The Warrior Heart Practice

This monograph provides a concise, accessible snapshot of key topics in several complex variables, including the Cauchy Integral Formula, sequences of holomorphic functions, plurisubharmonic functions, the Dirichlet problem, and meromorphic functions. Based on a course given at Université de Montréal, this brief introduction covers areas of contemporary importance that are not mentioned in most treatments of the subject, such as modular forms, which are essential for Wiles' theorem and the unification of quantum theory and general relativity. Also covered is the Riemann manifold of a function, which generalizes the Riemann surface of a function of a single complex variable and is a topic that is well-known in one complex variable, but rarely treated in several variables. Many details, which are intentionally left out, as well as many theorems are stated as problems, providing students with carefully structured instructive exercises. Prerequisites for use of

this book are functions of one complex variable, functions of several real variables, and topology, all at the undergraduate level. Lectures on Several Complex Variables will be of interest to advanced undergraduate and beginning undergraduate students, as well as mathematical researchers and professors.

'Ageing, Corporeality and Embodiment' outlines and develops an argument about the emergence of a 'new ageing' during the second half of the twentieth century and its realisation through the processes of 'embodiment'. The authors argue that

ageing as a unitary social process and agedness as a distinct social location have lost much of their purchase on the social imagination. Instead, this work asserts that later life has become as much a field for 'not becoming old' as of 'old age'. The volume locates the origins of this transformation in the cultural ferment of the 1960s, when new forms of embodiment concerned with identity and the care of the self arose as mass phenomena. Over time, these new forms of embodiment have been extended, changing the traditional relationship between body, age and society by making struggles over the care of the self central to the cultures of later life.

Knuckleheads in the News

A revolutionary process based on the four chambers of the heart and rooted in Toltec wisdom that brings emotional clarity, healing, and freedom The Warrior Heart Practice is a powerful new method to reconnect with our sense of authenticity and inner-knowing and realign with our true nature. Author of the bestselling book Warrior Goddess Training, HeatherAsh Amara has trained extensively in the Toltec tradition under the tutelage of don Miguel Ruiz, author of The Four Agreements. The Warrior Heart Practice is a revolutionary system based on the four chambered structure of the human heart. Walking through each of the four chambers—Feeling, Story, Truth, and Intent—readers learn to take stock of their current emotional and mental state and reframe their situation in a new healing light. The process begins in the Feeling chamber as readers accept the emotions they are currently experiencing without fighting or judging them. It then continues into the next chamber as readers witness the Story that they are telling themselves. In the Truth chamber, they learn to thoughtfully and objectively evaluate the reality of the situation. In the final chamber, they learn to define and focus their Intent. The last phase of the practice is the most profound—taking the knowledge they have gathered from the four chambers, readers then walk backwards through each of the four chambers, refocusing their Intent, Truth, Story, and Feelings based on what they've learned during the process. The Warrior Heart Practice leads to deep insights as readers learn to step outside of their preconceptions to realign with their true purposes and goals.
