The City Record

When Will returns to Medicine River, he thinks he is simply attending his mother's funeral. He doesn't count on Harlen Bigbear and his unique brand of community planning. Harlen tries to sell Will on the idea of returning to Medicine River to open shop as the town's only Native photographer. Somehow, that's exactly what happens. Through Will's gentle and humorous narrative, we come to know Medicine River, a small Albertan town bordering a Blackfoot reserve. And we meet its people: the basketball team; Louise Heavyman and her daughter, South Wing; Martha Oldcrow, the marriage doctor; Joe Bigbear, Harlen's world-travelling, storytelling brother; Bertha Morley, who has a short fling with a Calgary dating service; and David Plume, who went to Wounded Knee. At the centre of it all is Harlen, advising and pestering, annoying and entertaining, gossiping and benevolently interfering in the lives of his friends and neighbours.

It's an immense night out there, wheeling and windy. The lights on the street and in the houses against the black wetness, little unilluminating glints that might be painted on it. The town seems huddled together, cowering on a high tiny perch, afraid to move lest it topple into the wind. The town is Horizon, the setting of Sinclair Ross' brilliant classic study of life in the Depression era. Hailed by critics as one of Canada's great novels, *As For Me and My Hometown* takes the form of a journal. The unnamed diarist, one of the most complex and arresting characters in contemporary fiction, explores the bittersweet nature of human relationships, of the unspoken bonds that tie people together, and the undercurrents of feeling that often tear them apart. Her chronicle creates an intense atmosphere, rich with observed detail and natural imagery. *As For Me and My Hometown* is a landmark work. It is essential reading for anyone who seeks to understand the scope and power of the Canadian novel.

It's time to rethink the way we think about China. In this thought-provoking book, noted China experts from Harvard Business School and the Wharton School assert that while China has experienced remarkable economic growth in recent decades (nearly 10 percent for more than thirty years), it now faces major challenges—tests that could shift the country's political and economic trajectory. A lack of accountability, transparency, and ease of operating in China—combined with growing evidence of high-level corruption—has made domestic and foreign businesspeople increasingly wary of the “China model.” These issues have deep roots in Chinese history and the country's political system. Regina M. Abrami of the Wharton School and William C. Kirby and F. Warren McFarlan of Harvard Business School contend that the country's dynamic private sector could be a source of sustainable growth, but it is constrained by political favoritism toward state-owned corporations. Disruptive innovation, research, and development are limited by concerns about intellectual property protection. Most significant of all is the question of China's political future: does a system that has overseen dramatic transformations in recent years now have the capacity to transform itself? Based on a new and popular course taught by the authors at Harvard Business School, this book draws on more than thirty Harvard Business School case studies on

Chinese and foreign companies doing business in the region, including Sealed Air, China Merchants Bank, China Mobile, Wanxiang Group, Microsoft, UFIDA, and others. Can China Lead? asserts that China is at an inflection point that cannot be ignored. An understanding of the forces that continue to shape its business landscape is crucial to establishing—and maintaining—a successful enterprise in China.

Bestselling author Michael Shermer's exploration of science and morality that demonstrates how the scientific way of thinking has made people, and society as a whole, more moral From Galileo and Newton to Thomas Hobbes and Martin Luther King, Jr., thinkers throughout history have consciously employed scientific techniques to better understand the non-physical world. The Age of Reason and the Enlightenment led theorists to apply scientific reasoning to the non-scientific disciplines of politics, economics, and moral philosophy. Instead of relying on the

woodcuts of dissected bodies in old medical texts, physicians opened bodies themselves to see what was there; instead of divining truth through the authority of an ancient holy book or philosophical treatise, people began to explore the book of nature for themselves through travel and exploration; instead of the supernatural belief in the divine right of kings, people employed a natural belief in the right of democracy. In *The Moral Arc*, Shermer will explain how abstract reasoning, rationality, empiricism, skepticism--scientific ways of thinking--have profoundly changed the way we perceive morality and, indeed, move us ever closer to a more just world.
