In recent years Internet Poker has been gone from an industry very much in its infancy, enjoyed by a few hundred regular 'play money' players, to a multi-million pound business, in which thousands of players around the world take part in real money games every day. With more than a dozen major sites in fierce competition for the online poker market, and new cardrooms being launched every few months, poker players nowadays face a huge (and potentially bewildering) range of choices. Whether you are a newcomer to online poker or already play regularly, this book provides you with the information you need to survive in the Internet poker jungle. It addresses the following questions: * How do I choose an online poker room at which to play? * How does online cardroom play differ from 'live' cardroom play? * Is there a risk of being cheated or colluded against? * How can I use the Internet to improve my play?

Designed for researchers and students alike, the volume describes how to perform each stage of the data collection process on the Internet, including sampling, instrument design, and administration. Through the use of non-technical prose and illustrations, it details the options available, describes potential dangers in choosing them, and provides guidelines for sidestepping them. In doing so, though, it does not simply reiterate the practices of traditional communication modes, but approaches the Internet as a unique medium that necessitates its own conventions.
