By 2047, no crime in America goes unsolved. No wrongdoing goes unseen. When Dray Quintero learns his nineteen-year-old daughter Raven committed a heinous act, he covers it up to save her life. This pits him against the police he's respected since he was a child and places him in the crosshairs of Kieran, a ruthless federal Agent. To survive, Dray must overcome the surveillance system he helped build and the technology implanted in people's heads, for everyone has a microcomputer in their brain and computer-screen lenses in their eyes. Forced to turn to a domestic terrorist group to protect his family--as they're the only ones willing to fight the government--Dray tries to resist joining their cause but can't avoid it, for his adversaries have a level of control he's unable to escape. That no one can. Hunted and betrayed, with time running out, Dray must choose between saving Raven and dismantling the near-perfect society he helped create.

Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. Fitzpatrick makes the case for the importance of class action litigation from a surprising political perspective: an unabashedly conservative point of view.

Conservatives have opposed class actions in recent years, but Fitzpatrick argues that they should see such litigation not as a danger to the economy, but as a form of private enforcement of the law. He starts from the premise that all of us, conservatives and libertarians included, believe that markets need at least some rules to thrive, from laws that enforce contracts to laws that prevent companies from committing fraud. He also reminds us that conservatives consider the private sector to be superior to the government in most areas. And the relatively little-discussed intersection of those two beliefs is where the benefits of class action lawsuits become clear: when corporations commit misdeeds, class action lawsuits enlist the private sector to intervene, resulting in a smaller role for the

government, lower taxes, and, ultimately, more effective solutions. Offering a novel argument that will surprise partisans on all sides, *The Conservative Case for Class Actions* is sure to breathe new life into this long-running debate.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

The single greatest lesson parents teach their kids isn't anything they say--it's what they do. And while most parents would say they want to raise compassionate kids, they might be surprised to discover just how little they're actually modeling the

behaviors they hope to pass on--qualities such as unconditional love, gentleness, forgiveness, patience, gratitude, humility, and more. In this unique book, Sami Cone shows parents a new way to look at molding their children, one in which focusing on adding good behaviors and attitudes is more powerful than eliminating bad ones. Grounding her advice in Scripture--specifically the twelve characteristics found in Colossians 3:12-17--Cone offers plenty of stories from her own life to show these principles in action. And she offers practical things parents can do right now to create a home and family that exhibits love, harmony, and generosity of spirit in a self-centered world.

Parents

"Revelatory, terrifying, but, ultimately, hopeful."
-Elizabeth Kolbert, Pulitzer Prize-winning author of THE SIXTH EXTINCTION From the author of Junkyard Planet, a journey into the surprising afterlives of our former possessions. Downsizing. Decluttering. Discarding. Sooner or later, all of us are faced with things we no longer need or want. But when we drop our old clothes and other items off at a local donation center, where do they go? Sometimes across the country-or even halfway across the world-to people and places who find value in what we leave behind. In Secondhand, journalist Adam Minter takes us on an unexpected adventure into the often-hidden, multibillion-dollar industry of reuse: thrift stores in the American Southwest to vintage shops in Tokyo, flea markets in Southeast Asia to used-goods enterprises

in Ghana, and more. Along the way, Minter meets the fascinating people who handle-and profit from-our rising tide of discarded stuff, and asks a pressing question: In a world that craves shiny and new, is there room for it all? Secondhand offers hopeful answers and hard truths. A history of the stuff we've used and a contemplation of why we keep buying more, it also reveals the marketing practices, design failures, and racial prejudices that push used items into landfills instead of new homes. Secondhand shows us that it doesn't have to be this way, and what really needs to change to build a sustainable future free of excess stuff.

The globalization of the competitive landscape has forced companies to fundamentally rethink their strategies. Whereas once only a few industries such as oil could be labeled truly global, today many—from pharmaceuticals to aircraft to computers—have become global in scale and scope. As a consequence, creating a global competitive advantage has become a key strategic issue for many companies. Crafting a global strategy requires making decisions about which strategy elements can and should be globalized and to what extent.
