AACN Core Curriculum for Pediatric High Acuity, Progressive, and Critical Care Nursing, Third Edition

Now completely revised and updated, this comprehensive text/reference covers all aspects of caring for the critically ill child. Recognizing that children are not simply small adults, it discusses the differences between critical care of adults and that of children, exploring relevant structural and functional aspects, pathophysiology, and treatment of common diseases that afflict and critically injure children. Physiology, biochemistry, and molecular biology are all included, with an emphasis on clinically applicable information. The clear, logical organ-system approach includes development, function, disease, and treatment for each entity, and helps the reader relate normal function, pathophysiology, and treatment to clinical problems.

Quick Reference to Critical Care

It's the ideal go-to reference for the clinical setting! Compact and easy to use, Manual of Critical Care Nursing, 6th Edition presents essential information on approximately 80 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialists Marianne Baird

and Sue Bethel separate the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, patient teaching, and rehabilitation. A concise, consistent format presents the material in a way that reflects a practicing nurse's thought processes. Coverage of approximately 80 critical care conditions/disorders includes those most commonly seen in critical care units. Chapter outlines provide easy reference to care plans and other key information. A portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Unique! Gerontology icons and boxes highlight considerations relating to the care of older adults. Unique! Research briefs in special boxes discuss selected research studies for evidence-based patient care. Unique! The latest NANDA-approved nursing diagnoses are marked with an icon, and provide familiarity with NANDA terminology. Appendixes provide quick reference to information needed in the critical care setting. Revised format mirrors a practicing nurse's approach to patient care, and makes it easier to find information. Unique! Quality Indicators and Measures tables summarize performance measures and highlight interventions associated with the best available patient care guidelines. Unique! Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Newly formatted care plans incorporate diagnoses, interventions, and desired outcomes in a consistent, logical organization Collaborative management tables concisely summarize key points while incorporating nationally recognized guidelines. Patient safety alerts and high alerts call attention to issues important to a patient's safety. Colored tabs mark the location of each body system, making topics easier to find. Smaller trim size increases portability for use in the unit or bedside, while enhancing readability.

Manual of Critical Care Nursing

Here's the most clinically oriented critical care text focusing on the adult patient. In full-color and superbly illustrated with clinical photographs, imaging studies, and management algorithms, and with a broad multidisciplinary focus, this text will help you enhance your skills at any level of training. Stands alone as a clinically oriented comprehensive reference. Completely updated and authorship expanded to reflect the evolution in critical care practice. In color for the first time, with new color schematics and treatment algorithms for greater ease of reference. Utilizes key points lists at the end of chapter, to help you make decisions rapidly and easily. Delivers key references that list other useful resources for information. Includes these seven new chapters to keep you on the cutting edge of your specialty: Assessment of Cardiac Filling and Blood Flow Mechanical Ventilation of Obstructive Airways Disease Mechanical Ventilation of Acute Respiratory Distress Syndrome Severe Sepsis and Multiple Organ Dysfunction Stroke Delirium, Psychosis, Sleep and Depression in the ICU ICU Education

ECMO

Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

Pass CCRN!

Learn to provide state-of-the-art care to any patient in any setting with the most comprehensive trauma nursing resource available. Using the unique cycles of trauma framework, *Trauma Nursing: From Resuscitation Through Rehabilitation*, 5th Edition features coverage of cutting-edge research findings and current issues, trends, and controversies in trauma nursing. The thoroughly updated fifth edition guides you through all phases of care - from preventive care and the time of injury to the resuscitative, operative, critical, intermediate, and rehabilitative stages. Plus, new chapters address unique trauma

