The Federal Aviation Administration (FAA) administers oral as well as written exams for pilot certification and flight review. These exam guides teach applicants not only what to expect, but also how to exhibit subject mastery and confidence under the scrutiny of the FAA Examiner. In this series, the most consistent questions asked in each exam are provided in a question-and-answer format, with information sources for further study. Applicants facing the Instrument Rating oral exams will benefit from the topics discussed and the further study materials provided in this Instrument edition, which have been updated to reflect important FAA regulatory and procedural changes, including new or updated PTS technical subject areas. The Eighth Edition contains a new chapter on the currently hot FAA topic of "scenario-based training" (SBT), written by Arlynn McMahon (author of "Train Like You Fly"). It provides insight into these more-complex questions on how to demonstrate one's grasp of the practical application of flight training. Scenario-based questions are now an integral part of FAA Oral & Practical Exams, and FAA examiners are using them more and more often.

You can choose several data access frameworks when building Java enterprise applications that work with relational databases. But what about big data? This hands-on introduction shows you how Spring Data makes it relatively easy to build applications across a wide range of new data access technologies such as NoSQL and Hadoop. Through several sample projects, you'll learn how Spring Data provides a consistent programming model that retains NoSQL-specific features and capabilities, and helps you develop Hadoop applications across a wide range of use-cases such as data analysis, event stream processing, and workflow. You'll also discover the features Spring Data adds to Spring's existing JPA and JDBC support for writing RDBMS-based data access layers. Learn about Spring's template helper classes to simplify the use of database-specific functionality Explore Spring Data's repository abstraction and advanced query functionality Use Spring Data with Redis (key/value store), HBase (column-family), MongoDB (document database), and Neo4j (graph database) Discover the GemFire distributed data grid solution Export Spring Data JPA-managed entities to the Web as RESTful web services Simplify the development of HBase applications, using a lightweight object-mapping framework Build example big-data pipelines with Spring Batch and Spring Integration

The Art of Assassin's Creed Unity

This book, comprising the Instructional Course Lectures delivered at the 17th ESSKA Congress in Barcelona in 2016, provides an excellent update on current scientific and clinical knowledge in the field of Orthopaedics and Sports Traumatology. A variety of interesting and controversial topics relating to the shoulder, elbow, hip, knee, and foot are addressed, all of which are very relevant to the daily practice of orthopaedic surgeons. The coverage includes a number of open questions, such as: How should complications be handled during rotator cuff surgery? What errors may occur during anterior cruciate ligament surgery? How much attention must be paid to meniscal root tears? Do we now understand the pathology of osteoarthritis sufficiently well and do we always identify the most successful treatment for our patients? All of

the contributions are written by well-known experts from across the world. The presentations will enable the reader to gain a better understanding of pathologies and may permit more individualized treatment of patients. The book will be of interest to clinicians and researchers alike.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

On a chilly autumn night in New York, the lives of two men born decades and continents apart collide when Max Redmond is found bludgeoned in his Washington Heights apartment. While investigating the crime, Detective Tolya Kurchenko comes across the dead man's diaries, written by Redmond over four decades. He hopes the diaries will lead him to the killer. In fact, they help him sort out the complexities of his own identity. Spanning 65 years and three continents — from Hitler's Europe to the decaying Soviet Empire of the 1970s, and revealing the little-known history of Sosúa, a Jewish settlement in the jungles of the Dominican Republic — A. J. Sidransky's debut novel leads us into worlds long gone, and the lives of people still touched by those memories.

The Art and Technique of Digital Color Correction

The Internet of Toys (IoToys) is a developing market within our Internet of Things (IoT) ecosystem. This book examines the rise of internet-connected toys and aims to anticipate the opportunities and risks of IoToys before their widespread diffusion. Contributors to this volume each provide a critical analysis of the design, production, regulation, representation and consumption of internet-connected toys. In order to address the theoretical, methodological and policy questions that arise from the study of these new playthings, and contextualise the diverse opportunities and challenges that IoToys pose to educators, families and children themselves, the chapters engage with notions of mediatization, datafication, robotification, connected and post-digital play. This timely engagement with a key transformation in children’s play will appeal to all readers interested in understanding the social uses and consequences of IoToys, and primarily to researchers and students in children and media, early childhood studies, media and communications, sociology, education, social psychology, law and design.

Technology for Physical Educators, Health Educators, and Coaches

A wide variety of technology is available to physical educators, health teachers, and coaches—but technology is only helpful if people know how to use it effectively. This text will help health and physical education teachers and coaches improve their abilities by learning to effectively use technology in the areas of instruction, assessment, management, communication, professional development, and advocacy. The effective use of technology as outlined in this book can improve student and athlete performance and assessment and motivate active and healthy lifestyles among students. An important distinction with this book is that it goes beyond simply discussing the technology tools—it helps readers understand how to use technology to improve instruction. Practical examples of how to use various technological tools are included for different settings and a variety of age groups (child to adult). Readers will learn about the effective use of technology in physical education, health education, and coaching. *Technology for Physical Educators, Health Educators, and Coaches* is a practical, hands-on text that offers a number of useful tools: What Does the Research Say? sidebars that provide evidence for which technologies do and do not work in physical education, health education, and sport coaching, with accompanying explanations. Tips, examples, and interviews from seasoned professionals on various types of technology. Chapter objectives, key terms, review questions, and open-ended discussion questions, which could prove useful for online discussion boards. Instructor ancillaries, including PowerPoint presentations and learning management system (LMS)-ready quizzes for each chapter, that help instructors organize, plan, teach, and assess content effectively. Online web resource that offers a variety of tools, including additional practitioner interviews; links to websites, videos, and podcasts; sample handouts, and other activities and resources from practicing professionals. The online web resource will be updated annually to keep current with the changing technology. Social media accounts (@Tech4HPECoach) on Twitter and Facebook allow readers to further connect and share ideas. Use the hashtag #Tech4HPECoach across various social media platforms too! (The web resource is included with all new print books and some ebooks. For ebook formats that don't

provide access, the web resource is available separately.) The text is organized into six parts. Part I focuses on how technology can assist in meeting specific goals, objectives, and national standards within physical education, health education, and sport coaching. Part II covers technology for class and team management as well as communication technology, while part III explores how to leverage technology to facilitate teaching and learning, including within a traditional classroom, online, and with special populations. The authors address how to use technology for assessment in part IV, and part V delves into how technology can benefit professional development and advocacy. In part VI, the authors detail the all-important legal and financial aspects of technology.

Weaving It Together 4

Although verbal learning offers a powerful tool, Mayer explores ways of going beyond the purely verbal. Recent advances in graphics technology and information technology have prompted new efforts to understand the potential of multimedia learning as a means of promoting human understanding. In this second edition, Mayer includes double the number of experimental comparisons, 6 new principles - signalling, segmenting, pertaining, personalization, voice and image principles. The 12 principles of multimedia instructional design have been reorganized into three sections - reducing extraneous processing, managing essential processing and fostering generative processing. Finally an indication of the maturity of the field is that the second edition highlights boundary conditions for each principle research-based constraints on when a principle is likely or not likely to apply. The boundary conditions are interpreted in terms of the cognitive theory of multimedia learning, and help to enrich theories of multimedia learning.
