Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science & Stuff celebrates the simple joy in finding things out. It tackles the big questions that keep people up at night, such as: • Can you belch in space? • What does woolly mammoth taste like? • How much would the Death Star cost? • Is the answer to this question no? Join us as we rise from the depths of the ocean, home to vampire squids from hell, to the dizzy heights of the International Space Station, where scientists unravel the secrets of (pooping in) zero-g. On the way we stop to talk with some of the men and women who are out in the world finding answers and making stuff.
