### Carbonate Reservoir Characterization

A brutal assassin seeks vengeance in an alternate world where men are masters and women are slaves. Welcome to Gor, a parallel Earth where social norms are exotic and the way of life is brutal. In this volume of the Gorean Saga, the deadly assassin Kuurus is intent on a bloody mission of vengeance. His adventure takes him from the caste of the pleasure-slaves, who are rigorously trained in the rules and techniques of sexual ecstasy, to the brutal arenas where humans participate in deadly hand-to-hand combat. He witnesses violence, conflict, and uncertainty, as the inhabitants of Counter Earth are forced to confront their destinies . . . no matter how exalted or debased. Rediscover this brilliantly imagined world where men are masters and women live to serve their every desire. Assassin of Gor is the 5th book in the Gorean Saga, but you may enjoy reading the series in any order.

Paper has been the material of bureaucracy, and paperwork performs functions of order, control, and surveillance. Knowledge Making: Historians, Archives and Bureaucracy explores how those functions transform over time, allowing private challenges to the public narratives created by institutions and governments. Paperwork and bureaucratic systems have determined what we know about the past. It seems that now, as the digital is overtaking paper (though mirroring its forms), historians are able to see the significance of the materiality of paper and its role in knowledge making - because it is no longer taken for granted. The contributors to this volume discuss the ways in which public and private institutions - asylums, hospitals, and armies - developed bureaucratic systems which have determined the parameters of our access to the past. The authors present case studies of paperwork in different national contexts, which engage with themes of privacy and public accountability, the beginning of record-keeping practices, and their 'ends', both in the sense of their purposes and in what happens to paper after the work has finished, including preservation and curation in repositories of various kinds, through to the place of paper and paperwork in a 'paperless' world. The chapters in this book were originally published in a special issue of Rethinking History: The Journal of Theory and Practice.

### **Last Man Standing**

Volume II of The Official History of the UK Strategic Nuclear Deterrent provides an authoritative and in-depth examination of the British government's strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having

decided to preserve the Polaris programme, Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour's defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.

### **Auntie Mame**

The landmark work on the social significance of childhood. The original and vastly influential ideas of Erik H. Erikson underlie much of our understanding of human development. His insights into the interdependence of the individuals' growth and historical change, his now-famous concepts of identity, growth, and the life cycle, have changed the way we perceive ourselves and society. Widely read and cited, his works have won numerous awards including the Pulitzer Prize and the National Book Award. Combining the insights of clinical psychoanalysis with a new approach to cultural anthropology, *Childhood and Society* deals with the relationships between childhood training and cultural accomplishment, analyzing the infantile and the mature, the modern and the archaic elements in human motivation. It was hailed upon its first publication as "a rare and living combination of European and American thought in the human sciences" (Margaret Mead, *The American Scholar*). Translated into numerous foreign languages, it has gone on to become a classic in the study of the social significance of childhood.

Once, it is said, gods used magic to create reality, with powers that defied explanation. But the magic—or science, if one believes those who try to master the dangers of thaumaturgy—now seems more like a dream. Industrial workers for House Technis, farmers for House Arbor, and fisher folk of House Marin eke out a living and hope for a better future. But the philosopher-assassin Kata plots a betrayal that will cost the lives of godlike Minotaurs; the ambitious bureaucrat Boris Autec rises through the ranks as his private life turns to ashes; and the idealistic seditionist Maximilian hatches a mad plot to unlock the vaunted secrets of the Great Library of Caeli-Enas, drowned in the fabled city at the bottom of the sea, its strangeness visible from the skies above.
