One of the functions of NIOSH is the development of sampling & analytical methods for monitoring occupational exposures to toxic substances in air & biological samples. These methods are published in this manual. The monitoring methods cover the collection of aerosols, gases, & vapors in air with active samplers followed by laboratory analysis, as well as with diffusive samplers & direct-reading field instruments. The methods are arranged in alphabetical order by method name. Glossary & 3 indices.

This edition of Swokowski's text is truly as its name implies: a classic.

Groundbreaking in every way when first published, this book is a simple, straightforward, direct calculus text. It's popularity is directly due to its broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises which reinforce conceptualization of the subject matter. The author wrote this text with three objectives in mind. The first was to make the book more student-oriented by expanding discussions and providing more examples and figures to help clarify concepts. To further aid students, guidelines for solving problems were added in many sections of the text. The second objective was to stress the usefulness of calculus by means of modern applications of derivatives and integrals. The third objective, to make the text as accurate and error-free as possible, was accomplished by a careful examination of the exposition, combined with a thorough checking of each example and exercise.

Accelerate sales and improve customer experience Every day, most working professionals entrust their most important messages to a form of communication that doesn't build trust, provide differentiation, or communicate clearly enough. It's easy to point to the sheer volume of emails, text messages, voicemails, and even social messaging as the problem that reduces our reply rates and diminishes our effectiveness. But the faceless nature of that communication is also to blame. Rehumanize Your Business explains how to dramatically improve relationships and results with your customers, prospects, employees, and recruits by adding personal videos to emails, text messages, and social messages. It explains the what, why, and how behind this new movement toward simple, authentic videos—and when to replace some of your plain, typed-out communication with webcam and smartphone recordings.

- Restore face-to-face communication for clarity and connection
- Add a personal, human touch to your emails and other messages
- Meet people who've sent thousands of videos
- Learn to implement your own video habit in an easy, time-saving way
- Boost your replies, appointments, conversion, referrals, and results dramatically

If you're ready to influence, teach, sell, or serve in a more personal way, Rehumanize Your Business is your guide.

## **The Electrical Review**

The second edition of Ventilation Control of the Work Environment incorporates changes in the field of industrial hygiene since the first edition was published in 1982. Integrating feedback from students and professionals, the new edition includes problems sets for each chapter and updated information on the modeling of exhaust ventilation systems, and thus assures the continuation of the book's role as the primary industry textbook. This revised text includes a large amount of material on HVAC systems, and has been updated to reflect the changes in the Ventilation Manual published by ACGIH. It uses both English and metric units, and each chapter concludes with a problem set.
