From Prof. Spencer Benson, Centre for Teaching and Learning Enhancement, University of Macau: "Service, according to Po Chung, is 'any activity that involves the energy and relationship created by two or more people in order to get something done.' With the demand to educate greater numbers of students, there has been a tendency towards a manufacturing model of education. Students go through an educational factory that's been maximized for productivity and quality assurance, but miss out on addressing what they bring to themselves and others. The 12 DIMENSIONS OF A SERVICE LEADER helps anyone looking to succeed in the 'Service Age.' There much for faculty and students to be learned from this book and by going through the reflective exercises."

A Manual of Italian Literature

Evolutionary Tactics, A Blueprint for Action, The Real Light at the end of the tunnel from the Vietnam era. Sometimes it takes the perspective of history to unmask the true genius of a person, a book or a point of view. Perhaps even more telling, the first attempt to deal with the subject of Jim Channon's First Earth Battalion was through the vehicle of comedy. The Men Who Stare at Goats, the movie starring George Clooney did not treat the ideas at the core of the First Earth Battalion with anywhere near the attention they deserve. In fact one could say that the movie trivialized the concept through humor, and marginalized the principals as addled characters. The true nature of the First Earth Battalion can begin to be appreciated by reading the Operations Manual. A hand illustrated work of art highlighting a new direction for not just the military but the planet as well. The fact that Jim felt the army could take the lead in this matter speaks to his own brand of practical idealism that untold numbers of corporate leaders took advantage of on his retirement from the Army. See: <http://cyber.mpnodes.info/archives/509> for the "Goats Declassified" featurette from the DVD to get the real backstory of what transpired and continues to this day.

Moody's Transportation Manual

Marriage is hard. Living together in a committed, non-traditional relationship is just as hard, maybe more so. A less than completely satisfying level of happiness and fulfillment within a primary relationship is perhaps the most common human

dysfunction in the modern world. So much so that we have come to accept something less than complete bliss in our marriages, partnerships and domestic arrangements as the normal state of things, an expectation born of human imperfection and the pressing need for constant compromise. We have redefined it as something less than the word bliss actually implies. Coming even mildly close to bliss is considered a rousing success, but even then, whatever sliver of unrest, anxiety and inconsistency remain can flare into a torrent of restlessness that could one day again render you single . In CHASING BLISS, Larry Brooks shows us a path toward bucking that trend through the channeling of our imperfection toward a perfectly functional awareness of how we might be contributing to the problem, while becoming coach and therapist when we're not. While repeatedly reminding the reader that some problems remain the province of professional counselors, CHASING BLISS holds up a mirror to the many ways time and apathy become toxic factors in reducing loving relationships to something less than how they began, with kindness, togetherness, sexual satisfaction and hope the price of growing apart while growing weary of each other. The book is divided into three sections: ten reasons why men might cheat ten reasons why women might leave the nest for a better life and an exploration of eight primary realms of relationship, the mastery of which becomes a tool chest of strategies and solutions that not only mitigate decline, but serve to refuel the chemistry and hope that once brought you together. This goes beyond the theoretical with specific actionable responses and alternatives to some of the most common challenges couples face, while clarifying tough, indisputable truths about the roles we play in our own domestic tragedies. Even if we feel - all the way to divorce court - that it was the other person's fault. This, promises the author, is the stuff your shrink will goad you into realizing for yourself, but without the weeks and months of therapy it could take to reach that point with clarity and purpose. It's all right here, in your face, unassailable and immediately useful in real life. In her Foreword to the book, Dr. Carrie Rubin says this: the beauty of this book is its power to be a tool for both relationship recovery and healthy relationship maintenance. For those in good shape, its advice will serve as a protective life vest, one that will keep you from sinking into troubled waters." Brooks knows from where he speaks, having been down the road to failure not once, but twice, and is now twenty years happily married to a woman that challenges him to be the best version of himself, with immovable consequences if he is not. "On paper we shouldn't work," he writes, "but we are living in a state I can only describe as bliss, if bliss is defined as inclusive of the trials and challenges that are inevitable and ready to rip you apart. Now we are stronger than the problems life throws our way, not because we are better or smarter than couples who don't make it, but because we are vulnerable to these truths and committed to the principles of interaction and loving partnership that are necessary to make it to the other side." These truths are the heart and soul of CHASING BLISS, a book for people who want to make love work, but fear they aren't up to it. With these principles, you just might become the couple that gets there through an understanding that bliss is not a destination or a finish line, but the road itself. Which, armed with empowered awareness and sensitivity, you can now actually pave with the good intentions that others blame.