patient populations including pregnant women, children, the elderly, bariatric individuals, burned patients, those with a history of substance abuse and organ donors. With timely discussions on emerging topics such as mass casualty events and rural trauma, this is the most complete resource available for both students and experienced trauma nurses. UPDATED! Disaster preparedness, response and recovery for mass casualty incidents prepares students to act quickly and confidently in the event of a disaster, with guidelines for initial response and sustained response. UPDATED! The latest sepsis protocols, opioid use and pain/sedation protocols, and treating injured patients with diabetes. Special populations coverage prepares you to meet the needs of unique trauma patient populations including pregnant women, children, the elderly, bariatric individuals, burn patients, those with a history of substance abuse and organ donors. Coverage of specific issues that affect all patients regardless of their injury, gives you a solid understating of mechanism of injury, traumatic shock, patient/family psychosocial responses to trauma, pain, anxiety, delirium and sleep management; infection; wound healing, and nutrition. Tables and illustrations throughout add clarity to the content being discussed. NEW! Information on a team-centered, interdisciplinary approach to care. NEW! Up-to-date evidence-based information about issues that affect trauma care systems, includes injury pathophysiology, and state-of-the-art care for the trauma patient during all phases of care. NEW! All new content includes information on cultural sensitivity, care for caregivers, and how to handle self-harm injuries and suicide. NEW! Certification review questions help you to prepare for certification by listing the correct answers and rationales. NEW! Current recommendations for measuring fluid administration responsiveness.

Introduction to Critical Care Nursing

Using detailed, step-by-step guidelines, this comprehensive book covers procedures commonly performed by all nurses in pediatric critical care. Following the successful format of the AACN Procedure Manual for Critical Care, 5th edition, this new resource focuses on the unique aspects of caring for infants and children. This easy-to-use guide includes the latest information, a strong evidence base, and a supporting rationale for each step of each procedure. Advanced Practice Skills are included throughout the text and are marked with a special AP icon indicating that these procedures should only be performed by qualified personnel. Evidence-based practice and research-based data are used to support the recommendations for each procedure. Each procedure follows a consistent, step-by-step format with rationales. Developmental differences are highlighted in special Procedure tables. This valuable, everyday resource is sponsored by the American Association of Critical-Care Nurses. Each procedure is covered in a consistent structure: Purpose Prerequisite knowledge Child and family assessment Child and family education Equipment Procedure (with steps, rationale, and considerations) Expected and unexpected outcomes Monitoring and care of the child (with activities and interventions, rationale, and reportable conditions) Documentation

Trauma Nursing E-Book

What began as a compilation of author notes from a real critical care hospital practice setting is now a pocket-sized powerhouse for critical care nurses and students! Quick Reference to Critical Care, 4th edition, provides thoroughly updated critical care content and updated cross-references with page numbers for even quicker reference and ease of use. Information is organized by body system, with each part presented alphabetically for fast, easy access. Full of fast facts, mnemonics, and over 200 images and tables!

Drugs in Anaesthesia and Intensive Care

Feeling unsure about your critical care nursing skills? Time to gain some confident know-how, with the freshly updated Critical Care Nursing Made Incredibly Easy!®, 5th Edition. This friendly, fully illustrated guide offers clear, concise direction on treating numerous acute and life-threatening issues. Absorb current best practices on critical care basics and specialized areas such as advanced life support measures, multisystem trauma, and treating specialized needs. This is ideal guidance for students, nurses new to clinical care, and those preparing for the Critical Care (CCRN) certification exam.

Evidence-Based Geriatric Nursing Protocols for Best Practice, Fifth Edition

Our textbook and live review course is APPROVED by the Board for Critical Care Transport Paramedic Certification (BCCTPC) and is used by our nationally recognized lecturers who present Review Courses for Certified Flight Registered Nurse (CFRN), Flight Paramedic-Certified (FP-C), Certification in Emergency Nursing (CEN), Critical Care Registered Nurse (CCRN), & Certified Transport Registered Nurse (CTRN). In addition to being industry recognized leaders in their field, several of our lecturers are also Editorial members with the "Air Medical Journal", having worked in the industry for a combined sixty years and have experience in Adult, Pediatric, Neonatal, Obstetric, Trauma, Emergency, and Critical Care. Our Instructors are also licensed by the Federal Aviation Administration (FAA) as Commercial rated Airplane and Helicopter Pilots. This book is sure to assist anyone wanting to expand their knowledge, better themselves clinically, or to prepare for any of these tough examinations.

