This report evaluates the IMF's economic research activities and whether they contribute successfully to the objectives of the organisation. It considers five basic issues central to the research process which relate to: organisational structure, culture, incentives and accountability, resource allocation and dissemination. The report concludes that there is room for improvement, and makes a number of recommendations which include setting priorities for research activities, and improving incentives and accountability in the research process.

U.S. Forest Service Research Note

When Ellen Mandel's friend underwent a double mastectomy for stage-two breast cancer, she needed all the support she could get. Ellen, ever caring, answered the call. Some send flowers to sick friends. Others (Ellen included) send teddy bears. But no one needs as many teddy bears as Ellen delivered, no matter how ridiculous their costumes might be. Realizing her friend was in danger of disappearing beneath an avalanche of plush toys, Ellen switched tactics and began sending funny stories instead. A cross between a clumsy Calamity Jane (yes, you read that right) and Gracie Allen, Ellen had plenty of material for her hilarious, life-affirming vignettes. She wrote of her wonderful (if slightly crazy) family and the trials of growing up as a young baby boomer. She sent reports on the antics of her grandchildren and her own attempts to survive as a self-confessed "technological imbecile" in the modern world. Mostly, she just made her friend laugh. Letters to Dr. Wiggy collects Ellen's tales into one funny, poignant, and always-loving collection. Walk a few miles in Ellen's shoes-the road's sometimes rocky, but the trip's always hilarious.

The Fall and Rise of a Street Angel

Three months outbound from Earth and the starship Desio approaches its planetary destination, her crew eager to commence a mission of scientific discovery. Kyle Lorenzo, however, has a personal reason for being on board--an inner conflict that will ultimately propel him to explore not only of the furthest reaches of an enigmatic ocean world but the nebulous recesses of his inner psyche. During the long and isolating interstellar journey a physical relationship develops between Kyle and the ship's physician, Kelly Takara. That part is easy. Understanding the reasons for avoiding the

emotional commitment desired by Kelly is harder. So, too, is trying to penetrate the mind of Larry Melhaus, the mission's brilliant and reclusive physicist - a failure to communicate made exponentially more troublesome when the scientist's disturbing behavior begins to threaten the crew. While Kyle struggles to comprehend himself and Melhaus, the ship's crew, led by their strong-willed commander, Bruce Thompson, attempt to fathom a planet where none of the precepts of science seem to apply. A world where every preconceived notion of what constitutes life must be re-examined and challenged. Two journeys: One inward, one outward. Culminating at the same destination.

This book shows scientists how to apply their analysis and synthesis skills to overcoming the challenge of how to write, as well as what to write, to maximise their chances of publishing in international scientific journals. The book uses analysis of the scientific article genre to provide clear processes for writing each section of a manuscript, starting with clear 'story' construction and packaging of results. Each learning step uses practical exercises to develop writing and data presentation skills based on reader analysis of well-written example papers. Strategies are presented for responding to referee comments, and for developing discipline-specific English language skills for manuscript writing and polishing. The book is designed for scientists who use English as a first or an additional language, and for individual scientists or mentors or a class setting. In response to reader requests, the new edition includes review articles and the full range of research article formats, as well as applying the book's principles to writing funding applications. Web support for this book is available at www.writeresearch.com.au

AT THE SHARP END OF LIGHTNING: The intertwined worlds of Oceanlight and Earth are no longer hidden from view of each other. In one realm, Yalara Narika, a winged Sea Sprite, searches for her family and she encounters a deadly blue haze at sea. Escaping the poison makes her realize that her world, Oceanlight, is experiencing sudden and catastrophic environmental change. Meanwhile, in the safe suburban normality of North Wales, Einion Morgan Alban, a restless youth

with haemophilia, is nearly murdered by a man in a white suit who intentionally shoves him off a cliff. If Yalara and Einion don't uncover the connections between their worlds and near-deaths, it will have dire consequences for the worlds they live in. Book one of the OCEANLIGHT series.

They say that hell hath no fury like a woman scorned-but "they" haven't read this book yet. Paradise High is a sharp, witty, and somewhat flippant romantic comedy where the fury is a lot worse, because it comes not from a ticked-off girl, but from a ticked-off God. God doesn't like what's been going on in the world: Hatred. Violence. War. Reality TV. It's just too much, so he's decided to put an end to it once and for all, and he dispatches teen angel Michael Night to bring Armageddon to earth. But Michael finds himself at odds with God's plan. When he's captivated by a young babe-o-rama named Shelly Bloom, he can't imagine killing her or anyone else in the world. So Mike asks God for a little time. He wants the chance to pursue Shelly and prove that humankind ain't so bad after all-and, if he can win Shelly's heart, that love just might save the earth from God's fury. But, then again, it may not. God moves in mysterious ways and so do sixteen-year-old girls. Paradise High is clever, clean fiction that's sure to entertain teen and young adult readers and youthful spirits of all ages.

