The Geographical Magazine

Selected Papers: Population and settlement geography; political and historical geography

The Geographical Journal

Geography, Topography, Landscape

Gilbert F. White is the preeminent geographer of natural resources, hazards, and the human environment. During fifty years of professional work as civil servant, scientist, and educator, he authored numerous books and papers. This volume is the first collection of White's work, spanning his interests and career from 1934 to 1984. Individual introductions by the editors place each selection in historical perspective and assay its significance. With the companion volume, Theme from the Work of Gilbert F. White, White's writings, and the work that he inspired, are now readily accessible to all who share his concern for the stewardship of the earth.

Oswaal ICSE Sample Question Papers Class 10 Geography (For March 2020 Exam)

Catalogue of the School Bulletin [and New York State Educational Journal] Publications

A Biblical Cyclopaedia, Or, Dictionary of Eastern Antiquities, Geography, Natural History, Sacred Annals and Biography, Theology and Biblical Literature, Illustrative of the Old and New Testaments

By introducing a multifaceted approach to epic geography, the editors of the volume wish to provide a critical assessment of spatial perception, of its repercussions on shaping narrative as well as of its discursive traits and cultural contexts. Taking the genre-specific boundaries of Greco-Roman epic poetry as a case in point, a team of international scholars examines issues that lie at the heart of modern criticism on human geography. Modern and ancient discourse on space representations revolves around the nation-shaping force of geography, the gendered dynamics of landscapes, the topography of isolation and integration, the politics of imperialism, globalization, environmentalism as well as the power of language and narrative to turn space into place. One of the major aims of the volume is to show that the world of the Classics is not just the origin, but the essence of current debates on spatial constructions and reconstructions.

The Scottish Geographical Magazine

A System of Geography, Popular and Scientific

A Companion to Environmental Geography is the first book to comprehensively and systematically map the research frontier of 'human-environment geography' in an accessible and comprehensive way. Cross-cuts several areas of a discipline which has traditionally been seen as divided; presenting work by human and physical geographers in the same volume Presents both the current 'state of the art' research and charts future possibilities for the discipline Extends the term 'environmental geography' beyond its 'traditional' meanings to include new work on nature and environment by human and physical geographers - not just hazards, resources, and conservation geographers Contains essays from an outstanding group of international contributors from among established scholars and rising stars in geography

The Common-school Geography

The Urban Geography Reader

-Geography. The English cyclopædia, conducted by C. Knight