AACN Procedure Manual for Pediatric Acute and Critical Care

Get ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN®-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence,

essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation — included free with each new copy of the book — mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website. Thoroughly UPDATED review content reflects AACN's latest CCRN®-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

The ICU Book

Featuresâ€¢ Ideal for critical care and progressive care orientation programsâ€¢ Incorporates AACN Protocols for Practiceâ€¢ Builds on essential knowledge to more advanced conceptsâ€¢ Provides excellent foundation for CCRN certification examâ€¢ Includes ACLSâ„¢ algorithms, critical care drug tables, cardiac rhythm characteristics and treatment guides, troubleshooting guides for hemodynamic monitoring and ventilator management, as well as other useful critical care protocols and guidelines.â€¢ Endorsed by the American Association of Critical Care Nurses.

Core Curriculum for Neonatal Intensive Care Nursing - E-Book

This is a Pageburst digital textbook; Here's the essential information you need to know in critical care nursing - all in one concise text! Using a to-the-point, reader friendly approach, Introduction to Critical Care Nursing, 5th Edition, provides authoritative, real-world information on the important concepts of critical care nursing and the assessment and technical skills associated with the management of critically ill patients. The latest content on the technology makes it easy to learn and understand how to use the equipment you'll use in the field. Nursing care chapters are organized according to the nursing process framework, and you'll find detailed nursing care plans in every management chapter. Case studies and critical thinking questions challenge you to apply what you've learned, and user-friendly features throughout the text (updated pharmacology tables, clinical and laboratory alerts, and evidence-based practice boxes) help you bridge the gap between concepts and clinical practice. Nursing Care Plans provide nursing diagnoses, expected patient outcomes, and interventions with rationales to prepare you for clinical practice. Case Studies challenge you to apply concepts from the book to real-life patient situations to test their critical thinking skills. Streamlined and updated Pharmacology Tables detail the actions, indications, dosages and routes, and side effects of commonly used critical care drugs. Clinical Alerts promote optimal patient safety and outcomes by highlighting potential problems and concerns in the clinical setting. Laboratory Alerts discuss both common and cutting-edge tests and procedures, emphasizing the importance of laboratory test results to critical nursing care. Critical Thinking Questions in every chapter encourage you to use and reinforce the concepts presented throughout the chapter. Now full-color throughout, new, vibrant artwork and anatomical images are in true-to-life color. A new chapter on end-of-life care covers ethical and legal matters, palliative care, withholding of therapies, and communication issues - all essential concerns confronting today's critical care nurse. New features on evidence-based practice, genetics, transplantation, and geriatric considerations offer realistic, easy-to-understand information on some of the most important and rapidly changing topics in critical care today.

Thelan's Critical Care Nursing

A classic in its field, this popular text provides clinical coverage of critical care nursing, with an emphasis on holism in practice. Beginning with the psychosocial concepts of care, the text progresses through assessment and management of a variety of disorders. Now under the head authorship of Tricia Morton, Critical Care Nursing maintains its popular holistic approach to the complexities of adult health and critical care. The Eighth Edition is now in full-color, and has been thoroughly updated to reflect recent changes and advances in critical care nursing. A CD-ROM in the back of this edition has common Critical Care Drug Monographs, Crisis Values of Lab Tests, Critical Care Nursing Procedures, Animations, and

comprehensive critical care exams.

Introduction to Critical Care Nursing

For nearly 40 years, Oh's Intensive Care Manual has been the quick reference of choice for ICU physicians at all levels of experience. The revised 8th edition maintains this tradition of excellence, providing fast access to practical information needed every day in today's intensive care unit. This bestselling manual covers all aspects of intensive care in sufficient detail for daily practice while keeping you up to date with the latest innovations in the field. Short, to-the-point chapters distill the essential information you need to know for safe, effective care of patients in the ICU. Each topic includes theoretical knowledge, practical methods of treating the condition described, a review of the available evidence, and common pitfalls in treatment and management. Ideal for daily quick reference as well as an efficient review for professional examinations in critical care medicine.

