Long before postmodern or deconstructionist ideas became current, Simone Weil was concerned with recognizing the absence of consistency and the continual

presence of reversals and contradictions in life. She was someone for whom the task of clarifying her perceptions of reality and meaning was an ongoing one. She challenged contemporary views on such complex issues as human nature, good and evil, divinity and truth. Weil's work offers a voice for those segments of society that are generally under-represented, misrepresented or totally silent in conventional historical and philosophical writings. In this introduction to Simone Weil's ideas, and the political and intellectual circumstances of her work, the authors make Weil's complex and at times elusive ideas accessible to readers. They delineate how her ideas evolved, and provide compelling excerpts from her writings to let her speak for herself. In addition, the authors provide their own interpretation of Weil's work.

Fiat's first agricultural tractor was presented to the civil and military authorities of Turin in 1918 and marketed the following year by the Federation of Agricultural Consortia. This book uses original photographic documentation to illustrate the origins and development of the company's agricultural products, tackling the technical and human aspects of a story that has seen the introduction of over 500 models since 1918. This is the first comprehensive study of the Turin-based firm's history in the agricultural sector. This updated edition includes all the new Holland new series presented from 2008 up to 2011.
