Logging & Sawmilling Journal

The "canopy" in the title refers to the tree-lined streets of Rice's Regina neighbourhood but through his piercing specificity we learn more about "place", in the first decade of a new century. Rice's poems speak eloquently of our connection to the natural world, including the forests and landscapes we have created within our cities. With a voice that speaks unflinchingly of its sources *Life in the Canopy* is an exploration of the history and bones of a modest city in the center of the continent. With a profound authority and honesty Rice examines how we live with each other and how the place we live in shapes our lives. What is a city? Is it more than its public realm; the trees, parks and lake, railways and neighbourhoods? Is it more than the slow unrolling of human experience and event? Here are insightful, moving poems that take on difficult ethical and aesthetic questions.

THE WHITE WOLF(A TO Z MYSTERIES)(□□□)

While visiting their friend Wallis and her adopted daughter on Mount Desert Island, Maine, Josh, Dink, and Ruth Rose investigate why three white wolf cubs were stolen, and by whom.

Field & Stream

Cycle

Cycle is a trip, a story in images. Ruth Gwily makes an introspective exploration, building her story in small pieces. Her subjects include: childhood, discovery of the body, love, relationships, solitude. This book invites the reader to share the authors experiences through a visual language filled with metaphors. This autobiographic document is the combination of illustration and theatrical approaches, reminiscent of Comedia del Arte, puppets and dance.

Honda Trx 4Trx & ATC 250R 85-89

Vibrant high-tech centers, shifting barrier islands, okra festivals, Yankee and Latino immigrants, Blue Ridge vistas, world-class universities and empty textile mills-this is the Carolinas. A region of striking natural beauty, rich history, and a rapidly changing economic base, the Carolinas are "Old South" and "New South," intimately local and inextricably global. In *A Geography of the Carolinas*, eleven noted geographers explore the region's historical, cultural and physical landscapes. Bringing the perspective of the science of geography and a wealth of experience and knowledge, the contributors reveal the patterns, processes, and connections at work in these two great states. Each chapter is an exploration of this diverse

On the one hand, nobody wants to be a dick. On the other hand, dicks are everywhere! They cut in line, talk behind our backs, recline into our seats, and even have the power to morph into trolls online. Their powers are impressive, but with a little foresight and thoughtfulness, we can take a stand against dickishness today. *How Not to Be a Dick* is packed with honest and straightforward advice, but it also includes playful illustrations showing two well-meaning (but not always well behaved) young people as they confront moments of potential dickishness in their everyday lives. Sometimes they falter, sometimes they triumph, but they always seek to find a better way. And with their help, you can too.

BMW K-Series 1985-1997

"A kindergarten-level introduction to the motorized vehicles known as snowmobiles, covering their purpose, parts, and operation, and such defining features as their runners and tracks"--

Documenting the most common DIY fixes with hundreds of illustrations and step-by-step instructions, this compendium of repair, modification and troubleshooting advice is applicable to all domestic and import marques.

The Four Stroke Dirt Bike Engine Building Handbook

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul

R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Alligators and Crocodiles

This book gives true characters of Japanese speech sounds in reference to European speech sounds. When it was first published in 1931, it was the first book of its kind. There are only 5 Japanese vowel elements as opposed to 18 in English, 13 in French and 8 in German. There are 15 Japanese consonants, 26 in English, 22 in French & 23 in German. Because of the lesser number of elements, it follows that the wider range in vowels and consonants is heard by Japanese ears, so this volume gives average sounds uttered by Japanese in the twentieth century in