Aacn Procedure Manual for High Acuity, Progressive, and Critical Care

This publication addresses all the topics crucial to students or newly qualified critical care nurses. Designed for 9-13 week critical care classes, this new edition prepares readers to integrate the technology of critical care with psychosocial concerns in order to provide high-quality nursing care.

Intensive Care Nursing

Focusing on critical care nursing, this full-color text provides an examination of the important aspects of critical care nursing. It is organized in ten units around alterations in body systems.

Critical Care Medicine

Now completely revised to bring you up to date with the latest advances in the field, Critical Care Medicine: Principles of Diagnosis and Management in the Adult, 5th Edition, delivers expert, practical guidance on virtually any clinical scenario you may encounter in the ICU. Designed for intensivists, critical care and pulmonology residents, fellows, practicing physicians, and nurse practitioners, this highly regarded text is clinically focused and easy to reference. Led by Drs. Joseph Parrillo and Phillip Dellinger, the 5th Edition introduces numerous new authors who lend a fresh perspective and contribute their expertise to that of hundreds of top authorities in the field. Includes new chapters on current applications of bedside ultrasound in the ICU, both diagnostic and procedural; mechanical assist devices; and extra-corporeal membrane

oxygenation (ECMO). Contains new administrative chapters that provide important information on performance improvement and quality, length of stay, operations, working with the Joint Commission, and more. Features new images that provide visual guidance and clarify complex topics. Keeps you up to date with expanded chapters on echocardiography in the ICU and valvular heart disease, including TAVR. Includes separate chapters on mechanical ventilation of obstructive airway disease and acute respiratory distress syndrome (ARDS) – including the many recent changes in approach to positive end expiratory pressure setting in ARDS. Covers key topics such as patient-ventilator synchrony and non-invasive ventilation for treating chronic obstructive pulmonary disease patients with acute respiratory failure. Reflects the recent literature and guidance on amount of fluids, type of fluid, vasopressor selection, mean arterial pressure target, and decision on steroid use in septic shock. Provides questions and answers in every chapter, perfect for self-assessment and review.

Oh's Intensive Care Manual E-Book

Endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia Written by leading critical care nursing clinicians, Leanne Aitken, Andrea Marshall and Wendy Chaboyer, the 4th edition of Critical Care Nursing continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and specialty practice, providing the most recent research, data, procedures and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world. Increased emphasis on practice tips to help nurses care for patients within critical care Updated case studies, research vignettes and learning activities to support further learning Highlights the role of the critical care nurse within a multidisciplinary environment and how they work together Additional resources on Evolve An eBook on VitalSource Instructor resources Case Study suggested responses Learning Activity suggested responses Additional Case Study answers Image collection, including tables Student resources Additional Case Studies Weblinks Increased global considerations relevant to international context of critical care nursing alongside its key focus within the ANZ context Aligned to update NMBA RN Standards for Practice and NSQHS Standards An eBook included in all print purchases

Critical Care Medicine E-Book

Now in vibrant full color throughout, Rogers' Textbook of Pediatric Intensive Care, 5th Edition, continues its tradition of excellence as the gold standard in the field. For more than 25 years, readers have turned to this comprehensive resource

for clear explanations of both the principles underlying pediatric critical care disease and trauma as well as how these principles are applied in clinical practice. In the 5th Edition, more than 250 global contributors bring you completely up to date on today's understanding, treatments, technologies, and outcomes regarding critical illness in children.

Critical Care Nursing Made Incredibly Easy!

