furniture is used, from the office and domestic interiors to retail and exhibition space; look at types of furniture, whether off-the-shelf or bespoke; and explore the new vogue for recycling and vintage. Later chapters examine both traditional materials such as wood and the more unusual such as stone and glass, while also explaining new methods of manufacture - such as Computer Numerical Controlled and Selected Laser Sintering. The final chapter looks at how a design is developed, the site surveyed, prototypes made and specifications and schedules drawn up. Furniture for Interior Design is a detailed, highly illustrated guide to specifying and placing existing manufactured furniture, but also shows the reader how to design, detail, and commission batch-produced furniture or one-off, site-specific pieces.

This book aims to show where nanotechnology is now - transitioning to complex systems and fundamentally new products - and communicates the societal promise of nanotechnology to specialists and the public. Most of what has already made it into the marketplace is in the form of "First Generation" products, passive nanostructures with steady behaviour. Many companies have "Second Generation" products, active nanostructures with changing behaviour during use, and embryonic "Third Generation" products, including 3-dimensional nanosystems. Concepts for "Fourth Generation" products, including heterogeneous molecular nanosystems, are only in research."

## **Meet Me at the Pier Head**

## **Biological Methylation and Drug Design**

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and

medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methylations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

The book is targeted at all scientists interested in protein research.

## **South Asia at a Crossroads**

Neuroscientists found that chronic stress and cortisol can trigger long-term changes in brain structure and connectivity in individuals and emphasize the importance of reducing stressful factors in one's daily life. Early exposure to stressful events can make a person more vulnerable to anxiety and other mood disorders later in their lifetime. Those who take active steps to reduce their stress through various means such as physical activity or therapy can reduce the negative long-term effects on the brain. *Chronic Stress and Its Effect on Brain Structure and Connectivity* is an essential reference source that presents current information on chronic stress management, the impact of mass media coverage on the human mind, and the effects of post-traumatic stress. Featuring research on topics such as the neurophysiological basis of moods, trauma, quantum cognition, mental health, therapy, and neurobiology, this book is ideally designed for mental health professionals, neuroscientists, neurologists, psychiatrists, researchers, and therapists.

Judy Nunn's exciting new novel, a no.1 bestseller, is inspired by a true wartime

story that has remained a well-kept secret for over seventy years. It seems to have happened overnight, Val thought . How extraordinary. We've become a khaki town. It's March 1942. Singapore has fallen. Darwin has been bombed. Australia is on the brink of being invaded by the Imperial Japanese Forces. And Val Callahan, publican of The Brown's Bar in Townsville, could not be happier as she contemplates the fortune she's making from lonely, thirsty soldiers. Overnight the small Queensland city is transformed into the transport hub for 70,000 American and Australian soldiers destined for combat in the South Pacific. Barbed wire and gun emplacements cover the beaches. Historic buildings are commandeered. And the dance halls are in full swing with jazz, jitterbug and jive. The Australian troops begrudge the confident, well-fed 'Yanks' who have taken over their town and their women. There's growing conflict, too, within the American ranks, because black GIs are enjoying the absence of segregation. And the white GIs don't like it. As racial violence explodes through the ranks of the military, a young United States Congressman, Lyndon Baines Johnson, is sent to Townsville by his president to investigate. 'Keep a goddamned lid on it, Lyndon,' he is told, 'lest it explode in our faces '

