Small Gas Engines

Handbook of Low Carbon Concrete brings together the latest breakthroughs in the design, production, and application of low carbon concrete. In this handbook, the editors and contributors have paid extra attention to the emissions generated by coarse aggregates, emissions due to fine aggregates, and emissions due to cement, fly ash, GGBFS, and admixtures. In addition, the book provides expert coverage on emissions due to concrete batching, transport and placement, and emissions generated by typical commercially produced concretes. Includes the tools and methods for reducing the emissions of greenhouse gases Explores technologies, such as carbon capture, storage, and substitute cements Provides essential data that helps determine the unique factors involved in designing large, new green cement plants

Some Pets

"I don't master the mountain, I master speed." Coming from Bode Miller, this isn't boasting, it's just the way he lives: fast, honest, and wide open. In this candid book, the two-time Olympic medalist and champion skier shares his story, the secret of his success, and his philosophy of life. Born and raised "off the grid"-without electricity or indoor plumbing-in the cabin built by his father in the woods near Franconia, New Hampshire (pop. 850), Bode is unconventional to the core. The strong

values of his simple upbringing, where he and his family had to “invent, grow, or carry in” all the essentials have made Bode unique among today’s top sports stars. Bode’s approach to life is straightforward: “Get a plan, stick to it, and trust your instincts . . . and almost anything is possible.” And practically since birth, the iconoclastic Bode has been achieving the impossible and laying down tracks for others to follow. He revolutionized his sport by adopting new and crossover technologies, such as “shape” skis. He drives his tradition-bound European rivals to distraction, skiing and winning by instinct. His outsider status, killer smile, and outspoken yet laid-back persona have earned him a reputation as the Michael Jordan of skiing. Men’s Journal named Bode the second greatest athlete in the world. And in the 2005 season, Bode may have moved up a notch by becoming the first American to win the Overall World Cup Alpine championship in twenty-two years. In short, he is the kind of person everybody wants to know and hang out with. In a book loaded with insight, good humor, and eye-opening stories about the world of competitive skiing, Bode, as always, holds nothing back.

In the same understated, covetable style as her husband's interiors, May Vervoordt's recipes bring out the essence of fresh ingredients in simple yet exceptional dishes. Over the past twenty-five years, Axel and May Vervoordt have cultivated a reputation for excellence in the fields of art, interior design, and entertaining. In this contemporary cookbook, May shares 107 seasonal recipes for entertaining in style. With an emphasis on the essence of individual ingredients and cooking in harmony with the seasons, May—in typical Vervoordt fashion—demonstrates that simplicity is the ultimate sophistication. Her dishes are easy to prepare, original, and healthful, and still allow the home chef time to enjoy the meal with guests. Grouped by season, the recipes offer a broad selection for all occasions, from Mango and Sweet Potato Salad or Sesame-Tarragon Chicken to Chocolate Fondant Cake with Pear Sorbet. Close-ups of the recipes are complemented by lifestyle photographs offering a glimpse inside the elegant Vervoordt residence.

Deep in the bowels of Junk Moon, the finest scientists of Planet Immortal are nearing completion of Project Amphora, which aims to unlock the secret of immortality. The Project is run by the Consortium, twelve of the planet's most influential movers and shakers, but they aren't the only ones after immortality. Commander Jockey Oldcastle, a wise-cracking space pirate, has heard about the Amphora Project from a banished scientist who is convinced it will lead to the end of the world. Oldcastle sets off to find the project with Adrian Link, a timid botanist who wants only to tend to his plants on the Agricultural Plain, yet Oldcastle finds himself trying to unravel a strange mystery: It seems the Amphora Project is turning the citizens of Planet Immortal into crystal. As time runs out, it is up to Oldcastle and Link— and Link's exotic, unlikely love interest —to stop their mysterious extradimensional enemy before their world is lost forever. Hilarious, wildly inventive, and featuring a fantastical cast of mutants, quasihuman robots, intergalactic mercenaries, and two-thousand-year-old immortals, The Amphora Project is a novel that combines elements of science fiction and fantasy and transcends the boundaries of both.