AACN Core Curriculum for Pediatric High Acuity, Progressive, and Critical Care, Third Edition, provides content required to deliver the best care for critically ill or injured children. As acuity increases in all inpatient departments and the practice of pediatric critical care expands beyond the acute phase of illness or injury, knowledge of pediatric critical care is more essential than ever. Pediatric acute and critical care nurses find themselves handling not only their patients, but care of their families and management of an interprofessional team of caregivers. With emphasis on evidence-based care and professionalism, this essential resource captures the professional role of the pediatric critical care nurse and the nurse's contributions to the process of continuous quality improvement. Ideal for pediatric critical care and acute care nurses, high acuity/critical care courses, and continuing education, AACN Core Curriculum for Pediatric High Acuity, Progressive, and Critical Care, Third Edition, contains core AACN guidelines for the highest quality nursing practice. The text covers anatomic, physiologic, cognitive, and psychosocial changes that occur throughout the pediatric lifespan. Chapters are systems focused and review developmental anatomy and physiology, clinical assessment, pharmacology, diagnostic tests, and therapeutic procedures. For each type of disease and injury, information is provided on pathophysiology, etiology, risk factors, signs and symptoms, nursing and collaborative interprofessional management, and complications. New to the Third Edition: Updated to include current patient management and the latest pediatric drug information Contains a completely new chapter on professional nursing issues, including quality, safety, communications, teamwork, work environment, and personal wellness Provides revised case studies and review questions/answers reflecting the latest version of the CCRN® Pediatric exam Key Features: Delivers comprehensive, current information for nursing students and those preparing for the CCRN® Pediatric exam Content is based on the most current standards of care, scope of practice, national guidelines, key AACN initiatives, and the AACN Certification Corporation Pediatric CCRN® Test Plan Presented in easy-to-read outline format for quick access to information Written and endorsed by AACN and AACN-affiliated subject matter experts Provides case studies to illustrate patient scenarios Discusses the application of AACN's Synergy Model for Patient Care in pediatric high acuity and critical care nursing practice Includes in-depth coverage of multisystem problems such as multiple trauma, toxicology, septic shock, and burns

Pediatric Critical Care

Presents information logically, based on the pathophysiology of disease, significance of evidence, and avoidance of harmful

effects inherent at the critical care level of nursing practice. Chapters include critical care basics, holistic care issues, body system-based conditions, and hematologic, immune and multisystem disorders. This new edition is completely updated to incorporate the spectrum of critical care and evidence-based nursing practice, ranging from moderate sedation and perianesthesia management to special concerns for patients who are elderly, the types of shock, management of stroke, and more.

AACN Core Curriculum for High Acuity, Progressive and Critical Care Nursing - E-Book

It's the ideal go-to reference for the clinical setting! Compact and easy to use, Manual of Critical Care Nursing, 6th Edition presents essential information on approximately 80 disorders and conditions, as well as concepts relevant to caring for all critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialists Marianne Baird and Sue Bethel separate the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. A concise format presents the material in a way that reflects a practicing nurse's thought processes. Coverage of approximately 80 critical care conditions/disorders includes those most commonly seen in critical care units. Chapter outlines provide easy access to disorders. A portable size makes it ideal for use in the unit or bedside, and is also easy to carry on campus. Unique! Gerontology icon highlights considerations relating to the care of older adults. Unique! Research briefs in special boxes discuss selected research studies for evidence-based patient care. Unique! The latest NANDA-approved nursing diagnoses increase familiarity with NANDA terminology. Appendixes provide quick reference to information needed in the critical care setting. Revised format mirrors a practicing nurse's approach to patient care, making it easier to find information. Newly formatted care plans incorporate diagnoses, interventions, and desired outcomes in a consistent, logical organization. Patient safety alerts and high alerts call attention to issues important to a patient's safety. Unique! Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Unique! Collaborative Management tables concisely summarize key points while incorporating nationally recognized guidelines. Colored tabs mark the location of each body system, making topics easier to find. Smaller trim size increases portability for use in the unit or bedside, while enhancing readability.

