### **Instruction for Information Access in Sci-tech Libraries**

The sites selected for this Web research guide are specific to the needs of business researchers, providing annotated listings of global business information sources. Researchers will find resources such as finding financial information on a foreign company, identifying overseas buyers and suppliers, and finding a market research study or an industry analysis from another country.

While the American soap opera is known primarily for its marketing value, producers, health professionals, politicians, and rebels elsewhere focus on the serials potential for social change: African, Indian and South American serials offer information on family planning, child protection and AIDS; a Mexican telenovela parallels a government murder scandal--the program is so popular the state dare not censor it. In Russia, South American novelas are so popular that Boris Yeltsin manipulates programming to affect voters on polling day. Here is an examination of the economic and social impact of the soap opera, with projections for the

future. A chapter for each of the nine regions of the world offers demographic statistics of major countries audiences, radio and television usage, stations available, and synopses of the most popular serials.

## **Ulrich's International Periodicals Directory**

While there are common misconceptions regarding the definition of a public law library, it can be defined as a government mandated library which provides the public with access to legal resources. Largely, public law libraries are instituted by state or federal law. *Public Law Librarianship: Objectives, Challenges, and Solutions* aims to introduce firsthand knowledge on the funding, organizational structures, and governance related to the public law library. This book includes comprehensive research for current and future public law librarians to provide administrative guidance and professional sources essential for running a public law library.

## **The Israeli-Palestinian Road Map for Peace**

*Let Nobody Turn Us Around* provides students with a collection of readings that capture the main ideological currents of the Black Freedom Movement in the United States from 1789 to the present. This Study Guide is designed to complement each section of the book. It contains summaries of the section introductions, comprehension and thought questions that pertain to each document, essay questions that address major themes discussed in each section, a list of potential research topics, suggested classroom exercises, and a collection of films and web sites that are relevant to each section. These features provide assistance in developing lectures, homework assignments, examinations, and in-depth research projects for a range of undergraduate students. The Guide is an ideal teaching tool that will allow both students and instructors to explore the many themes and issues that are central to *Let Nobody Turn Us Around*.

## **SEC Docket**

## **Public Law Librarianship: Objectives, Challenges, and Solutions**

## **Brothers V. Indiana Vocational Technical College**

The charismatic forger immortalized in *Catch Me If You Can* exposes the astonishing tactics of today's identity theft criminals and offers powerful strategies to thwart them based on his second career as an acclaimed fraud-fighting consultant. When Frank Abagnale trains law enforcement officers around the country about identity theft, he asks officers for their names and addresses and nothing more. In a matter of hours he can obtain everything he would need to steal their lives: Social Security numbers, dates of birth, current salaries, checking account numbers, the names of everyone in their families, and more. This illustrates how easy it is for anyone from anywhere in the world to assume our identities and in a matter of hours devastate our lives in ways that can take years

to recover from. Considering that a fresh victim is hit every four seconds, *Stealing Your Life* is the reference everyone needs by an unsurpassed authority on the latest identity theft schemes. Consider these sobering facts:

- Six out of ten American companies and government agencies have already been hacked.
- An estimated 80 percent of birth certificate requests are fulfilled through the mail for people using only a name and a return address.
- Americans write 39 billion checks a year, and half of them never reconcile their bank statements.
- A Social Security number costs \$49 on the black market. A driver's license goes for \$90. A birth certificate will set you back \$79.

Abagnale offers dozens of concrete steps to transform anyone from an easy mark into a hard case that criminals are likely to bypass:

- Don't allow your kids to use the computer on which you do online banking and store financial records (children are apt to download games and attachments that host damaging viruses or attract spyware).
- Beware of offers that appeal to greed or fear in exchange for personal data.
- Monitor your credit report regularly and know if anyone's been "knocking on your door."
- Read privacy statements carefully and choose to opt out of sharing information whenever possible.

Brimming with anecdotes of creative criminality that are as entertaining as they are enlightening, *Stealing Your Life* is the practical way to shield yourself from one of today's most nefarious and common crimes.

