Revealing a bestiary of hybrids from the techno-crazed future and the mythological past, this surreal short story collection takes imaginative leaps through a science fiction influenced landscape. Reflecting a cinematic feel, young couples reach defining stages in their relationships as zombies fall in love, a stalker tracks a young woman through time only to discover he's related to her, and a young man battles Godzilla in order to prove a point to his girlfriend. Blurring the boundaries between reality and hallucination—from robotic insects and in-growing cutlery to a woman impregnated with 37 embryos—these fantastical tales offer a world where the body is fluid, the spirit is mechanized, and the beasts know more about humanity than the humans do.

Instruction Manual for Swallowing

The book gives clarity to your confusion, provides you with a new concept of self-esteem and confidence, and removes the veil of the shadow that keeps humans from becoming their optimal self. Part 1 also explains why life is half backwards too!

The overall structure of the book bridges the gap between the tangible science humans think they know and the intangible realities they ignore, fear, and deny as real. The book gives you the conversation you always wanted but never knew you needed. If you only own one book this is certainly the one to have, and if you only have room for one more book - make room for this one. Consider the book the base foundation material that the personal development industry must have to completely transform the "Juice Factory" method into a self-sustainable and self-maintainable process that lasts and never fails. YES - Never Fails! "JUICE FACTORY" - the high energy hype that humans go along to get along but provides no long lasting results, so we have to come back for more to get "JUICED" up with energy again. Avoid these entertaining salesmen who only want your repeat business!"

At Last! A Beginner's Guide to Feline Technology Scratch marks on your furniture. Dead mice on your doorstep. Stray hairs all over your clothes. It's enough to make you cry out, "Why doesn't my cat have an owner's manual?" And now—finally!—she does. Through step-by-step instructions and helpful schematic diagrams, The Cat Owner's Manual explores hundreds of frequently asked questions: Which breeds interface best with dogs? How can I maintain a quality exterior finish? And why does my model always drink from the bathtub? Whatever your concerns, you'll find the answers here—courtesy of celebrated veterinarian Dr. David Brunner and acclaimed author Sam Stall. Together, they provide plenty of useful advice for both new and experienced cat owners.

Game Programming in C++: Start to Finish takes current game programming information and filters it down to a practical level for aspiring game developers. The book is written for the hobbyist interested in making their own games, beginning Independent developers interested in starting their own small game company, students, or software developers considering making a transition into the game industry. Throughout the book, programmers work through exercises to build their own complete 3D asteroid game called SuperAsteroidArena. Beginning with engine creation and 3D programming with SDL and OpenGL, the book then moves to animation effects, audio, collision detection, networking, and finalizing the game. A variety of tools are used throughout, including VisualStudio.NET and OpenGL, Paintshop Pro, 3DS max, and the Audacity sound tool. The book does assume an understanding of C/C++ experience and focuses on programming on the Windows platform. The companion CD-ROM includes libraries and tools, including the SDL libraries, trial versions of Paintshop Pro Plus, Audacity, 3D Studio Max 7, InnoSetup, the source code from the book, and the complete game from the book.

What is the point? What is the purpose of life? Why must I suffer the stress, and anxiety that comes with it? Why does it all seem so hard and so unfair? If you have asked yourself any of these questions, then you have found the book you are looking for. There are answers to all of these questions and Anderson Silver has compiled teachings from Stoicism and other schools of thought in Your User's Manual. This refreshing collection not only gives the reader much sought after answers, but also provides the tools for finding purpose, and living an anxiety-free life in the modern world. Meant as a light read that the reader can come back to and meditate on periodically, Anderson has done a wonderful job of condensing fundamental teachings, making Your User's Manual a straightforward read in answering life's most pressing questions and recognizing what is truly important.

Golf Instruction Manual

A sourcebook of historical written texts, video documentation, and working programs that form the foundation of new

media. This reader collects the texts, videos, and computer programs--many of them now almost impossible to find--that chronicle the history and form the foundation of the still-emerging field of new media. General introductions by Janet Murray and Lev Manovich, along with short introductions to each of the texts, place the works in their historical context and explain their significance. The texts were originally published between World War II--when digital computing, cybernetic feedback, and early notions of hypertext and the Internet first appeared--and the emergence of the World Wide Web--when they entered the mainstream of public life. The texts are by computer scientists, artists, architects, literary writers, interface designers, cultural critics, and individuals working across disciplines. The contributors include (chronologically) Jorge Luis Borges, Vannevar Bush, Alan Turing, Ivan Sutherland, William S. Burroughs, Ted Nelson, Italo Calvino, Marshall McLuhan, Jean Baudrillard, Nicholas Negroponte, Alan Kay, Bill Viola, Sherry Turkle, Richard Stallman, Brenda Laurel, Langdon Winner, Robert Coover, and Tim Berners-Lee. The CD accompanying the book contains examples of early games, digital art, independent literary efforts, software created at universities, and home-computer commercial software. Also on the CD is digitized video, documenting new media programs and artwork for which no operational version exists. One example is a video record of Douglas Engelbart's first presentation of the mouse, word processor, hyperlink, computer-supported cooperative work, video conferencing, and the dividing up of the screen we now call non-overlapping windows; another is documentation of Lynn Hershman's Lorna, the first interactive video art installation.