Priorities in Critical Care Nursing

A Manual of Neonatal Intensive Care

A new edition of the proven guide to providing emergency care for mothers-to-be in acute medical distress Now in its sixth

edition, Critical Care Obstetrics offers an authoritative guide to what might go seriously wrong with a pregnancy and delivery and explains how to manage grave complications. Written by an international panel of experts, this updated and revised edition contains the most recent advances in the field as well as recommendations for treating common complications such as bleeding, thrombosis, trauma, acute infection, airway problems and drug reactions in a pregnant patient. This important guide offers the information needed to enable the early-on recognition of life-threatening conditions and the use of immediate life-saving treatments in emergency situations. The techniques and procedures outlined help to maximise the survival prospects of both the mother and fetus. The authors offer an accessible text for any healthcare professional responsible for the care and management of pregnant women and their unborn children. Critical Care Obstetrics is a vital resource that: Contains a clear guide for early recognition of conditions which may prove life threatening Offers new information on Analgesia and sedation; Imaging and interventional radiology in pregnancy; Oxygen therapy; and Pulmonary hypertension Presents protocols for implementing life-saving treatments in emergency situations Written by international experts in emergency obstetric medicine Designed for use by obstetricians and obstetrician and gynecology trainees, Critical Care Obstetrics is the updated guide to the management of serious conditions in pregnancy and delivery.

Policy & Politics in Nursing and Health Care - E-Book

Preceded by: AACN procedure manual for critical care / edited by Debra Lynn-McHale Wiegand. 6th ed. c2011.

Manual of Critical Care Nursing

Renowned for its holistic perspective and step-by-step approach, this pocket-size text takes you through every stage of the nursing assessment for adults and special populations. The book's "see" and "do" guidance provides all that you need to perform a range of common assessment procedures with confidence.

Critical Care Nursing

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. With a full-color design and concise, easy-to-read chapters, Critical Care Medicine: The Essentials and a Bit More covers the core elements of critical care, with a unique focus on the pathophysiology underlying clinical disorders and how pathophysiologic concerns affect treatment options. There is much here that's new: brand-new content, expanded discussions, and more graphical elements than ever before. Chapters follow a consistent structural template, with discussions of diagnosis, instrumentation, treatment and management techniques,

and more. Expertly and succinctly captures all the fundamentals of the field!

Rogers' Textbook of Pediatric Intensive Care

New edition which contains everything required by critical care nurses for practice and certification. Includes all the content on the CCRN examination blueprint. Also useful as a clinical reference providing quick access to essential information needed for care of critically ill clients.

Certification and Core Review for Neonatal Intensive Care Nursing - E-Book

From the experts at the American Association of Critical-Care Nurses (AACN) comes the definitive resource for critical care certification and clinical practice. This new seventh edition has been thoroughly updated to reflect the current state of high acuity, progressive, and critical care nursing practice and includes expanded coverage of pain management, palliative care, and end-of-life care; transplantation; and key AACN initiatives. It also reflects the most current literature, national and international guidelines, clinical studies, and of course, the newest content on the CCRN® exam. Authored by the experts at the American Association of Critical-Care Nurses (AACN), this is the definitive guide to critical care nursing certification and clinical practice. NEW! Significantly updated content corresponds to the most recent CCRN® examination blueprint and reflects the most current literature, national and international guidelines, clinical studies, AACN/ANA scope of practice, and ECCO 3.0. NEW! Expanded coverage of key content reflects the healthcare needs of today's patients, including pain management, palliative care, and end-of-life care; nutritional support; transplantation; and key AACN initiatives. Concise outline format is organized by body system to make information easy to digest. NEW! Clinical Pearls and Key Concepts boxes highlight key content and serve as a convenient quick reference. NEW! Improved navigation includes printed index tabs to help distinguish chapters and find information fast. Basic to advanced levels of coverage, with an emphasis on clinical nursing practice, prepare you for the full range of knowledge you will encounter on the CCRN exam and in practice. Coverage of the AACN Synergy Model is featured in the new opening chapter. Professional Care and Ethical Practice is integrated into the Core Curriculum series framework. A new chapter on Critical Care Patients with Special Needs includes bariatric and geriatric patients in critical care, as well as high-risk obstetric patients. Features new content on chest tubes, liver transplantation for acute liver failure, spirituality, and spiritual aspects of care. Integrates pain as the 5th vital sign and includes JCAHO, HCFA, and AHCPH guidelines relating to pain management. Features AHRQ evidence-based practice guidelines as reference sources for practice interventions. New organization for Patient Care presents patient problems, needs, etc. in order of clinical priority. Expanded Nursing Interventions includes considerations related to patient/family education, patient transfer, and discharge planning. Web-based resources for CDC, AHA, NINR, National Guideline Clearinghouse, NIH Consensus Conference Proceedings, ADA.

