### The Templar Cross

In this paradigm-shattering book, leading behavioural economist and food psychologist Brian Wansink - dubbed the 'Sherlock Holmes of food' and the 'wizard of why' - offers a radical new philosophy for weight loss. The answer isn't to tell people what to do: it's to set up their living environments so that they will naturally lose weight. Using cutting-edge, never-before-seen research from his acclaimed Food and Brand Lab at Cornell University, Wansink reveals how innovative and inexpensive design changes - from home kitchens to restaurants, from grocery stores to schools and workplaces - can make it mindlessly easy for people to eat healthier and make it more profitable for the companies who sell the food. In Slim

by Design, Wansink argues that the easiest, quickest and most natural way to reverse weight gain is to work with human nature, not against it. He demonstrates how schools can nudge kids to take an apple instead of a cookie, how restaurants can increase profits by selling half-size portions, how supermarkets can double the amount of fruits and vegetables they sell, and how anyone can cut plate refills at home by more than a third. Interweaving drawings, charts, floor plans and scorecards with new scientific studies and compelling insights that will make you view your surroundings in an entirely fresh way, this entertaining, eye-opening book offers practical solutions for changing your everyday environment to make you, your family and even your community slim by design.

Explorer, global green leader, and eco-TV host David de Rothschild recounts the extraordinary journey of the Plastiki, an innovative and mostly untested sixty-foot catamaran that floats on 12,500 reclaimed plastic bottles. It was a voyage that took de Rothschild and a five-person crew 10,000 miles from the U.S. to Australia, sailing through rarely traveled, dangerous waters, risking their lives to call attention to our fragile oceans. Their exploration included urgent study of ocean pollution, island nations threatened by rising seas, damaged coral reefs, and the acidifying ocean itself and their discoveries are a call to action. Packed with exciting narrative, images, maps, journal entries, plans, and sketches, this is the only firsthand account of what may be the most important adventure of our time.
