Wind Energy: Papers of the parallel sessions

American Journal of Public Health

Striking beauty, abundant recreational opportunities, historic mining and pioneer locales, and a unique geologic story stretching back over one billion years make Salt Lake County's Wasatch Front canyons a world-class attraction. This guide highlights the six canyons open to vehicles. Topical pages present the region's fascinating geologic history and active processes, while descriptions and maps with road mileage further explain each canyon's geology.

Materials management has become an important activity in both manufacturing and service organizations. Rapid changes in the industrial environment, such as the introduction of automation and Just-In-Time, and demands for increased productivity and quality have increased the need for all personnel to be concerned with total control of materials.

Clearly this trend will continue, and materials management will play an increasingly vital role in organizational success, especially for operations that are becoming automated. Materials management will be more critical in many service organizations where the materials group has received little attention in the past. This book covers the basic materials management function and provides valuable insights into various other major functions related to it. We believe that each of these—manufacturing, marketing, finance, quality assurance, and engineering—is vitally involved in materials management, and any coverage of the subject that excludes these functions offers too narrow a perspective. With increasing demand for materials managers, human resource requirements will be satisfied by individuals trained within the discipline and by personnel who have worked in other fields. The dimensions of materials management have grown so rapidly that many practicing managers are not aware that they are fulfilling material management functions. It is important that all individuals have the basic knowledge required to perform their roles in these organizations.

New Horizons

Books in print supplement 1988-89

In 1951, the DAR Magazine published Genealogical Guide: Master Index of Genealogy in the Daughters of the American Revolution Magazine, Volumes 1-84 (1892-1950). More than forty members of the Elizabeth Benton Chapter of Kansas City, Missouri worked for months on this guide. Nearly 39,000 references evolved into an index encompassing fifty-nine years of the DAR Magazine. Five years later, the same workers produced a supplementary volume extending the coverage of the Genealogical Guide to 1955. The Genealogical Guide and the Supplement are reproduced in their entirety in this new publication, giving the researcher access to all genealogical items that appeared in the first 89 volumes of the DAR Magazine.
