Our mission: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, "I'm just not good at math!" For decades, this attitude has trickled down from parents to their kids, and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.

## **Algebra for the New Sat**

Teach basic math skills like negative numbers, percentages, and decimals using word problems! Your students' reading skills will be strengthened as they learn basic math operations and critical thinking skills. The word problems included in this book are interesting enough to hold student attention, yet challenging enough to strengthen math skills. This book is designed to be completed by the student with little or no help from a parent or teacher which makes it a great resource for use at home or school.

Algebra is one of the essential and important parts of SAT. It also help students as the big first step to comprehend the other parts of SAT like Geometry. When we start to write this book, we thought that we need to cover the biggest part of SAT which is Algebra. Algebra for The New SAT is a developmental practice questions text for all students who are getting ready for SAT. It uses 1111 all type of SAT practice questions about 40 SAT topics includes the new SAT topics to develop and improve students' practice skills. It has 12 questions per test and there are two tests for most of the topics. So students have enough number of different type and quality questions to practice and get ready for SAT. Algebra for The New SAT functions as a SAT practice questions text but also serves as a teacher resource for students and teachers. This book is one of the first books includes the new SAT topics and all type of questions about them which did not publish before. It also have 1111 questions which is more than most of the math books have. So this book is enough for students and teachers as one of the great resource to be used for years. We made very good research and worked on each question of this book very carefully. We did our best to prepare the best quality and closest questions to SAT with all types. I hope that this book helps all students to get ready for SAT and teachers to serve as one of the best resources.
