Teaching Stephen King critically examines the works of Stephen King and several ways King can be incorporated into the high school and college classroom. The section on Variations on Horror Tropes includes chapters on the vampire, the werewolf, the undead monster, and the ghost. The section on Real Life Horror includes chapters on King's school

The Rover

One morning in 2010, four teenage boys in a small Illinois town went to work in a grain bin--one of those towering silver cylinders that contain corn and dominate the midwestern landscape. But something went terribly wrong. By day's end, some would be alive. Others would not. A close-knit community would be devastated, forced to endure. This gripping true story centers on what happened to one courageous and flawed young man who survived, and how his life quickly spiraled out of control in the next two years. It is a story about love, unbreakable friendship, and "king" corn. "There are some forty-five thousand items in the average American supermarket and more than a quarter of them now contain corn," writes Michael Pollan in *The Omnivore's Dilemma*. But as international dependence on the highly subsidized crop for cattle feed, corn syrup and ethanol has

surged-so have deaths by corn. Based on three years of reporting and interviews with the people involved and thousands of pages of court documents, transcripts, police reports, journalist Erika Hayasaki brings to life (in narrative nonfiction-style) this world of people who risk and sometimes lose their lives for this powerful commodity. Hayasaki, a former national correspondent for the Los Angeles Times, is the author of *The Death Class: A True Story About Life* (Simon and Schuster 2014), as well as the Kindle Single, *Dead or Alive* (2012). She is an assistant professor in the Literary Journalism Program at the University of California, Irvine, and a regular contributor to Newsweek and The Atlantic. --Provided by publisher.
