FOR HERO 3+ and HERO 3 CAMERAS. This is the perfect guide book for Adventure Sports enthusiasts who want to learn how to use their GoPro HERO 3+ or HERO 3 cameras to get great videos and photos. Snowboarders, bikers, hikers, kayakers, travelers, skiers, standup paddlers, boaters and more will find valuable knowledge with the lessons in this book. With more than 100+ images, this book provides clear, step-by-step lessons to get you out there using your GoPro camera to document your adventures. This book covers everything you need to know about using your GoPro HERO 3+ or HERO 3 camera. The book teaches you: how choose your settings, tips for all of the GoPro mounts, vital photography knowledge, simple photo, video and time lapse editing techniques and how to share your first edited video and photos. Through the SIX STEPS laid out in this book, you will understand your camera and learn how to use FREE software (you probably already have!) to finally do something with your results. This book is perfect for beginners, but also provides in depth knowledge that will be useful for intermediate camera users. Written for all editions of HERO 3+ (Black and Silver Editions) and HERO 3 (Black, Silver and White Editions) cameras.

"A playful picture book guide that shows how an ordinary kid can become a superhero. As readers learn the steps to becoming a hero, they'll chuckle to see the book's protagonist bungle the process. But eventually he redeems himself--with the help of his younger-but-wiser little sister. Kristy Dempsey and Mark Fearing make a great team in this wisecracking guidebook. Both are known and respected in the picture book community, with Dempsey's *A DANCE LIKE STARLIGHT* racking up starred reviews and Caldecott buzz, and Fearing's books (*THE THREE LITTLE ALIENS AND THE BIG BAD ROBOT*, *THE BOOK THAT EATS PEOPLE*) selling strong numbers. We're excited to have them on our list."

The most important job you will ever have is being a parent. Parents usually raise their children the way they were parented, no matter how good or bad their experience. People laugh when they say, Babies dont come with an instruction manual. The Respectful Parent: A Manual for Moms and Dads may be the closest book to that much needed manual. This book is for parents whose normal children are driving them up the wall, and parents who want to improve their parenting skills while things are still going well. The Respectful Parent is written in a personal style by an author, who has over 55 years of clinical experience working with families and individuals of all ages. Dr. Deutch believes that respect between parent and child, along with a toolbox of great common sense techniques, is the key to having a cooperative, happy and productive family. Spanking, yelling, and threats may work on your child in the immediate situation, but scientific research shows that in the long term, they have many negative and sometimes catastrophic side effects. The Respectful Parent teaches how to

use positive and democratic ways to nurture children. These ideas are based on the commonsensical philosophy of Doctors Alfred Adler and Rudolph Dreikurs. Learn to use the power of encouragement, the family council, individual special time, natural and logical consequences, and simple communication techniques. Become your child's consultant rather than boss. Raise your child's self-esteem, courage, mental health, and even his or her I.Q.

Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up-to-date data on the distribution and density of species, as well as the threats to their habitats, in their ongoing attempts to conserve and monitor biodiversity. Conservation drones are low-cost, autonomous, and operator-friendly unmanned aerial vehicles that can be used for surveying, mapping, and monitoring both habitat and biodiversity. They are fast becoming a valuable complement to ground-based surveys and satellite imagery for a wide range of ecological and conservation applications. The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia. They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community. This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation.
