Helping students grasp the "why" of algebra through patient explanations, Hirsch and Goodman gradually build students' confidence without sacrificing rigor. To help students move beyond the "how" of algebra (computational proficiency) to the "why" (conceptual understanding), the authors introduce topics at an elementary level and return to them at increasing levels of complexity. Their gradual introduction of concepts, rules, and definitions through a wealth of illustrative examples--both numerical and algebraic--helps students compare and contrast related ideas and understand the sometimes-subtle distinctions among a wide variety of situations. This author team carefully prepares students to succeed in higher level mathematics.

Market / Audience In August 2011 a dramatically new format was introduced for the GRE. McGraw-Hill's GRE was one of the first guides to provide complete coverage of the new test features. The revised test is partially computer-adaptive (the old one had no computer-adaptive functions), and it has several all-new question types. Thousands of graduate programs require the GRE for admission. In addition, more than 500 business schools worldwide now also accept GRE scores for admission to MBA programs. The list includes many top-ranked schools such as Harvard, IE, INSEAD, MIT Sloan and Stanford. In 2010, the GRE General Test was taken by about 675,000 candidates. Test volume outside the United States increased 13% in 2010. The number of GRE takers outside the US in 2008 was approximately 172,000, with the largest numbers in China (52,000) and India (55,000). Dulan (East Lansing, MI) is the founder and president of Advantage Education, Inc., which offers live test-prep classes at high schools and colleges throughout Michigan, Wisconsin, Ohio, and Colorado, as well as distance-learning programs over the Internet.