Critical Care Nursing Made Incredibly Easy!

This best-selling resource provides a general overview and basic information for all adult intensive care units. The material is presented in a brief and quick-access format which allows for topic and exam review. It provides enough detailed and specific information to address most all questions and problems that arise in the ICU. Emphasis on fundamental principles in the text should prove useful for patient care outside the ICU as well. New chapters in this edition include hyperthermia and hypothermia syndromes; infection control in the ICU; and severe airflow obstruction. Sections have been reorganized and consolidated when appropriate to reinforce concepts.

Core Curriculum for Critical Care Nursing

Trusted for 30 years, Drain's PeriAnesthesia Nursing, A Critical Care Approach, 7th Edition is the only book on the market that provides comprehensive clinical content tailored specifically for perianesthesia nurses. An easy-to-use format with five distinct sections — covering the PACU, anatomy and physiology, pharmacology, nursing care, and special considerations — means you get five books in one. Nursing and pharmacologic interventions are integrated with in-depth coverage of pathophysiology, and updated content includes the latest standards and current issues affecting perianesthesia nursing practice. Focusing on research, documentation, and psychosocial considerations, this is the one book that can take you all the way from being a novice nurse in the PACU to preparing for your CPAN® or CAPA® certification! Updated Evidence-based Research boxes in sections IV and V provide the latest standards of care. Five separate sections provide comprehensive coverage, including: the PACU, anatomy and physiology, pharmacology, nursing care, and special considerations. Addresses current policies and issues affecting perianesthesia nursing practice such as patient safety, infection control, managed care implications, pain management, and bioterrorism. Special Considerations section details the care of patients with conditions such as malignant hyperthermia, substance abuse, sickle cell anemia, and cardiac arrest. Comprehensively covers the various types of anesthetic agents to be anticipated in the PACU. In-depth coverage of pathophysiology for all body systems integrated with nursing and pharmacologic interventions. Streamlined format includes an overview, definitions, summary, and references for each chapter. NEW and EXPANDED! Updated content covers the latest evidence and standards, including new sedation and pain guidelines, new information on older patients, implications of new surgical techniques, and more bariatric implications. NEW and UPDATED! New illustrations and thoroughly updated references throughout.

Nurse's Handbook of Health Assessment

This completely updated and revised new edition is specially written for qualified nurses working in intensive care nursing

units. Fully comprehensive and developed to be as accessible as possible it contains four new chapters with valuable new and updated clinical scenarios to aid learning. Intensive Care Nursing is structured in user-friendly sections. Each chapter contains 'fundamental knowledge' needed to understand the chapter, an introduction, 'implications for practice', a chapter summary, completely updated further reading, 'time out' sections for revision and a clinical scenario with questions included. This second edition has been fully developed and reviewed by practitioners and teachers, as well as a senior pharmacist and covers: patient-focused issues of bedside nursing the technical knowledge necessary to care safely for ICU patients the more common and specialized disease processes and treatments encountered how nurses can use their knowledge and skills to develop their own and others' practice. A support website at www.routledge.com/textbooks/0415373239 links to other important sites, gives answers to the clinical scenario questions and provides a forum for discussion of important clinical issues. Written by a practice development nurse with a strong clinical background in intensive care nursing and experience of teaching nursing, Intensive Care Nursing is essential reading for nurses and health professionals working with high dependency patients.

Critical Care Patient Transport, Principles and Practice

This cost-saving package includes both Urden: Thelans Critical Care Nursing, 4th edition and Melander: Case Studies in Critical Care Nursing for the price of the textbook alone. Thelans has become the classic critical care nursing textbook, offering the most comprehensive and detailed presentation available. Melander contains up-to-date case studies on critical care conditions for applied learning. Together these books provide all the critical care nursing information you need, for one low price!