The Amphora Project

"This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In Strange Country, he takes us on a journey through a very different Australia - a country that's eccentric,

puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

Fostering Algebraic Thinking with Casio Technology

Concrete and stone seem made to last forever. But the fact is they develop problems. It is not always as dramatic as the collapse of a section of the roof of the Paris Charles de Gaulle airport in 2004. Gradual changes also occur that may compromise the appearance and structural soundness of buildings constructed with these materials. These changes can be created by efflorescence, thermal stress, weathering, leakage and corrosion. This book explains how to avoid typical kinds of failure. With this in mind, it systematically analyzes cases of damage in contemporary international architecture. It also offers strategies for minimizing the risk of damage. Examples include such high-visibility structures as Finlandia Hall in Helsinki, Parco della Musica in Rome and Vontz Center for Molecular Studies in Cincinnati. In eight chapters, typical kinds of damage are explained and illustrated with examples. Beton und Stein scheinen für die Ewigkeit gemacht. Dennoch kommt es hier zu Bauschäden. Nicht immer sind sie so dramatisch wie der Deckeneinsturz im Terminal des Flughafen Paris-Roissy 2004. Es gibt auch schleichende Veränderungen, die Erscheinungsbild und Statik von Beton- oder Steingebäuden beeinträchtigen können. Dazu gehören Ausblühungen, thermische Auswirkungen, Materialunverträglichkeiten, Korrosion oder massive Krafteinwirkung. Dieses Buch zeigt, wie sich typische Schäden vermeiden lassen. Zu diesem Zweck analysiert es systematisch Schadensfälle in der zeitgenössischen internationalen Architektur. Ebenso werden Strategien vorgestellt, mit denen sich das Schadensrisiko minimieren lässt. Zu den Beispielen gehören so bekannte Bauten wie die Finlandia Hall in Helsinki, Renzo Pianos Parco della Musica in Rom oder Vontz Center for Molecular Studies in Cincinnati. In insgesamt acht Kapiteln werden typische Schäden erklärt und dann mit Beispielen illustriert.

International Trade Statistics 2015 provides a detailed overview of the latest developments in world trade, covering both merchandise and services trade as well as trade measured in value-added terms. A key developments section at the start of each chapter uses charts and maps to illustrate the most important trends. More detailed data are provided in a variety of tables covering specific aspects of world trade up to the end of 2014. A chapter on methodology explains how the data are compiled. International Trade Statistics 2015 serves as an invaluable reference tool for researchers, policymakers, and

anyone interested in international trade.

Eternal Horizon

After the collapse of communism, some thirty countries scrambled to craft democratic constitutions. Surprisingly, the constitutional model they most often chose was neither the pure parliamentary model found in most of Western Europe at the time, nor the presidential model of the Americas. Rather, it was semi-presidentialism--a rare model known more generally as the "French type." This constitutional model melded elements of pure presidentialism with those of pure parliamentarism. Specifically, semi-presidentialism combined a popularly elected head of state with a head of government responsible to a legislature. Borrowing Constitutional Designs questions the hasty adoption of semi-presidentialism by new democracies. Drawing on rich case studies of two of the most important countries for European politics in the twentieth century--Weimar Germany and the French Fifth Republic--Cindy Skach offers the first theoretically focused, and historically grounded, analysis of semi-presidentialism and democracy. She demonstrates that constitutional choice matters, because under certain conditions, semi-presidentialism structures incentives that make democratic consolidation difficult or that actually contribute to democratic collapse. She offers a new theory of constitutional design, integrating insights from law and the social sciences. In doing so, Skach challenges both democratic theory and democratic practice. This book will be welcomed not only by scholars and practitioners of constitutional law but also by those in fields such as comparative politics, European politics and history, and international and public affairs.

How to Marry a Cowboy

This book is an essential handbook for those researching their ancestry in the counties of Cornwall, Devon and Somerset and the city of Bristol. It begins with an introduction to the identity of The West Country, its geography and history over the centuries. It then guides family historians through the wealth of historical records available both online and in archives and libraries in order to add the flesh to the bones of the names of ancestors on their family trees. West Country expert Kirsty Gray highlights fascinating details that can be uncovered about the places where our ancestors lived, their occupations and the distinctive features, identity and character of the West Country itself. She provides case studies of some notable individuals from the counties as well as records of those individuals who never hit the headlines. This practical and informative guide is a must have for readers wishing to find out more about all aspects of life in this area of England.

She's been kidnapped and beaten, lives under surveillance, and can only get online—in disguise—at tourist hotspots. She's a blogger, she's a Cuban, and she's a worldwide sensation. Yoani Sánchez is an unusual dissident: no street protests, no attacks on big politicians, no calls for revolution. Rather, she produces a simple diary about what it means to live under the Castro regime: the chronic hunger and the difficulty of shopping; the art of repairing ancient appliances; and the struggles of living under a propaganda machine that pushes deep into public and private life. For these simple acts of truth-telling her life is one of constant threat. But she continues on, refusing to be silenced—a living response to all who have ceased to believe in a future for Cuba.