### **Data-Driven Law**

This analysis examines the failure of the international community's most ambitious effort to date to resolve the decades-old Israeli-Palestinian conflict by establishing an independent Palestinian state and securing a final, comprehensive, and lasting Middle East peace.

### **LexisNexis Corporate Affiliations**

In order to prepare a successful research project, a qualitative researcher often must consult media documents of various types. How to obtain, categorize, and analyze these different media documents is the subject of this entry in the *Qualitative Research Methods* series. Author David L. Altheide looks at traditional primary documents such as newspapers and magazines but also at more recent forms--television newscasts and cyberspace. The use of student examples of research protocols makes this book a useful primer in deriving meaning from the bombardment of media documents a qualitative researcher faces. This handy volume, *Qualitative Media Analysis*, is ideal for students and professionals in research methods, sociology, communication studies, social theory, and political science.

### **EMBASE User Manual**

The state tax laws are always changing. Never has this observation been so true as now. The complex interrelationship of phased-in and delayed new law effective dates, changing state revenue department rules, and an ever-changing mix of taxpayer wins and losses in the courts creates the need for the tax practitioner to constantly stay on top of the new rules and reassess tax strategies at the start of every year. The rules this year are significantly different from the rules last year, and the rules next year promise to be different from those governing this year. This is a fact of life for the modern-day state tax practitioner. CCH's Top Multistate Tax Issues for 2008 Course is a helpful resource that provides explanations of significant laws, regulations, decisions and issues that affect multistate tax practitioners. Readers get the guidance, insights and analysis on important provisions and their impact on multistate tax compliance and tax planning. It's the top quality tax review and analysis that every state tax practitioner needs to keep a step ahead. Topics covered include: - Economic Nexus - FIN 48 - Passive Investment Companies - Real Estate Valuation - State Tax Appeals Process - Valuation of Real Estate

### **Credit Repair Kit For Dummies**

Risk Management: Survival Tools for Law Firms helps you to establish solid policies, procedures, and systems to minimize your firm's risk. This completely updated and revised edition provides a complete overview of risk management and offers a practical approach to evaluating the state of risk management within your firm.

### **Annotated Federal Court Legislation and Rules**

This helpful guide describes instructional service programs at nine sci-tech libraries to illustrate ideas and methods that work. The continued proliferation of information resources and exploding advances in technology have brought dramatic changes to the role of the reference/instruction librarian. These librarians are striving to develop services that focus on strategies and critical thinking, ensure interactive instruction at various levels of user skill, involve faculty and computer center staff, and provide easy-to-use techniques that are self-directed and lead to success. Instruction for Information Access in Sci-Tech Libraries helps readers resolve these issues and illustrates effective, proven strategies to help teach faculty, staff, and students how to do effective research and get the information they need. Authors from institutions around the country discuss educational programs that they have found successful. Informative chapters describe: a joint library/computer center cooperative program a bibliographic instruction program to prepare geology students with information skills necessary for professional careers a course designed to create informed end-users of the electronic life sciences literature the integration of information skills throughout two years of a curriculum for wildlife technology students a three-level course-integrated approach for chemistry students a cooperative end-user training program to provide campus-wide access to LEXIS/NEXIS the use of roleplaying in bibliographic instruction objectives and components of bibliographic instruction in the special library Professionals will find Instruction for Information Access in Sci-Tech Libraries full of helpful ideas and suggestions for restructuring old programs or developing new ones to help students and other users of library services learn how to seek and gather information effectively.

