The Ski Guide Manual

* For intermediate-to-advanced backcountry skiers* Includes trip planning, navigation, fitness, and avalanche safety information, in addition to techniques*Provides advice on how to make well-informed backcountry decisionsMartin Volken and his co-authors provide skiers with all the tools and knowledge they need to safely and successfully travel in the mountain backcountry. The guide features intermediate-to-advanced techniques for ski touring and ski mountaineering, from planning backcountry trips to perfecting turns in rolling terrain and mastering uphill climbing. For those skiers ready for a more technical, high alpine environment, they draw on traditional mountaineering skills, including roped climbing, setting protection anchors, using ice axes, climbing on bare rock, and more. In addition to mastering techniques, Backcountry Skiing also

features information on recent evolutions in ski equipment; avalanche safety tips; a primer on mountain weather and glaciers, trip planning tools, a discussion of emergency situations, nutrition and fitness advice, and winter camping basics. Throughout this guide, a special emphasis is put on being well-informed and making good decisions - whenever you strap on your skis and skins and head out into the backcountry.

Teton Skiing

The history of mountaineering began on Denali with the legendary story of four gold miners (called “Sourdoughs” because they carried sourdough starter with them at all times) who claimed to have summited after climbing more than 8,000 feet of steep snow and ice, then back down again—all in a single and incredibly dangerous day in 1910. Lugging a 25-pound, 14-foot flagpole to mark their success, they took on North America’s highest peak using sheet metal crampons, coal shovels, hatchets, and alpenstocks to balance their way up the mountain. Was the expedition a success or a hoax? Denali climber Jon Waterman brings this colorful mountaineering mystery to life.

Tom and Laurel Mountain, this guide serves as both the ultimate introductory resource and the experienced hard-man's hit list. The book is printed in color, 240 pages, and packed with useful information. It includes scores of annotated color topographic maps and hundreds of color photographs. The authors give a written description for each approach and descent along with useful statistics for gauging conditions and seriousness, including the slope, aspect, and angle, vertical gained and mileage of the approach, and a seriousness rating.

Backcountry Skiing Utah

Take the snowiest mountains in Canada, add two Austrian immigrants, an army of adrenaline-addicted skiers (kings, queens, billionaires, average people and

everyday ski bums) and throw a helicopter into the mix for an unforgettable story of mountain adventure. The tale begins when two childhood friends-Hans Gmoser and Leo Grillmair-leave postwar Austria and travel to Canada in search of adventure. They stumble upon employment taking skiers across the vast glaciers and through the thick forests of Western Canada. When skiers start asking the immigrant mountaineers if it would be possible to use a helicopter to reach the best high-altitude powder, the two find themselves catapulted into a project brimming with more adventure, success, tragedy and fame than they could have dreamed. Complete with archival and contemporary photos, this is the inside story of the people, thrills, accidents and innovations behind the evolution of a sport from a dangerous, ramshackle and lawless enterprise into a multi-million dollar industry offering reliable access to one of the world's most exciting forms of recreation.

Living the Life

As a recent college graduate and fledgling newspaper reporter in the Lake Tahoe area, Jeremy Evans became immersed in ski bum culture? a carefree lifestyle whose mantra was simply: ?Ski as much as possible.? His snowboarding suffered when he left for a job in the Portland area; and when, at twenty-six, he suffered a stroke, he reexamined his priorities, quit his job, moved back to Tahoe, and threw himself into snowboarding. But while he had been away, the culture had changed. This book is Evans?s paeon to the disappearing culture of the ski bum. A fascinating

look at a world far removed from the larger culture, it is also a curious account of a passion for powder and what its disappearance means. ø Evans looks at several prominent ski towns in the West (including Crested Butte, Jackson Hole, Telluride, Lake Tahoe, Park City, and Mammoth) and the ski bums who either flourished or fled. He chronicles the American West transformed by rising real estate costs, an immigrant workforce, misguided values, and corporate-owned resorts. The story he tells is that of quintessentially American characters?rejecting materialism, taking risks, following their own path?and of the glories and pitfalls their lifestyle presents.

Allen & Mike's Really Cool Backcountry Ski Book, Revised and Even Better!

Imagine Huck Finn "lighting out for the territories" 150 years later, this time as a late-30s corporate dropout turned backcountry snowboarder and mountain climber. Dudeville is a coming-of-middle-age adventure story, set in and all around small-town Colorado during the outdoor sports explosion of the 1990s. Inspired by a wide and wild range of influences -- from Thoreau, Whitman, Muir and Twain, to Jack Kerouac, Edward Abbey and Warren Miller -- Dudeville is equal parts extreme sports tale, male bonding romp, and reluctant love story, a sensuous, lyrical, exuberant exploration of the American West. Dudeville's author, J.D. Kleinke, was a serious health care guy in Baltimore until he discovered snowboarding, hang gliding, jam bands, and the raw spiritual power of life above treeline . . . and moved to

Colorado. He is the author of three books about medicine in America, including *Catching Babies*, a novel about the culture of maternity care and childbirth. He has also been involved in the formation, management, and governance of several health care companies and non-profit organizations. His work has appeared in *The New York Times*, *The Wall Street Journal*, and dozens of medical and business publications. He lives with his wife in Half Moon Bay, California, and Portland, Oregon. From *Dudeville*: "From this summit, the horizon seesaws open into an electric blue dream of Colorado sky. The adolescent swagger and brawn of the Rockies is nothing like the stooped and rounded hills back east. Spiked with mammoth formations of rock and ice, this vast, continental cacophony is the very roof of the world, pushed skyward by geologic time while collapsing under its own weight. I drop in, and surf off the wind-scoured edge, working the margin between transcendent bliss and utter catastrophe, a controlled fury exploding from my core into arcing snowboard turns as I crisscross the fall-line and dissolve into gravity"
