### **Forthcoming Books**

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, *The Power of Now* is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

ONE OF THE NEW YORK TIMES BOOK REVIEW'S 10 BEST BOOKS OF THE YEAR A major book about the future of the world, blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years, there have been five mass extinctions, when the diversity of life on earth suddenly and dramatically contracted. Scientists around the world are currently monitoring the sixth

extinction, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. This time around, the cataclysm is us. In *The Sixth Extinction*, two-time winner of the National Magazine Award and *New Yorker* writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines, accompanying many of them into the field: geologists who study deep ocean cores, botanists who follow the tree line as it climbs up the Andes, marine biologists who dive off the Great Barrier Reef. She introduces us to a dozen species, some already gone, others facing extinction, including the Panamanian golden frog, staghorn coral, the great auk, and the Sumatran rhino. Through these stories, Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up through the present day. The sixth extinction is likely to be mankind's most lasting legacy; as Kolbert observes, it compels us to rethink the fundamental question of what it means to be human.

This collection of essays by twenty-one distinguished American historians reflects on a peculiarly American way of imagining the past. At a time when history-writing has changed dramatically, the authors discuss the birth and evolution of historiography in this country, from its origins in the late nineteenth century through its present, more cosmopolitan character. In

the book's first part, concerning recent historiography, are chapters on exceptionalism, gender, economic history, social theory, race, and immigration and multiculturalism. Authors are Daniel Rodgers, Linda Kerber, Naomi Lamoreaux, Dorothy Ross, Thomas Holt, and Philip Gleason. The three American centuries are discussed in the second part, with chapters by Gordon Wood, George Fredrickson, and James Patterson. The third part is a chronological survey of non-American histories, including that of Western civilization, ancient history, the middle ages, early modern and modern Europe, Russia, and Asia. Contributors are Eugen Weber, Richard Saller, Gabrielle Spiegel, Anthony Molho, Philip Benedict, Richard Kagan, Keith Baker, Joseph Zizak, Volker Berghahn, Charles Maier, Martin Malia, and Carol Gluck. Together, these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world. Formerly writing from a conviction that America had a singular destiny, American historians have gradually come to share viewpoints of historians in other countries about which they write. The result is the virtual disappearance of what was a distinctive American voice. That voice is the subject of this book.

The New York Times bestseller *A Long Walk to Water* begins as two stories, told in alternating sections, about two eleven-year-olds in Sudan, a girl in 2008 and a boy in 1985. The girl, Nya, is fetching water from a pond that is two hours' walk from her home: she makes two trips to the pond every day. The boy, Salva, becomes one of the "lost boys" of Sudan, refugees who cover the African continent on foot as they search for their families and for a safe place to stay. Enduring every hardship from loneliness to attack by armed rebels to contact with killer lions and crocodiles, Salva is a survivor, and his story goes on to intersect with Nya's in an astonishing and moving way.

the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The book provides a new angle for the study of otherwise amply discussed discourse and interactional phenomena. The new perspective consists in addressing the interconnections between resonance, stance, represented discourse and joking in Mexican conversational discourse. In so doing, it contributes to a better understanding of the interplay between collaboration, intersubjectivity and emergence, among other relevant issues. Scholars and advanced students concerned with dialogic syntax theory, stance theory and Spanish, will find the present analysis interesting and innovative. However, the writing and methodology, based on clearly discussed and presented examples from selected conversational excerpts, including graphic representations of linguistic and discourse data, makes the analysis easy to follow also to non-specialists. The book is thus interesting to a broad circle of readers, whether they are concerned with any of the issues dealt with or with their mutual connections, whether they are specialists or not.

The history of U.S.–Latin American relations has been characterized by a complex fusion of tensions, collaboration, misperceptions, and intervention. Offering a balanced and interdisciplinary interpretation, this comprehensive reader traces the often-troubled relationship from the beginnings of the nineteenth century to the presidency of Barack Obama. Completely revised and updated, this third edition includes original essays on critically important issues such as immigration, the environment, and the Obama administration’s policy toward the region. In addition to this added policy section, another new section explores cultural issues such as tourism, soccer, and the media. The readings are framed by the editors’ opening chapter on the history of the relationship, introductory essays for each of the seven parts, and abstracts for each selection. Students who use this book will learn that U.S.–Latin American relations have been deeply influenced by dynamic, continuously evolving scholarly interpretations in both hemispheres. Sixteen years after the first edition was published, the editors are more optimistic as the hemisphere unites around trade, culture, tourism and an evolving mutual appreciation. Methodologically interdisciplinary, yet comparative and historical in organization and structure, this text will benefit all readers interested in the rich historical, social, and political “American” relationship.

Between 152 and 138 BC a series of wars from Africa to India produced a radically new geopolitical situation. In 150 Rome was confined to the western Mediterranean, and the largest state was the Seleukid empire. By 140 Rome had spread to the borders of Asia Minor and the Seleukid empire was confined to Syria. The new great power in the Middle East was Parthia, stretching from Babylonia to Baktria. These two divided the western world between them until the Arab conquests in the seventh century AD. These wars have generally been treated separately, but they were connected. The crisis began in Syria with the arrival of the pretender Alexander Balas; his example was copied by Andriskos in Macedon, formerly in Seleukid service; the reaction of Rome to defiance in Macedon, Greece and Africa produced conquest and destruction. The preoccupation of Seleukid kings with holding on to their thrones allowed Mithradates I of Parthia to conquer Iran and Babylonia, and in Judaea an insurrection was partly successful. Mithradates was able to conquer in part because his other enemy, Baktria, was preoccupied with the nomad invasions which led to the destruction of Ai Khanum. One of the reasons for the nomad success in Baktria was the siphoning off of Greek strength into India, where a major expedition in these very years briefly conquered and sacked the old Indian imperial capital of Pataliputra. In the process the great cities of Carthage, Corinth, Ai Khanum, and Pataliputra were destroyed, while Antioch and Seleukeia-on-the-Tigris were extensively damaged. John Grainger's lucid narrative shows how these seismic events, stretching from India to the Western Mediterranean,
