The Copper Handbook

Every day, billions of photographs, news stories, songs, X-rays, TV shows, phone calls, and emails are being scattered around the world as sequences of zeroes and ones: bits. We can't escape this explosion of digital information and few of us want to-the benefits are too seductive. The technology has enabled unprecedented innovation, collaboration, entertainment, and democratic participation. But the same engineering marvels are shattering centuries-old assumptions about privacy, identity, free expression, and personal control as more and more details of our lives are captured as digital data. Can you control who sees all that personal information about you? Can email be truly confidential, when nothing seems to be private? Shouldn't the Internet be censored the way radio and TV are? is it really a federal crime to download music? When you use Google or Yahoo! to search for something, how do they decide which sites to show you? Do you still have free speech in the digital world? Do you have a voice in shaping government or corporate policies about any of this? Blown to Bits offers provocative answers to these questions and tells intriguing real-life stories. This book is a wake-up call To The human consequences of the digital explosion.

News and Views

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Bulletin

This second edition of a well-received text, with 20 new chapters, presents a coherent and unified repository of recommender systems' major concepts, theories, methodologies, trends, and challenges. A variety of real-world applications and detailed case studies are included. In addition to wholesale revision of the existing chapters, this edition includes new topics including: decision making and recommender systems, reciprocal recommender systems, recommender systems in social networks, mobile recommender systems, explanations for recommender systems, music recommender systems, cross-domain recommendations, privacy in recommender systems, and semantic-based recommender systems. This multi-disciplinary handbook involves world-wide experts from diverse fields such as artificial intelligence, human-computer interaction, information retrieval, data mining, mathematics, statistics, adaptive user interfaces, decision support systems, psychology, marketing, and consumer behavior. Theoreticians and practitioners from these fields will find this reference to be an invaluable source of ideas, methods and techniques for developing more efficient, cost-effective and accurate recommender systems.

The Manual of Statistics

Bulletin (1901-195)

Drawing from his extensive business management experience, Pradip Chand turns traditional wisdon on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in todays high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Blown to Bits

Discover a playful new take on Middle Eastern cuisine with more than 100 fresh, flavorful recipes. "Finally! Eden Grinshpan is letting us in on her secrets of her healthful and deliriously delicious cooking. Giant

flavors, pops of color everywhere and dishes you'll crave forever. It's the Eden way!"—Bobby Flay NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY DELISH Eden Grinshpan's accessible cooking is full of bright tastes and textures that reflect her Israeli heritage and laid-back but thoughtful style. In Eating Out Loud, Eden introduces readers to a whirlwind of exciting flavors, mixing and matching simple, traditional ingredients in new ways: roasted whole heads of broccoli topped with herbaceous yogurt and crunchy, spice-infused dukkah; a toasted pita salad full of juicy summer peaches, tomatoes, and a bevy of fresh herbs; and babka that becomes pull-apart morning buns, layered with chocolate and tahini and sticky with a salted sugar glaze, to name a few. For anyone who loves a big, boisterous spirit both on the plate and around the table, Eating Out Loud is the perfect guide to the kind of meal—full of family and friends eating with their hands, double-dipping, and letting loose—that you never want to end.
