"When I was a young boy and saw the Opel GT, I knew: When I grow up, I must have this car. My wish came true." So says Opel manager Karl-Thomas Neumann in his preface. Bob Lutz, the living automobile legend, an 84-year-old combat jet pilot who, as a young marketing director at Opel, played a substantial role in starting the GT series, praises the GT: "The GT has a lot in common with my Alpha Jet. It is not very comfortable, has weak air-conditioning, the boot is almost non-existent. But that is irrelevant. One hour in the Jet or GT - and you feel just happy. Almost younger." Kapitan, Admiral, Diplomat, Manta, Monza - many Opels have illustrious names and thrilling designs. But there is just one true legend of the brand with the flash: the GT. For generations of drivers the sports coupe is an eye-catcher, milestone, cult, and dream. It is regarded as the most sensational Opel ever - it sets an example for today's models especially the GT Concept, which premiered at the Geneva International Motor Show in March 2016. Authors Harald Hamprecht and Jens Cooper tell gripping stories about fans of the Opel GT from all over the world, from the USA to Italy to Australia. Both GT drivers, the authors combed the corporation's archive, searched for contemporary sources, and spent uncountable hours with experts, fans, and those who played a crucial role in the GT's development to create this - the ultimate guide to a remarkable car. **SELLING POINTS:** * Born in 1968 and manufactured for just five years, the Opel GT is a legend; this book is the standard work on the subject * Includes previously unpublished photos, design sketches, and anecdotes * GT designer Erhard Schnell, who celebrates his 90th birthday in 2017, has contributed some new sketches of the GT exclusively for this book * Celebrates the 50th anniversary of the Opel GT in 2018 - half a century of automobile history 200 colour images

Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His

presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heros, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.

However, a powerful counterforce within the American academy is systematically undermining core icons and ideals of Indic culture and thought. For instance, scholars of this counterforce have disparaged the Bhagavad Gita as a dishonest book ; declared Ganesha s trunk a limpphallus ; classified Devi as the mother with apenis and Shiva as a notorious womanizer who incites violence in India.

Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.

Invading the Sacred

An absolute sensation when first seen in 1948, in the midst of post-war austerity, the Jaguar XK 120 was both a stunningly beautiful car sold to all the top film stars, and a ruthlessly successful rally machine--and it remains just as effective on both counts today. A perfect XK 120, 140 or 150 could easily cost six figures in pounds, dollars or euros today--so how practical is it to buy a neglected example and restore it at home? This is the story of how one man completely restored his XK 120 roadster, transforming it from dereliction into a thoroughly beautiful example of this iconic sports car. He also took the time to investigate and incorporate numerous detail improvements, making the car even more usable and practical for today's roads, some 65 years after it was built. Cable TV engineer Bob Exelby has a

lifetime of home classic car rebuilds behind him and shares all the nuggets of information, advice and tips gleaned through his own blood (literally), sweat and tears over 50 years of 'playing with old cars'. Even the most experienced make mistakes, and he freely shares his so that others can avoid them. This book is invaluable if you want to know what makes an XK 'tick', and if it's the classic car for you--and vital if you own or are restoring one.
