"A cup of coffee is a miracle, a wonderful assemblage of relationships". This classic follows coffee's journey around the world, from London to Brazil, telling in fascinating detail and amusing anecdote the singular history of the legendary commodity, from its discovery that chewing on the beans were keeping goats awake in Yemen to the author's own experiences with the bean in 1935. Referred to as a "documentary novel" back during its inception, H.E. Jacobs pioneered the concept of creative nonfiction, combining the reality of nonfiction with the epic presentation and prose of fiction. This genre exploded into popularity and remains so today. Coffee tells the story of this popular beverage in short, fun to read essays that will entertain anyone that enjoys a good, strong cup of coffee.

Join a fellow traveler on a walkabout through Paris and London, and then travel with him across England, Scotland and Wales. After those walkabouts, accompany him as he journeys across America and follows the equator to Australia. Finally, wander with him along the corridors of modern and postmodern philosophy, and as he travels with old and new Philosophes, who all voiced an opinion as regards this travel book. It is a book that people won't buy, won't read and won't praise. Mark Twain After reading only a few pages, I gave up the study of philosophy forever. Voltaire I cannot look upon the book without shedding tears. Bertrand Russell If I could only make a travel book like that, I would be perfectly willing to die-even anxious. John Dewey I have seen a great many travel books in my time, but none that this one reminds me of. Will Durant This travel book is one-third fabrication, one-third prevarication and one-third barefaced lies. However, the rest of the book is the unadulterated truth. Dr. Morris A. Nussbaum

"Charting the birth and growth of craft beer across the United States, Tom Acitelli offers an epic, story-driven account of one of the most inspiring and surprising American grassroots movements. In 1975, there was a single craft brewery in the United States; today there are more than 2,000. Now this once-fledgling movement has become ubiquitous nationwide--there's even a honey ale brewed at the White House. This book not only tells the stories of the major figures and businesses within the movement, but it also ties in the movement with larger American culinary developments. It also charts the explosion of the mass-market craft beer culture, including magazines, festivals, home brewing, and more. This entertaining and informative history brims with charming, remarkable stories, which together weave a very American business tale of formidable odds and refreshing success"--

Extreme Brewing is a recipe-driven resource for aspiring home brewers who are interested in recreating these specialty beers at home, but don't have the time to learn the in-depth science and lore behind home-brewing. As such, all recipes are malt-syrup based (the simplest brewing method) with variations for partial-grain brewing. While recipes are included for classic beer styles -- ales and lagers -- Extreme Brewing has a unique emphasis on hybrid styles that use fruit, vegetables, herbs and spices to create unique flavor combinations. Once their brew is complete, readers can turn to section three, The Rewards of Your Labor, to receive guidance on presentation, including corking, bottle selection and labeling as well as detailed information on food pairings, including recipes for beer infused dishes and fun ideas for themed dinners that allow the reader to share their creations with family and friends.

## **Historical Brewing Techniques**

Our day-to-day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy, natural resources, and consumer goods. Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves. And for years some biologists have warned us of the direct correlation between scarcity and population growth. These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology. A calm but unflinching realist, Catton suggests that we cannot stop this wave - for we have already overshot the Earth's capacity to support so huge a load. He contradicts those scientists, engineers, and technocrats who continue to write optimistically about energy alternatives. Catton asserts that the technological panaceas proposed by those who would harvest from the seas, harness the winds, and farm the deserts are ignoring the fundamental premise that "the principals of ecology apply to all living things." These principles tell us that, within a finite system, economic expansion is not irreversible and population growth cannot continue indefinitely. If we disregard these facts, our sagging American Dream will soon shatter completely.

## **Coffee**

Beer in the United States has always been bound up with race, racism, and the

construction of white institutions and identities. Given the very quick rise of craft beer, as well as the myopic scholarly focus on economic and historical trends in the field, there is an urgent need to take stock of the intersectional inequalities that such realities gloss over. This unique book carves a much-needed critical and interdisciplinary path to examine and understand the racial dynamics in the craft beer industry and the popular consumption of beer.

Of the rail lines created at the turn of the 20th century, in order to build interurban links through Southern California communities around metropolitan Los Angeles, the Pacific Electric grew to be the most prominent of all. The Pacific Electric Railway is synonymous with Henry Edwards Huntington, the capitalist with many decades of railroad experience, who formed the "P. E." and expanded it as principal owner for nearly its first decade. Huntington sold his PE holdings to the giant Southern Pacific Railroad in 1910, and the following year the SP absorbed nearly every electric line in the fourcounty area around Los Angeles in the "Great Merger" into a "new" Pacific Electric. Founded in 1901 and terminated in 1965, Pacific Electric was known as the "World's Great Interurban."

Major-General Urquhart commanded the 1st British Airborne Division in Operation Market Garden, the greatest airborne assault of World War II, the struggle to

capture Arnhem and win control of the bridge across the lower Rhine. The story of the 1st Airborne Division at Arnhem involved not only an Airborne Corps of three Divisions but also the bulk of the British 2nd Army in Europe. Gen. Urquhart has told the story of those fateful nine days clearly, frankly and, despite the terrible circumstances, not without humour. It ranks as an important work, describing an operation which opened with such high hopes and left its name forever as a feat of the highest endurance and valour.

With *A Natural History of the Senses*, Diane Ackerman let her free-ranging intellect loose on the natural world. Now in *Deep Play* she tackles the realm of creativity, by exploring one of the most essential aspects of our characters: the ability to play. "Deep play" is that more intensified form of play that puts us in a rapturous mood and awakens the most creative, sentient, and joyful aspects of our inner selves. As Ackerman ranges over a panoply of artistic, spiritual, and athletic activities, from spiritual rapture through extreme sports, we gain a greater sense of what it means to be "in the moment" and totally, transcendently human. Keenly perceived and written with poetic exuberance, *Deep Play* enlightens us by revealing the manifold ways we can enhance our lives.