## **American Businesses in China**

### **The Federal Lawyer**

## **Legal Research and Law Library Management**

For increasingly data-savvy clients, lawyers can no longer give "it depends" answers rooted in anecdotal evidence. Clients insist that their lawyers justify their reasoning, and with more than a limited set of war stories. The considered judgment of an experienced lawyer is unquestionably valuable. However, on balance, clients would rather have the considered judgment of an experienced lawyer informed by the most relevant information required to answer their questions. *Data-Driven Law: Data Analytics and the New Legal Services* helps legal professionals meet the challenges posed by a data-driven approach to delivering legal services. Its chapters are written by leading experts who cover such topics as: Mining legal data Computational law Uncovering bias through the use of Big Data Quantifying the quality of legal services Data mining and decision-making Contract analytics and contract standards In addition to providing clients with data-based insight, legal firms can track a matter with data from beginning to end, from the marketing spend through to the type of matter, hours spent, billed, and collected, including metrics on profitability and success. Firms can organize and collect documents after a matter and even automate them for reuse. Data on marketing related to a matter can be an amazing source of insight about which practice areas are most profitable. Data-driven decision-making requires firms to think differently about their workflow. Most firms warehouse their files, never to be seen again after the matter closes. Running a data-driven firm requires lawyers and their teams to treat information about the work as part of the service, and to collect, standardize, and analyze matter data from cradle to grave. More than anything, using data in a law practice requires a different mindset about the value of this information. This book helps legal professionals to develop this data-driven mindset.

## **Business Research Handbook**

### **Business and Accounting Research Using Lexis-Nexis**

*Consumer Credit and the American Economy* examines the economics, behavioral science, sociology, history, institutions, law, and regulation of consumer credit in the United States. After discussing the origins and various kinds of consumer credit available in today's marketplace, this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen "too fast for too long." It then turns to demand and supply with chapters discussing neoclassical theories of demand, new behavioral economics, and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance. This discussion includes review of the economics of risk management and funding sources, as well discussion of the economic theory of why some people might be

limited in their credit search, the phenomenon of credit rationing. This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit. The book then discusses technological change in credit granting. It examines how modern automated information systems called credit reporting agencies, or more popularly "credit bureaus," reduce the costs of information acquisition and permit greater credit availability at less cost. This discussion is followed by examination of the logical offspring of technology, the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly. After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable, including "payday loans" and other small dollar sources of loans, discussion turns to legal structure and the regulation of consumer credit. There are separate chapters on the theories behind the two main thrusts of federal regulation to this point, fairness for all and financial disclosure. Following these chapters, there is another on state regulation that has long focused on marketplace access and pricing. Before a final concluding chapter, another chapter focuses on two noncredit marketplace products that are closely related to credit. The first of them, debt protection including credit insurance and other forms of credit protection, is economically a complement. The second product, consumer leasing, is a substitute for credit use in many situations, especially involving acquisition of automobiles. This chapter is followed by a full review of consumer bankruptcy, what happens in the worst of cases when consumers find themselves unable to repay their loans. Because of the importance of consumer credit in consumers' financial affairs, the intended audience includes anyone interested in these issues, not only specialists who spend much of their time focused on them. For this reason, the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics. It also examines the psychological, sociological, historical, and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today.

## **Use of Credit Information Beyond Lending**

Winner of the Grawmeyer Award for Ideas Improving World Order, 2018 Winner of the Joseph Leggold Prize Winner of the Best Books in Conflict Studies (APSA) Winner of the Best Book in Human Rights (ISA) In *Making and Unmaking Nations*, Scott Straus seeks to explain why and how genocide takes place—and, perhaps more important, how it has been avoided in places where it may have seemed likely or even inevitable. To solve that puzzle, he examines postcolonial Africa, analyzing countries in which genocide occurred and where it could have but did not. Why have there not been other Rwandas? Straus finds that deep-rooted ideologies—how leaders make their nations—shape strategies of violence and are central to what leads to or away from genocide. Other critical factors include the dynamics of war, the role of restraint, and the interaction between national and local actors in the staging of campaigns of large-scale violence. Grounded in Straus's extensive fieldwork in contemporary Africa, the study of major twentieth-century cases of genocide, and the literature on genocide and political violence, *Making and Unmaking Nations* centers on cogent analyses of three nongenocide cases (Côte d'Ivoire, Mali, and Senegal) and two in which genocide took place (Rwanda and Sudan). Straus's empirical analysis is based in part on an original database of presidential speeches from 1960 to 2005. The book also includes a broad-gauge analysis of all major cases of large-scale violence in Africa since decolonization. Straus's insights into the causes of genocide will inform the study of political violence as well as giving policymakers and nongovernmental organizations valuable tools for the future.