The Indian rural market till long had been thought of as an inaccessible, unsubstantial market with limited purchasing power. This belief has prompted the marketers to blatantly evade the call of the rural markets. The truth of the matter is that all rural consumers are not poor. As revealed by a study conducted by NCAER, 'there are as many middle income and above households in the rural areas as there are in the urban areas'. The catch is that a sizeable portion of the rural consumer does not prefer to buy in bulk but have a propensity to buy in small amounts as and when required. This presses on the need for some change in the products, services and packaging and opens up a strong case in favour of innovation for the rural markets. Moreover the scattered and fragmented nature of the Indian rural markets makes distribution a cumbersome process. Unlike that in the urban areas, a member of the distribution channel in the rural area would end up catering to significantly lesser number of consumers in an area of comparable size. Establishing an intensively wide and deep distribution channel may not always be economically viable and profitable. This presents another scope for innovation for the marketer intending to penetrate into the rural markets. Other pertinent questions which may be answered through innovation are: how to sell profitably to the rural poor, how to reduce the cost of marketing communication and yet communicate more effectively with the rural masses, how to deliver an enhanced value to the consumers, what type of business models to develop for the rural markets, how to lower the price of the products and services for the rural consumers, how to make the products more cost effective and many more. The book attempts to give a brief account of the

Indian rural market, explore the possibility of using innovation for penetrating into this market and point to and justify the suitability of some specific types of innovations for the rural market of India.

Letters to Dr. Wiggy

Writing high-quality papers suitable for publication within international scientific journals is now an essential skill for all early-career researchers; their career progression and the reputation of the department in which they work depends upon it. However, many manuscripts are rejected or sent back for major re-working not because the science they contain is in any way 'bad', but because the same problems keep occurring in the way that the material is presented. It is one thing to write a good scientific paper, however it is quite another thing to get it published. This requires some additional nous. In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers, and ultimately as a journal editor. By his own admission, it contains all the things he wished that his mentors had told him 25 years ago, but didn't. The material in the book is drawn from many years of finding all these things out for himself, usually by trial and error (but mostly error!). The text adopts a much lighter touch than is normally found in books of this type - after all, who really wants to read a book about writing research papers? The author describes his own unique approach to writing journal papers (which, in his own words, has proved to be extremely successful). All major points are illustrated with examples from his own, published works. The book is written in the form of a manual for constructing a journal manuscript: read a chapter, write a section. However, the material it contains goes beyond just this and also describes how to select a target journal, the manuscript submission process, what referees are looking for in a good journal paper, and how to deal with the referees' comments. Each chapter concludes with a checklist to ensure all the key elements have been addressed.

Synopsis *High School Memoirs: A Journey in Surrealism* is a tear-jerking, hilarious ride for a less-than-ordinary High School student who battles bullies and librarians to become King of the Classroom. Set in a small Catholic High School on the north side of Chicago, author Sean Cusack takes us on a surrealistic journey through four fun-filled years of triumph and tragedy in this unique epic. The journey begins with Sean Cusack entering St. Bernadin High School in August of 1995 as a very young and innocent Freshman student. He focuses on several life changing experiences in his infant days of High School that change him forever. *Innocence Lost* traces the steps Sean Cusack took that ultimately lead him on a path toward frequent battles with students and the school faculty and Administration. As a Sophomore, *The Ride* most certainly takes us on a ride through fights, vandalism, and verbal debacles that continued to steer the vengeful ship that Sean Cusack had been building since a Freshman. He now had become the ship's Captain as it set sail. *The Ride* takes us through many strange and mysterious encounters that add more of a surrealist element to this budding melodrama and comedic satire. Sean Cusack's roses bud Junior Year in *Forever Remembered*, when he becomes a charismatic hero and leader of a rebellious group of students that pillage and plunder the school and faculty in wild and zany antics. *Forever Remembered* embodies the humorous and more imaginative side of Sean Cusack as the journey through High School becomes more surreal. Senior Year wraps up the trials and tribulations that Sean Cusack had endured thus far in his High School experience culminating into one person after years of battling the Defunct Administration. He is molded by evil as the rebellious youth becomes totally hellbent on crippling the school. In the end, he loses friends, respect from teachers, but most of all, he loses faith in his cause, yet ends his High School experience with a fantastical and triumphant bow. Sean

Cusack proves that not all High School stories are the same in this turbulent and chaotic autobiography. High School Memoirs: A Journey in Surrealism chronicles a strange and unique history that is truly a step above the rest.

How redesigning your syllabus can transform your teaching, your classroom, and the way your students learn Generations of teachers have built their classes around the course syllabus, a semester-long contract that spells out what each class meeting will focus on (readings, problem sets, case studies, experiments), and what the student has to turn in by a given date. But what does that way of thinking about the syllabus leave out—about our teaching and, more importantly, about our students' learning? In *Syllabus*, William Germano and Kit Nicholls take a fresh look at this essential but almost invisible bureaucratic document and use it as a starting point for rethinking what students—and teachers—do. What if a teacher built a semester's worth of teaching and learning backward—starting from what students need to learn to do by the end of the term, and only then selecting and arranging the material students need to study? Thinking through the lived moments of classroom engagement—what the authors call “coursetime”—becomes a way of striking a balance between improv and order. With fresh insights and concrete suggestions, *Syllabus* shifts the focus away from the teacher to the work and growth of students, moving the classroom closer to the genuinely collaborative learning community we all want to create.
