Manufacturing Review

Understanding CAD/CAM

Computer Modeling and Simulation of Manufacturing Processes

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

International CAD/CAM/CAE Hardware Products Database

An in-depth look at the marriage between engineering design and manufacturing.

Advances in Integrated Product Design and Manufacturing

Index to IEEE Publications

The papers in this collection provide an insight into current research issues and directions in geometric modeling. Like many other fields in the past, geometric modeling is making the transition from the empirical stage to a maturity based on formal theories and procedures. The data structures and algorithms are also being treated on a more rigorous basis, using the formal procedures of computer science. Until recently, researchers were concerned more with modeling the basic geometry and topology of individual parts. However, as in this volume, attention is now focused upon the specification of a complete engineering model of a product. Emphasis is given to the role of features, and to the modeling of assemblies, tolerances, and processes. Constraints, parametric design and variational geometry have all become important. Non-manifold topology has become essential for the representation of adjacency information.

Intelligent Design and Manufacturing for Prototyping

Concurrent Product and Process Design

Proceedings of the ASME Dynamic Systems and Control Division

International Aerospace Abstracts

CAD/CAM overview; Anatomy of a graphics workstation; Input; Output; One picture is worth 25,000 words; Data highways; Engineer's dialogue with the CRT; Applications: new directions for engineering; The third wave in engineering (cost justification); An effective CAD/CAM vocabulary.

Government Reports Announcements & Index

Interdisciplinary Issues in Materials Processing and Manufacturing

Winter Annual Meeting

Advances in Manufacturing Systems Engineering

Applications of Knowledge-based Systems to Engineering Analysis and Design

Geometric Modeling for Product Engineering

A world list of books in the English language.

Engineering Design Graphics Journal

Concurrent Product and Process Engineering

The Cumulative Book Index

A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports (STAR) and International aerospace abstracts (IAA)

Issues in Design/manufacture Integration--1991

Applied Mechanics Reviews

The CAD/CAM Primer

Computer-aided/intelligent Process Planning

ProQuest Controlled Vocabulary and Classification Codes

CAD/CAM Abstracts

Construction is a multibillion dollar industry in the United States, yet building research is highly fragmented. This new book is a complete compilation of building research institutions. It contains profiles of the institutions and gives their addresses and phone numbers, the mission and focus of their research, their distinctive attributes, and their publications. A comprehensive index identifies all institutions conducting research on specific topics.
