National Directory of Corporate Giving

With libraries under the gun to provide more and better services, and with fewer resources in many cases, they need to come up with innovative and reliable ways to fund new initiatives. Providing targeted access to the most promising major givers, The Big Book of Library Grant Money 2002-2003 is the largest directory available, pulled from an authoritative and upto-the-minute database of library-specific funders. This forward-looking edition includes more than 2,175 private and corporate foundations and givers that have either indicated an interest in giving money to libraries or have already done so. Organized by state, potential donors in The Big Book are profiled with contact and portfolio information, past contributions summary and analysis, and application information. With historical data, you can track contributions and assets and predict future giving patterns. Offering you the most hooks for connecting with actual people, The Big Book also provides biographical information on more than 34,000 foundation officers, directors, trustees, and corporate officers. As an added feature, ALA's own development office experts have included tips on winning grants for libraries. Tailo

National Guide to Funding in Health

This book introduces the integrated management concept of "Sustainable Value Creation", which delivers sustainability 'inside-out' from the core business. It is based on the premise that sustainability can provide a platform for growth, if it is implemented in a company's products, services and supply chains (combined also known as the 'Value Chain'). Managing the Value Chain from the outset with a sustainability mindset subsequently allows profitable economical, ecological and societal growth. It combines the need for increased sustainability and its implementation in the operations of a company. The book addresses the following issues: How do economic, environmental and societal factors impact the value-creation process of a company? What requirements and expectations need to be met to balance economic, ecologic and societal value creation? What are the building blocks and measures that can be utilized on the journey towards building a sustainable value chain? What benefits can be achieved through sustainable value chains? What are the practical examples of sustainable value chains in leading companies that can inspire others to follow? The book includes contributions from the following organisations and companies: Beiersdorf, SAP, Klenk und Hoursch, VAUDE, Infineon Technologies, Independent Capital Management, BASF, Nanogate, the Federal German Council for Sustainable Development, Henkel, Symrise, shared.value.chain, Siemens, Fairphone and Thin Air Factory
