Early childhood care and education (ECCE) settings offer an opportunity to provide children with a solid beginning in all areas of their development. The quality and efficacy of these settings depend largely on the individuals within the ECCE workforce. Policy makers need a complete picture of ECCE teachers and caregivers in order to tackle the persistent challenges facing this workforce. The IOM and the National Research Council hosted a workshop to describe the ECCE workforce and outline its parameters. Speakers explored issues in defining and describing the workforce, the marketplace of ECCE, the effects of the workforce on children, the contextual factors that shape the workforce, and opportunities for strengthening ECCE as a profession.

"Walk barefoot and the thorns will hurt you..." —Iraqi-Turkmen proverb A riveting story of hope and despair, of elation and longing, Barefoot in Baghdad takes you to the front lines of a different kind of battle, where the unsung freedom fighters are strong, vibrant—and female. An American aid worker of Arab descent, Manal Omar moves to Iraq to help as many women as she can rebuild their lives. She quickly finds herself drawn into the saga of a people determined to rise from the ashes of war and sanctions and rebuild their lives in the face of crushing chaos. This is a chronicle of Omar's friendships with several Iraqis whose lives are crumbling before her eyes. It is a tale of love, as her relationship with one Iraqi man intensifies in a country in turmoil. And it is the heartrending stories of the women of Iraq, as they grapple with what it means to be female in a homeland you no longer recognize. "Manal Omar captures the complex reality of living and working in war-torn Iraq, a reality that tells the story of love and hope in the midst of bombs and explosions."—Zainab Salbi, founder and CEO of Women for Women International, and author (with Laurie Becklund) of the national bestselling book *Between Two Worlds: Escape from Tyranny: Growing Up in the Shadow of Saddam* "A fascinating, honest, and inspiring portrait of a women's rights activist in Iraq, struggling to help local women while exploring her own identity. Manal Omar is a skilled guide into Iraq, as she understands the region, speaks Arabic, and wears the veil. At turns funny and tragic, she carries a powerful message for women, and delivers it through beautiful storytelling."—Christina Asquith, author of *Sisters in War: A Story of Love, Family and Survival in the New Iraq* "At turns funny and tragic...a powerful

## **Number Theory**

## **Human-Computer Interaction -- INTERACT 2011**

At present, a nativist turn in Indian political theory can be observed. There is a general assumption that the indigenous thought to which researchers are supposed to be (re)turning may somehow be immediately visible by ignoring the colonization of the mind and polity. In such a conception of *svaraj* (which can be translated as 'authentic autonomy'), the tradition to be returned to would be that of the indigenous elites. In this book, this concept of *svaraj* is defined as a thick conception, which links it with exclusivist notions of spirituality, profound anti-modernity, exceptionalistic moralism, essentialistic nationalism and purism. However, post-independence India has borne witness to an alternative trajectory: a thin *svaraj*. The author puts forward a workable contemporary ideal of thin *svaraj*, i.e. political, and free of metaphysical commitment. The model proposed is inspired by B.R. Ambedkar's thoughts, as opposed to the thick conception found in the works of M.K. Gandhi, KC Bhattacharya and Ramachandra Gandhi. The author argues that political theorists of Indian politics continue to work with categories and concepts alien to the lived social and political experiences of India's common man, or everyday people. Consequently, he emphasises the need to decolonize Indian political theory, and rescue it from the grip of western theories, and fascination with western modes of historical analysis. The necessity to avoid both universalism and relativism and more importantly address the political predicaments of 'the people' is the key objective of the book, and a push for a reorientation of Indian political theory. An interesting new interpretation of a contemporary ideal of *svaraj*, this analysis takes into account influences from other cultures and sources as well as eschews thick conceptions that stifle imaginations and imaginaries. This book will be of interest to academics in the fields of philosophy, political science, sociology, literature and cultural studies in general and contemporary political theory, South Asian and Indian politics and political theory in particular.

## **Problems In General Physics**

“YOU HAVE CHANGED MY LIFE” is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. “I walk with a new spring in my step and I look at life through physics-colored eyes,” wrote one such fan. When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and

The New York Times declared, "Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube's greatest hits." For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. "I introduce people to their own world," writes Lewin, "the world they live in and are familiar with but don't approach like a physicist—yet." Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. "For me," Lewin writes, "physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole." His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.
