From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

From a master teacher, a results-oriented approach to powerful legal writing that communicates, that persuades--and that wins. Of all the professions, the law has the most deserved reputation for opaque, jargon-clogged writing. Legal education, which focuses on judicial opinions, not instruments of persuasion, is partly to blame. Yet forceful writing is one of the most potent weapons of legal advocacy. In *Writing to Win*, Steve Stark, a former teacher of writing at Harvard Law, who has taught thousands of aspiring and practicing lawyers, has written the only book on the market that applies the universal principles of vigorous prose to the job of making a case--and winning it. *Writing to Win* focuses on the writing of lawyers, not judges, and includes dozens of examples of effective (and ineffective) real-life writing--as well as models drawn from advertising, journalism, and fiction. It deals with the problems lawyers face in writing, from organization to strengthening

and editing prose; teaches ways of improving arguments; addresses litigation and technical writing in all its forms; and covers the writing attorneys must perform in their practice, from memos and letters to briefs and contracts. Each chapter opens with a succinct set of rules for easy reference. No other legal writing book on the market is as practical, as focused on results, as well written as *Writing to Win*. From the Trade Paperback edition.
