Who's who in the Midwest

The Costas offer practical advice on virtually every aspect of computerization for libraries in the 1990s. The introduction brings the reader up to date on the changes that have taken place in the last decade. The basic organization of the book remains the same as in previous editions (first in 1983, second in 1986), but all chapters have been completely updated, particularly the most technical chapters, those on hardware and software. Pakistani Assistance For The Anti-Government Of India Activities Was Not Due To Only Its Revanchist Spirit Following Its Loss Of East Pakistan But For Keeping Its military Preoccupied With Internal Security Duties Thereby Trying To Neutralize The Superiority Of The Indian Armed Forces. Such A Policy Could Ultimately Weaken The Unity Of India Just As The Bleeding Of Soviet Troops In Afghanistan Contributed To The Break-Up Of Ussr. Terrorism Is An Absolute Evil And Has To Be Treated As Such.

THOSE MARVELOUS LITTLE TOYOTA MOTORHOMES is all about Toyota motorhomes in general and a 1977 Toyota Pont-X motorhome named Little House in particular. Between the mid-1970 and 1994, over thirty motorhome manufactures mounted motorhomes on Toyota cabs and chassis with many different models available from about 16 1/2- to 23-foot in length. Many of these Toyota motorhomes are still on the road today, and used ones are still available. This book is a complete how-to guide for joining in on the Toyota motorhome fun. It gives a brief history of these marvelous little motorhomes and describes what's available and how to find and buy your own Toyota motorhome. The author Jack Wiley has owned a 1977 Toyota Pont-X motorhome that he and his wife named Little House for 16 years. He sums up this experience as follows: "Little House has given me a lot of Free Being traveling for relatively little money. This is traveling that I would not otherwise have been able to afford. During this traveling, I have been able to see things and do things that I would not otherwise have experienced. A Toyota motorhome made all this possible."

The ICC/ASHRAE 700-2015 National Green Building Standard(TM) (NGBS) has been approved by the American National Standards Institute for all types of sustainable residential construction. A collaborative effort of the International Code Council, ASHRAE and the National Association of Home Builders, NGBS outlines a variety of green practices that can be incorporated into new homes and multifamily buildings, as well as hotels, dormitories and land developments. The Standard also delivers stand-alone chapters for both home remodeling and additions and renovations of multifamily buildings. The green practices address site and lot design, preparation and development; resource, energy and water efficiency; indoor

environmental quality; and operation, maintenance and building owner education. Four levels--Bronze, Silver, Gold and Emerald--enable residential professionals to integrate sustainability and high performance at a level most appropriate for their businesses and specific housing markets. Changes for the 2015 Edition The 2015 edition incorporates changes that better align the NGBS with the I-codes, expands the application of innovative practices and builds upon years of building and certifying to NGBS. Some of the more notable updates include: - Substantial revisions to the Energy Efficiency chapter, which now has more stringent rating levels based upon whole-house energy savings that are above the 2015 International Energy Conservation Code. - A comprehensive update of the exterior and interior lighting provisions including common areas in multifamily building. - Mandatory installation of carbon monoxide alarms for all buildings, regardless of level of certification or local code. - Revamped stormwater management options that encourage low-impact development practices. - Greater emphasis on and recognition of multi-modal transportation options including bicycle parking, pedestrian connectivity, proximity to transit and electric-vehicle charging. - New references in the Resource Efficiency chapter for Environmental Product Declarations for both specific and industry-wide products. This latest edition includes everything needed to design, construct or remodel any residential project to the most current sustainable and green building criteria available - all under one roof!

Handbook of North American Indians: History of Indian-White relations

"An index to library and information science".

Comprehensive Dissertation Index

In this dynamic collection of essays, Arnold Krupat, one of the leading critics of American Indian writing, storytelling, and film, offers insightful and provocative analyses of representations by and about Native peoples, past and present. He considers the relations between tricksters in traditional and contemporary stories, the ways in which Native peoples were depicted in mainstream American literature in the mid-nineteenth century, and how modern Cherokee authors look back upon and represent the forced removal of their ancestors from the Southeast in the 1830s. He also examines the writings of the famed Pequot public intellectual William Apess (1798–1839) and the complex communicative strategies informing the contemporary prize-winning Inuit film *Atanarjuat, the Fast Runner*. All That Remains not only showcases one of the most influential scholars in the field but also establishes a bold agenda for Native literary criticism in the twenty-first century.
