The English Catalogue of Books

CRC Handbook of Tables for Applied Engineering Science

New tables in this edition cover lasers, radiation, cryogenics, ultra-sonics, semi-conductors, high-vacuum techniques, eutectic alloys, and organic and inorganic surface coating. Another major addition is expansion of the sections on engineering materials and composites, with detailed indexing by name, class and usage. The special Index of Properties

allows ready comparisons with respect to single property, whether physical, chemical, electrical, radiant, mechanical, or thermal. The user of this book is assisted by a comprehensive index, by cross references and by numerically keyed subject headings at the top of each page. Each table is self-explanatory, with units, abbreviations, and symbols clearly defined and tabular material subdivided for easy reading.
