Curriculum Review

How to Produce Creative Publications

The premiere guide for choosing homeschool curriculum. For beginners or veterans, Cathy helps you wade through the curriculum jungle to choose what's right for each of your children. Reviews of hundreds of books, games, videos, computer programs, parent helps, and much, much more for all subjects.-- Learning styles: Cathy helps you determine each child's learning style, then choose methods and resources that fit each child.-- What your child needs to know -- what is typically taught at each grade level-- Which resources allow your children to work independently, which work best taught one-on-one-- Identifying and dealing with learning disabilities plus a list of consultants for extra help-- Testing: the good

and bad of testing, different kinds of tests, where to get them, testing services--
Addresses, phone numbers, faxes, e-mail, and web sites for all publishers and
distributors-- How to consolidate your shopping and save shipping costs

Fostering Children's Mathematical Power

MathScape

The Arithmetic Teacher

Aligned with NCTM standards and focal points, this resource offers ready-to-use lessons that include brain-compatible math activities, step-by-step instructions for the teacher, and all the necessary reproducibles.

Books and Pamphlets, Including Serials and Contributions to Periodicals

The Writers Directory 2008

Suggests a variety of techniques for getting children involved in reading and recommends more than five thousand books for children

Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed

Houghton Mifflin math central

CAS Review

Designed to support teachers as they build mathematical understanding, strengthen students' abilities to think, help students make sense of mathematics, and assist students in attaining computational fluency. Emphasizes problem posing and problem solving, and encourages teachers to invite children to use their own higher-level thinking processes, including mental calculation and estimation.

The Big Book of Home Learning

The Instructor

The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Catalog of Copyright Entries, Third Series

ImI-Creative Actvty/Yng Chldrn

Features bibliographical, biographical and contact information for living authors worldwide who have at least one English publication. Entries include name, pseudonyms, addresses, citizenship, birth date, specialization, career information and a bibliography.

Instructor

Australian Books in Print

Algebra

First published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

Access, Microcomputers in Libraries

Text is appropriate for courses in Mathematics for the Elementary School. Built on the foundation of the new 2000 NCTM Principles and Standards, this major new entry for K-8 math methods has impacted the market because of its point-of-use links to the standards and its emphasis on the importance of a child-centered approach creating a learning environment that informs teachers how to support children as they build understandings of math concepts. Designed to be neither skimpy nor exhaustive, this text presents theory in an accessible manner and models a wealth of practical activities for teaching. Five videos from the Annenberg/CPB TEACHING MATH video series bring real classrooms to life for teachers and are integrated into the text as four/color, resourceful inserts.

Creative Uses of Children's Literature

"How to Produce Creative Publications" is a first-class guide for anyone who wants

to acquire the skills to make in-house publishing a success. Tom Bivins and Bill Ryan show you how to research and write winning copy and how to design eye-catching layouts. You'll learn all about handling traditional typesetting and printing methods and--in parallel--you'll learn how to get the most out of your computer. Software applications have revolutionized the world of in-house publications and brought it right into your office. What was once sent out to specialist publishers and printers can now be done at your desk. This book will help you take control. It will teach you everything from choosing the right hardware and software, to editing, illustrating, and printing computer-generated copy. Part One leads you through the tricks and tools of the trade: Writing, Design, Typography, Layout, Illustration, and Printing. At each stage, the authors introduce specific computer applications that will broaden your options, cut your workload and costs, and tighten your schedule. Part Two describes in depth the four basic in-house formats: Newsletters, Magazines, Annual Reports, and Brochures. You'll find out how to select the best format for your needs and how to bring your ideas to life on the screen.

Broadcasting

The complete guide to everything educational for you and your children.
