LEXIS Brief

This 12-week study immerses readers in the Old Testament Prophets. This Disciple Fast Track is an adaptation of the original, bestselling Disciple Bible Study: Remember Who You Are. The study is ideal for busy people who want to fit an in-depth Bible study into their schedule. The study retains the familiar Disciple format with its theme word, theme verse, statement of the human condition, daily and weekly assignments, and prayer. This study examines the connection between memory and identity as the people of God. Participants will find common themes, including calls to remember, calls to repent, calls for renewal, and calls for community. In this Study Manual, there are 12 sessions on the Old Testament

Major and Minor Prophets (except Daniel). The prophets are continually calling hearers and readers back to their God and to a sense of who they are as a people "set apart." Designed to establish the historical context in which the prophets spoke for God, daily reading assignments draw also on the books of Deuteronomy through Chronicles. Readers will encounter "The Word of the Lord," with comments on Scripture and amplification of meaning, as well as "Marks of Obedient Community," which identifies beliefs, attitudes, and actions of the obeying community. "Marks" is the faith response to "Our Human Condition." Classes meet for a total of 24 weeks, studying the Prophets and the letters traditionally attributed to Paul for 12 sessions each. Preparation is manageable, with 3–5 chapters of the Bible to read each day. Minimal additional preparation is needed for the leader—just prepare handouts and follow the Leader Guide. Weekly sessions last 75 minutes. Hosts will provide 3-5 minute video insights related to the week's session. Flexible for use with small groups of 8–14, or for large groups of 15–100.

Documents, such as drawings, memos and specifications, form an essential function in the design and construction industry. Throughout the lifecycle of a built asset, starting from an initial design idea, right through to a final built form and its ongoing management, thousands, even millions of documents can be used to convey various forms of information to a range of interested parties. In many ways, therefore, the success of a design, or construction-based company, relies upon an understanding of the use of documents, as well as the technologies and techniques that are used to create them. The Digital Document provides an extensive background to the issues and technologies surrounding this very important topic. It examines a technical subject in an insightful manner that is neither intimidating nor confusing, even to the novice computer user. By introducing the subject through a series of preliminary reviews of current practices and essential

computing technologies, the reader is able to better appreciate the benefits and capabilities of a wide range of digital document types. This book explores the role of documents in a professional practice, examines the components, capabilities, viability, and use of digital documents in the design and construction industry, and identifies and explains many of the standards in use today. In order to facilitate a better understanding of digital document technologies, a number of essential reviews are provided including: - the definition and purpose of a document - how documents are typically used by design professionals - the nature of the digital document environment - the data types which make up digital documents The Digital Document is an essential reference for the architect, engineer or design professional that wants to find out more about effective communication in the digital workplace. Bruce Duyshart is an IT Project Manager with Lend Lease Corporation and specialises in the development and implementation of digital media and information management technologies on design and construction projects. He holds a Masters degree in Architecture and is also an academic associate of the Faculty of Architecture, Building and Planning at the University of Melbourne. The Former Soviet Union/Eastern European area is unique in that an entire region was hit by one external shock that profoundly affected state economies and political systems. After the collapse, municipal fiscal reform proceeded rapidly in the area. Systemic improvements in local taxation, budget formulation and implementation have taken place in the past decade at a rapid pace. Local governments in these regions have demonstrated important advances in program/performance budgeting and medium-term expenditure planning. Innovative reforms also are evident in financial design and planning of particular programs, such as education and health.The results of "fast track" fiscal reforms in local governments can be discerned from the chapters of this timely book that cover LGI research on: Armenia, Bulgaria, Hungary, Kyrgyzstan, and Romania. The case studies focus on such core local financial management topics as: revenue and financing (e.g. property management), pricing public services (e.g. educational textbook fees), and budgeting for results.
