The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be

done. It's time to do it yourself. Get The Build.

## **How To Build & Power Tune Holley Carburetors**

Practical advice for anyone looking to increase the power of their motorcycle through turbocharging or supercharging. This valuable guide contains sections on ram air induction, fueling, electronic fuel injection, nitrous oxide, plus chapters on choosing the right bike for power boosting and factory turbo bikes.

## **Citroën 2CV**

Expert practical advice from an experienced race engine builder on how to build an ignition system that delivers maximum power reliably.

## **Road Test**

Never Far Away is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go about their day.

## **Mazda RX-7 Performance Handbook**

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.

## **Hot Rod**

High-performance tweaks for the most popular cars and motorcycles. Tips and techniques from the experts will help you maximize the horsepower, handling, and appearance of your car.

During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts, and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for

getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With *Holley Carburetors: How to Rebuild* you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.

The photos in this edition are black and white. "How to Tune and Win with Demon Carburetion" provides a detailed look at carburetor and engine theory in an easy to understand manner, and is a guide for choosing the correct carburetor for the application. Tuning tips for racing, and street/strip use are included and each of the four Demon models are analyzed in detail along with the basics of combustion, air flow, emissions, fuel systems, and gasoline. To add to the learning experience, each chapter includes side bars and review questions. For convenience, a glossary of over 460 relevant terms, is included. Consisting of 160 pages and over 400 photos, charts, graphs, and illustrations, "Demon Carburetion" is positioned to become the industry standard of technical reference for the enthusiast who has a thirst for knowledge. The Demon carburetor has taken the industry by storm with it's revolutionary design and exacting performance. Founded by Barry Grant, Demon Carburetion is one of the newer, more recognized names in performance carburetor manufacturing.
