Dreams are some of the most private experiences humans know, and yet humans have long felt a need to share them. Across history, protocols have been developed to make this possible, and though Western culture is poor in such techniques, in this it is the exception. Elsewhere, there continue to be dream-circles and dream recitations, dream predictions and dream journeys. Cabinet 67, with a special section on "Dreams" and coedited by Matthew Spellberg, includes Spellberg's essay on the cultural history of doing things with dreams; Martin Dimitrov on the suspicious dreams of peasants recorded in the archives of the Bulgarian secret police; and Emma Lieber on citizens' dreams under authoritarian regimes. Elsewhere in the issue: Carol Mavor on the figure of the hare in the arts; Julian Lucas' interview with Philip Fisher about the many literary and historical varieties of kindness; and Alfie Brown on "A Love of UIQ," Félix Guattari's 1987 screenplay for an unrealized science fiction film.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital

reflection on the history of theology and in systematic theology.

## **Defence Against Weapons of Mass Destruction Terrorism**

In Defence Against Weapons of Mass Destruction Terrorism the editors examined the class of Weapons of Mass Destruction (WMD) for terrorist use, and have found that their effects range from serious nuisance value up to catastrophic destruction of a large urban area. There are some differences in the effects depending on whether they are used against military or civilian targets, whether they are used from inside the target area or outside, and between those weapons for which MOPP (Mission Oriented Protective Posture) gear can provide useful protection (Biological Weapons, Chemical Weapons) and those for which it often cannot (radiation, nuclear explosions). These are useful ways to begin thinking about establishing protocols for protecting our armed forces and the civilian population they are sworn to defend.

"In an increasingly globalized world, offshore manufacturing is often favored over domestic manufacturing for its ability to meet greater demands for goods that can be manufactured at lower costs, ultimately saving both companies and consumers money. However, a number of concerns also arise when examining offshoring's impact on a domestic and international scale. Some argue that offshoring results in the exploitation of workers from lower-income countries, while others express concern over the potential loss of domestic jobs that can result from it. This volume examines the benefits and drawbacks of domestic and offshore manufacturing through numerous points of contention"--

"The year is 1095. The most prominent leaders of the Christian world have assembled in a meadow in France near Clermont. Pope Urban appeals for the liberation of Jerusalem and cries out Deus Lo Volt! God Wills It! The cry is taken up, echoes forth and is carried on. Wave upon wave of Christian pilgrims rush to assault the growing power of Muslims in the Holy Land and will do so for the next two hundred years. Most able men become soldiers of the Cross, and when a man is prevented by old age or ill health, he sends his son. Women, too, go to fight alongside the men.