Jalil Muntaqim is a former member of the Black Panther Party and the Black Liberation Army. For over forty years, Jalil has been a political prisoner, and one of the New York Three (NY3), in retaliation for his political activism. *Escaping the Prism Fade to Black* is a collection of Jalil's poetry and essays, written from behind the bars of Attica prison. Combining the personal and the political, these texts afford readers with a rare opportunity to get to know a man who has spent most of his life-over forty years-behind bars for his involvement in the Black Liberation Movement of the 1960s and early 1970s. Jalil's poetry deals with a range of themes-spirituality, history, and the struggle for justice; depression, humor, and sexual desire; the pain and loneliness of imprisonment, the ongoing racist oppression of New Afrikan people in the United States, and the need to find meaning in one's life. At the same time, his political essays show him to be as eager as ever to intervene in and grapple with the events of today, always with an eye to concretely improving the lives of the oppressed. *Escaping the Prism Fade to Black* also includes an extensive examination of the U.S. government's war against the Black Liberation Army in general, and Jalil and the New York Three in particular, by renowned scholar-activist Ward Churchill. In this highly detailed essay, "The Other Kind: On the Integrity, Consistency, and Humanity of Jalil Abdul Muntaqim," Churchill traces this story from the FBI's murderous COINTELPRO repression of the Black Panther Party, through the NEWKILL operation which led to the NY3's incarceration, to the more recent Phoenix Taskforce which orchestrated the re-prosecution of Jalil and other veteran Black activists, in the case of the San Francisco 8. With illustrations by revolutionary prisoner-artists Zolo Agona Azania and Kevin "Rashid" Johnson, as well as various outside artist-activists.

## **Fixing Dad**

A remarkable debut mystery from the award-winning author of the 2003 St. Martin's Press/Private Eye Writers of America Prize for Best First Private Eye Novel. Michael Koryta's *Tonight I Said Goodbye* marks the emergence of a stunning new

voice in crime fiction. With its edge-of-your-seat pacing, finely drawn characters, and rock-solid prose, *Tonight I Said Goodbye* would seem to be the work of a grizzled pro; the fact that the author is just twenty-one years old makes it all the more amazing. Investigator Wayne Weston is found dead of an apparent suicide in his home in an upscale Cleveland suburb, and his wife and six-year-old daughter are missing. Weston's father insists that private investigators Lincoln Perry and Joe Pritchard take the case to exonerate his son and find his granddaughter and daughter-in-law. As they begin to work they discover there is much more to the situation than has been described in the prevalent media reports. There are rumors of gambling debts and extortion, and a group of Russians with ties to organized crime who don't appreciate being investigated--a point they make clear with baseball bats. With some assistance from newspaper reporter Amy Ambrose, Perry and Pritchard believe they are making swift progress. But then they are warned off the investigation by a millionaire real estate tycoon and the FBI. Just when they feel they are closing in on a possible source of answers, another murder forces them to change direction in the case. Perry travels to a resort town in South Carolina and there he finds more than one game being played, and all of them are deadly. The stakes quickly become very personal for Perry, and it's clear that there will be no walking away from this case. In a debut that has already garnered praise from some of today's top writers, Michael Koryta immediately establishes himself as a standard bearer for the next generation of crime writers. *Tonight I Said Goodbye* is a 2005 Edgar Award Nominee for Best First Novel.

Many years have now passed since the greatest period of European dominance by any English football club came to an end. Between 1977 and 1984, Liverpool won the European Cup an unprecedented four times and established themselves as the number-one team in Europe. It was during the successful European Cup campaigns of 1981 and 1984 that the unlikely figure of Alan Kennedy came to dominate the headlines. Folk-hero left-back Alan Kennedy - nicknamed 'Barney Rubble' by fans after *The Flintstones* character due to his straightforward, no-frills approach to the game - scored the winning goal in the 1981 European Cup final against Real Madrid, as well as the nerve-twanging winning shoot-out penalty against AS Roma in 1984, a feat which secured his position in European football history. *Kennedy's Way* examines Kennedy's footballing career under manager Bob Paisley (and, later, under Joe Fagan) and provides a retrospective account of Liverpool's dominance during those years. Drawing on Kennedy's memories of the period, as well as those of other players and backroom staff involved with the Reds at that time, it is an

irreverent, revealing account of the dressing-room culture at the club while it was at the height of its powers. The book concludes with reflections on Kennedy's post-playing life and on the trajectory of Liverpool since the Heysel and Hillsborough tragedies, in 1985 and 1989 respectively, right up to recent events at the club, including the exit of Gerard Houllier and the team's dramatic return to the pinnacle of European club football under new manager Rafael Benitez.