Critical Care Medicine

Introduction to Critical Care Nursing

Here's the essential information you need to know in critical care nursing — all in one concise text! Using a to-the-point, reader friendly approach, Introduction to Critical Care Nursing, 5th Edition, provides authoritative, real-world information on the important concepts of critical care nursing and the assessment and technical skills associated with the management of critically ill patients. The latest content on the technology makes it easy to learn and understand how to use the equipment you'll use in the field. Nursing care chapters are organized according to the nursing process framework, and you'll find detailed nursing care plans in every management chapter. Case studies and critical thinking questions challenge you to apply what you've learned, and user-friendly features throughout the text (updated pharmacology tables, clinical and

laboratory alerts, and evidence-based practice boxes) help you bridge the gap between concepts and clinical practice. Nursing Care Plans provide nursing diagnoses, expected patient outcomes, and interventions with rationales to prepare you for clinical practice. Case Studies challenge you to apply concepts from the book to real-life patient situations to test their critical thinking skills. Streamlined and updated Pharmacology Tables detail the actions, indications, dosages and routes, and side effects of commonly used critical care drugs. Clinical Alerts promote optimal patient safety and outcomes by highlighting potential problems and concerns in the clinical setting. Laboratory Alerts discuss both common and cutting-edge tests and procedures, emphasizing the importance of laboratory test results to critical nursing care. Critical Thinking Questions in every chapter encourage you to use and reinforce the concepts presented throughout the chapter. Now full-color throughout, new, vibrant artwork and anatomical images are in true-to-life color. A new chapter on end-of-life care covers ethical and legal matters, palliative care, withholding of therapies, and communication issues — all essential concerns confronting today's critical care nurse. New features on evidence-based practice, genetics, transplantation, and geriatric considerations offer realistic, easy-to-understand information on some of the most important and rapidly changing topics in critical care today.

Drain's PeriAnesthesia Nursing - E-Book

This money-saving package is a must-have for nursing students! It includes Sole's Introduction to Critical Care Nursing 4th edition text and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks!

Aacn Essentials of Critical Care Nursing

Learn how to influence policy and become a leader in today's changing health care environment. Featuring analysis of cutting-edge healthcare issues and first-person insights, Policy & Politics in Nursing and Health Care, 8th Edition continues to be the leading text on nursing action and activism. Approximately 150 expert contributors present a wide range of topics in policies and politics, providing a more complete background than can be found in any other policy textbook on the market. This expanded 8th edition helps you develop a global understanding of nursing leadership and political activism, as well as the complex business and financial issues that drive many actions in the health system. Discussions include the latest updates on conflict management, health economics, lobbying, the use of media, and working with communities for change. With these innovative insights and strategies, you will be prepared to play a leadership role in the four spheres in which nurses are politically active: the workplace, government, professional organizations, and the community. Comprehensive coverage of healthcare policies and politics provides a broader understanding of nursing leadership and

political activism, as well as complex business and financial issues. Key Points at the end of chapters helps you review important, need-to-know lesson content. Taking Action essays include personal accounts of how nurses have participated in politics and what they have accomplished. Expert authors make up a virtual Nursing Who's Who in healthcare policy, sharing information and personal perspectives gained in the crafting of healthcare policy. NEW! The latest information and perspectives are provided by nursing leaders who influenced health care reform, including the Affordable Care Act. NEW! Added information on medical marijuana presents both sides of this ongoing debate. NEW! More information on health care policy and the aging population covers the most up-to-date information on this growing population. NEW! Expanded information on the Globalization of Nursing explores international policies and procedures related to nursing around the world. NEW! Expanded focus on media strategies details proper etiquette when speaking with the press. NEW! Expanded coverage of primary care models and issues throughout text. NEW! APRN and additional Taking Action chapters reflect the most recent industry changes. NEW! Perspectives on issues and challenges in the government sphere showcase recent strategies and complications.

Critical Care Nursing

This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles
