German-Australian Encounters and Cultural Transfers

The essays in this volume explore the borderland between ecology and the arts. Nature is here read by a number of contributors as 'cultural', by others as an 'independent domain', or even as a powerful process of exchange 'between the human and the other-than-human'. The four parts of the volume reflect these different understandings of nature and performance. Informed by psychoanalysis and cultural materialism, contributors to the first part, 'Spectacle: Landscape and Subjectivity', look at ways in which particular social and scientific experiments, theatre and film productions and photography either reinforce or contest our ideas about nature and human-human or human-animal relations and identities. The second part, 'World: Hermeneutic Language and Social Ecology', investigates political protest, social practice art, acoustic ecology, dance theatre, family therapy and ritual in terms of social philosophy. Contributors to the third part, 'Environment: Immersiveness and Interactivity', explore architecture and sculpture, site-specific and mediated dance and paratheatre through radical theories of urban and virtual space and time, or else phenomenological philosophy. The final part, 'Void: Death, Life and the Sublime', indicates the possibilities in dance, architecture and animal behaviour of a shift to an existential ontology in which nature has 'the capacity to perform itself'.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

An understanding of the developments in classical analysis during the nineteenth century is vital to a full appreciation of the history of twentieth-century mathematical thought. It was during the nineteenth century that the diverse mathematical formulae of the eighteenth century were systematized and the properties of functions of real and complex variables clearly distinguished; and it was then that the calculus matured into the rigorous discipline of today, becoming in the process a dominant influence on mathematics and mathematical physics. This Source Book, a sequel to D. J. Struik's Source Book in

Mathematics, 1200-1800, draws together more than eighty selections from the writings of the most influential mathematicians of the period. Thirteen chapters, each with an introduction by the editor, highlight the major developments in mathematical thinking over the century. All material is in English, and great care has been taken to maintain a high standard of accuracy both in translation and in transcription. Of particular value to historians and philosophers of science, the Source Book should serve as a vital reference to anyone seeking to understand the roots of twentieth-century mathematical thought.

The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

Among the Night People

This book approaches Australo-German relations from comparative and interdisciplinary perspectives. It maps new pathways into the rich landscape of the Australo-German transnational encounter, which is characterized by dense and interwoven cultural, historical and political terrains. Surveying an astonishingly wide range of sites from literary translations to film festivals, Aboriginal art to education systems, the contributions offer a uniquely expansive dossier on the migrations of people, ideas, technologies, money and culture between the two countries. The links between Australia and Germany are explored from a variety of new, interdisciplinary perspectives, and situated within key debates in literary and cultural studies, critical theory, politics, linguistics and transnational studies. The book gathers unique contributions that span the areas of migration, aboriginality, popular culture, music, media and institutional structures to create a dynamic portrait of the exchanges between these two nations over time. Australo-German relations have emerged from intersecting histories of colonialism, migration, communication, tourism and socio-cultural representation into the dramatically changed twenty-first century, where traditional channels of connection between nations in the Western hemisphere have come undone, but new channels ensure cross-fertilization between newly constituted borders.
