specialized directory created from the database, focusing on funding programs in the arts, humanities, and social sciences. The only directory of its kind to include all 50 states' and several Canadian provinces' arts/humanities councils' programs, this comprehensive 11th edition contains updates on over 3,400 current funding programs and features 200 new grant programs. Also debuting are descriptions of recently awarded grants; a list of World Wide Web sites for sponsoring organizations; and an enhanced subject index with cross-references to aid searching by subject area. The vast scope of programs listed in the Directory of Grants in the Humanities 1997/98 fund cultural outreach programs, research, travel, internships, fellowships, dissertation support, performances, exhibitions, publishing awards, and performance prizes. Funding programs are provided for such humanities disciplines as literature, language, history, anthropology, architecture, philosophy, and psychology. Fine and performing arts programs include painting, dance, photography, sculpture, and music.

Annual Report

There is a small and growing literature that explores the impact of digitization in a variety of contexts, but its economic consequences, surprisingly, remain poorly understood. This volume aims to set the agenda for research in the economics of digitization, with each chapter identifying a promising area of research. Economics

of Digitization identifies urgent topics with research already underway that warrant further exploration from economists. In addition to the growing importance of digitization itself, digital technologies have some features that suggest that many well-studied economic models may not apply and, indeed, so many aspects of the digital economy throw normal economics in a loop. Economics of Digitization will be one of the first to focus on the economic implications of digitization and to bring together leading scholars in the economics of digitization to explore emerging research.

Managerial Economics with Applications

Organizations, governments, and corporations are all concerned with distributing their goods and services to those who need them most, consequently benefiting in the process. Only by carefully considering the interrelated nature of social systems can organizations achieve the success they strive for. Economics: Concepts, Methodologies, Tools, and Applications explores the interactions between market agents and their impact on global prosperity. Incorporating both theoretical background and advanced concepts in the discipline, this multi-volume reference is intended for policymakers, economists, business leaders, governmental and non-governmental organizations, and students of economic theory.
