-file workers rather than from the perspective of managers themselves. This book discusses how managers were trained and educated in Canada in the years following the Second World War. Making Managers in Canada, 1945 - 1995 seeks to shed light on the experience of workers who have not received much attention in business history: managers. This book approaches management training from both institutional and social history perspectives. Drawing from community colleges, universities, and companies in British Columbia, Ontario, and Québec, this book reveals the nature of management education and training in English and French Canada, It integrates institutional analysis, and examines how factors such as gender and social class shaped the development of Canadian management in the post-war years and illustrates the various international influences on Canadian management education.

During the past fifty years, the Congresses and presidents of the United States have made many efforts to improve the performance of the federal government. In this book, a leading expert in public management examines the most important reform statutes passed and concludes that the problem is not too little reform but too much. Paul Light explains that Congress and the presidency have never decided whether they trust government and its employees to do their jobs well, and so they have moved back and forth over the decades between four reform philosophies: scientific management, war on waste, watchful eye, and liberation management. These four philosophies, argues Light, operate with different goals, implementation strategies, and impacts. Yet reform initiatives draw on one or another of them almost at random, often

canceling out the potential benefits of a particular statute by passing a contradictory statute soon afterward. Light shows that as the public has become increasingly distrustful of government, the reform agenda has favored the war on waste and watchful eye. He analyzes the consequences of these changes for the overall performance of government and offers policy recommendations for future reform approaches.
