The 9th edition of the World Directory of Crystallographers and of Other Scientists Employing Crystallographic Methods, which contains 7907 entries embracing 72 countries, differs considerably from the 8th edition, published in 1990. The content has been updated, and the methods used to acquire the information presented and to produce this new edition of the Directory have involved the latest advances in technology. The Directory is now also available as a regularly updated electronic database, accessible via e-mail, Telnet, Gopher, World-Wide Web, and Mosaic. Full details are given in an Appendix to the printed edition.

General Electric Review

As editor Kenneth E. Hendrickson, III, notes in his introduction: "Since the end of

the nineteenth-century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan.” In *The Encyclopedia of the Industrial Revolution in World History* contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. *The Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the “aerospace industry” to “zaibatsu.” Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men and women, families, and organizations. They also cover legal developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross-references and a brief list of suggested readings to alert readers to more detailed information. *The Encyclopedia of the Industrial Revolution in World History* includes over 300 illustrations, as well as artfully selected, extended quotations from key primary sources, from Thomas Malthus’ “*Essay on the Principal of Population*” to Arthur Young’s look at Birmingham, England in 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale.

Experiential marketing has become an indispensable tool for all types of businesses across multiple sectors. This book provides an all-encompassing, practical, and conceptual map of contemporary experiential case studies, which together offer insights into this exciting approach to customer experience. Experiential Marketing incorporates 36 international case studies from 12 key sectors, from technology, consumer goods, and B2B to luxury, events, and tourism sectors. With a selection of case studies from leading brands, such as Coca-Cola, Nutella, Chanel, NASA, The New York Times, Pfizer, and Amtrak, the reader will learn and practice the experiential marketing tools and strategies through these examples. Expert testimonials, practical applied exercises, and the author’s online videos provide both theoretical foundations and concrete application. This is a must-read for advanced undergraduate and postgraduate Marketing and Customer

Experience students and an excellent teaching resource. It should also be of great use to practitioners – particularly those studying for professional qualifications – who are interested in learning experiential marketing strategies and developing knowledge about the way big brands in different sectors are designing the customer experience online and offline. Online material includes lecture slides, a test bank of questions, an instructor’s manual, and explanatory videos.
