### **Once A Ferrara Wife**

In Zion's Dilemmas, a former deputy national security advisor to the State of Israel details the history and, in many cases, the chronic inadequacies in the making of Israeli national security policy. Charles D. Freilich identifies profound, ongoing

problems that he ascribes to a series of factors: a hostile and highly volatile regional environment, Israel's proportional representation electoral system, and structural peculiarities of the Israeli government and bureaucracy. Freilich uses his insider understanding and substantial archival and interview research to describe how Israel has made strategic decisions and to present a first of its kind model of national security decision-making in Israel. He analyzes the major events of the last thirty years, from Camp David I to the 1982 invasion of Lebanon, through Camp David II, the Gaza Disengagement Plan of 2005, and the second Lebanon war of 2006. In these and other cases he identifies opportunities forgone, failures that resulted from a flawed decision-making process, and the entanglement of Israeli leaders in an inconsistent, highly politicized, and sometimes improvisational planning process. The cabinet is dysfunctional and Israel does not have an effective statutory forum for its decision-making—most of which is thus conducted in informal settings. In many cases policy objectives and options are poorly formulated. For all these problems, however, the Israeli decision-making process does have some strengths, among them the ability to make rapid and flexible responses, generally pragmatic decision-making, effective planning within the defense establishment, and the skills and motivation of those involved. Freilich concludes with cogent and timely recommendations for reform.

'Drink Fuck Sleep' is a collection of essays depicting regrettable sexual experiences

wherein alcohol was involved either before, during, or after. With gripping, personal accounts of tragic, heart-wrenching, sexually boundless, ultra-erotic, emotionally numbing, mind thrilling, and scintillating experiences, the featured writers narrow the divide between what people project and what they protect. It serves as a series of precautionary tales, as well as proof of life and the parallels of the human condition, regardless of our socioeconomic stations.

What happens when a stranger enters a classroom during a lesson and asks for the pupils' total concentration for 15 minutes in order to make their portrait? He positions everyone with great care (so that they can clearly be seen) and then demands that they stay completely still for the long exposure. The results are both predictable and astonishing. This ongoing series by Julian Germain started in northeast England. Since then Germain has visited schools throughout North and South America, Europe, the Middle East, Africa, and Southeast Asia. His magnificent photographs are packed with detail--books open on graffitied desks, instructions on white and blackboards, artwork hanging on walls, notes scribbled

on the backs of hands. And of course there are the faces of the children themselves; enrapt, bored, inquisitive, arrogant, or shy, they incite endless curiosity about what these kids' lives are like and what their futures hold. Exquisitely reproduced in an oversize format, these portraits trigger memories of our own schooldays and bring into sharp focus the contemporary school experience throughout the world, in all its diversity and universality.

A feisty little girl learns that physical disability can't limit her ability to make a difference. Lupe loves nothing better than riding her father's horse, El Diablo. Fearless and agile, she rampages around her rural village in Mexico like a tigrilla

(little tiger), which is her father's nickname for her. But one day Lupe falls while climbing a tree. Paralyzed from the waist down, she will never again be able to ride El Diablo. Her life might as well be over, she thinks. At first Lupe is filled with rage and self-pity. Her family brings her to a center run by and for disabled people, to recuperate. Despite the evidence around her, she refuses to believe that disabled people can be happy and self-sufficient, and she can't believe that these people think their lives are worth living. But slowly the people and the spirit of the center help Lupe realize that she, too, has something to offer. Award-winning author/illustrator Molly Bang brings emotional honesty and bravery to this compelling, fact-based story of coming to terms with disability.

In what ways do films influence and interact with society? What social forces determine the kinds of movies that get made? How do movies reinforce—and sometimes overturn—social norms? As societies evolve, do the films that were once considered 'great' slip into obscurity? Which ones? Why? These questions, and many others like them, represent the mainstream of scholarly film studies today. In *Engaging Cinema*, Bill Nichols offers the first book for introductory film students that tackles these topics head-on. Published in a handy 'trade paperback' format, *Engaging Cinema* is inexpensive and utterly unique in the field—a perfect complement to or replacement for standard film texts.

Process flowsheeting concerns the use of computers to stimulate and design chemical plant of all types, such as petroleum refineries, petrochemical complexes or even food factories. In this 1979 introduction to the topic the authors examine the role of flowsheeting in process plant design and look at the various techniques

on which computer-aided systems may be based. For each one of these approaches the advantages and disadvantages are clearly stated and the four most important methods are described in detail. In each case the motivation for its development is analysed and its use is illustrated by a number of practical examples. Particular attention is devoted to the underlying technology of process flowsheeting systems, and an introduction to the analysis of degrees of freedom in flowsheeting and a guide to further reading are also included. This book will still hold value for those interested in the historical development of process flowsheeting.
