ACRP Report 78: "The original problem statement and objectives for ACRP 02-16 as developed by the project panel are restated as follows: 'Increased levels of demand at airports in the United States may result in a growth in airport GSE activity and an associated increase in airport surface emissions. Local air quality and global climate change concerns, regulatory pressures, and the desire to be environmentally responsible have resulted in a growing number of airport programs around the United States looking to assess and reduce airport emissions. Although much is known about aircraft fleets, operations, and emissions, comparatively little is known about GSE. The available GSE data are outdated, unreliable, and limited. Accurate GSE data are needed by the FAA and airport sponsors to plan adequately and to balance the growing demands of air travel with air quality concerns. Proactive strategies that reduce surface emissions may help airports address air quality concerns. As such, research is needed to obtain additional information on GSE equipment and to identify programs and best practices that could reduce GSE emissions for GSE owners, operators, and airports.' In response to this problem statement, the primary objectives of this research were to (1) develop a tutorial that describes GSE operations and identifies potential strategies to reduce emissions from powered GSE for use by GSE owners and operators and (2) conduct a representative inventory of powered GSE at airports to help the industry assess the contribution of GSE to air quality impacts at airports. ." --from p. 1.

This book is designed to give guidance on the original, ex-factory, specifications of the coil-sprung utility Land Rovers built between 1983 and 1990. Known to Land Rover as stage 2 models, they were sold as the Land Rover One Ten, Ninety and (later) One Two Seven. James Taylor has taken the first step in undertaking detailed research into the Stage 2 models, and putting together all the known facts in one place. Topics covered include vehicle identification; specification changes in detail; options, accessories and special equipment; conversions and, finally, promotional material.

There's a brutal new player in the Middle East—a mysterious group of radicalized assassins unleashing havoc. When a U.S. envoy is slaughtered, Mack Bolan picks up the hunt in the Afghan mountains, the first leg of a mission to stem the flow of spilled blood across a shattered region...and the world. In a sophisticated undercover operation that spans the borderlands and urban battlefields of Iraq, Pakistan and India, Bolan and a handful of operatives attempt to do the impossible: find and terminate the revitalized Islamic murder cult. Reborn from an ancient sect, the group merges ancient terror with modern technology. As dealers of death for the hard line ruling Mullahs, the Council of Assassins plots a new global caliphate...with a calculated first strike aimed at the heart of the United States.