Vermont Legislative Directory and State Manual

In 1999, the Federal Emergency Management Agency (FEMA) and the Association of State Dam Safety Officials (ASDSO) jointly conducted research and a workshop to shed light on the national problem of animal intrusion damage to earthen dams and the resulting safety issues. The FEMA/ASDSO survey and workshop united dam owners, engineers, state and federal regulators, wildlife managers, foresters, and academia to form an educated and experienced front against the growing problem of earthen dam damage and failures due to animal intrusion. The information generated by roundtable discussions and survey answers indicates that while most states recognize animal intrusion as a problem, only a handful know of guidance on dams and wildlife management practices available to the dam professionals and owners. Based on input from the dam communities, FEMA/ASDSO's mission to develop a guidance manual on the proper management of nuisance wildlife in the earthen dam environment became clear. To determine the information needs of the dam community—and therefore the most appropriate focus of this manual—FEMA/ASDSO issued a survey in 1999 and used the survey input from the 48 state dam safety officials representatives and 11 federal agencies representing the Interagency Committee on Dam Safety (ICODS). Additionally, a second survey was issued in 2003 to identify the current needs of each state, determine what nuisance wildlife and damages the states encounter, and understand which mitigation methods are being used with success or failure. This manual provides technical guidance to dam specialists (including dam owners, operators, inspectors, state dam officials, and consulting engineers) in areas of focus identified through the two survey efforts and workshop. The purposes of this manual are to: Assist dam specialists in understanding the impacts wildlife can have on earthen dams; Provide dam specialists with basic information on habitat, range, description, and behavior of common nuisance wildlife to aid in their proper identification at the dam; Describe state-of-practice methods to prevent and mitigate adverse wildlife impacts on earthen dams. Provide state-of-practice design guidance for repair and preventive design associated with nuisance wildlife intrusion. It is envisioned that the entire dam specialist community will use this manual to augment their routine duties in earthen dam management. This manual is presented as a process toward dam inspection and management that includes wildlife damage identification and control. This manual provides technical information and guidance on: How wildlife damage adversely affects the safe operation of earthen dams; specifically, hydraulic alteration, internal and external erosion, and structural integrity losses (Chapter 2.0); Dam inspections that incorporate a biological component to sensitize dam specialists to the aspects of their dams that attract wildlife and to understand where nuisance wildlife are likely to occur on the dam (Chapter 3.0); Biological data for specific nuisance wildlife to assist the dam specialist in identifying which nuisance wildlife inhabits the dam. Biological data will also assist in

controlling nuisance wildlife (e.g., listed food sources can be removed to encourage the animal to leave the area) (Chapter 4.0); Dam design specifications and methods that can be incorporated into repair of existing dams or new dam designs to prevent wildlife intrusions (Chapter 5.0); Guidelines to determine when wildlife management should occur at a dam (beyond dam repair and prevention actions) and wildlife management methods that can be implemented when control of specific nuisance wild-life populations is deemed necessary. Specific methods discussed include habitat modification, use of toxicants and fumigants, trapping, and shooting (Chapter 6.0); The fiscal issues related to appropriate and timely wildlife management at earthen dams (Chapter 7.0).

Mergent Municipal & Government Manual

Finally! Board member orientation truly simplified. Serving on a nonprofit board can be an incredibly rewarding experience for the properly prepared board member. This book is for the generous and busy people who agree to give of their time and talents by serving on nonprofit boards. Nonprofit boards often fail to do a good job of board member orientation for a variety of reasons. It takes a significant amount of time and effort to plan and conduct quality board member orientation programs, and every time a new board member arrives, it's time to do it again! Because of the challenges associated with providing quality board member orientation, many nonprofit organizations do not do it at all, leaving their board members to wing it. This book provides help and support to the truly great men and women serving on nonprofit boards whose service makes a positive difference in the lives of countless people every day. This book is a concise and appropriately comprehensive guide to nonprofit board service designed especially for new board members. It is a quick read, (about one hour), yet it addresses with accuracy the most significant elements of board service, such as mission, responsibility, duty, risk, liability, and board meeting dynamics. Hooey Alerts! Watch for Hooey Alerts! where the author identifies and dispels common myths and legends about nonprofit board service. There are many sources of false or misleading information about the nonprofit board service environment. A perfect example is the often vaguely-worded and intimidating assertion or implication that the Sarbanes-Oxley Act passed by Congress in 2002 applies to nonprofit organizations in a manner similar to how it applies to publicly-traded companies. (It does not.) Reviews "This book is the perfect guide for every nonprofit board member! Concise, highly informative, and loaded with nuggets of wisdom, it's a must read that will take board members to the next level of successful board governance." -- J. Todd Chasteen, General Counsel, Samaritan's Purse "Mike

Batts has put his quarter century of advising and serving on nonprofit boards to good use in this accurate and easy-to-read book. In addition to describing major principles of nonprofit law and governance, the book provides helpful questions to guide board members in understanding the practical applications of the concepts discussed. While geared primarily toward helping new board members get up to speed quickly, it should also help veteran board members discharge their stewardship roles wisely and efficiently." -- Chuck Hartman, Associate Professor of Business Law and Accounting, Cedarville University "This book, Board Member Orientation, is exactly what a busy volunteer board member needs. The board member's duties are presented in a clear and concise manner from the perspective of someone who has been around many boards. With a focus on those issues that are most common and/or most important, it is perfect for board member orientation and for quick reference reminders for the experienced board member." -- Doug Starcher, Partner, Broad & Cassel "This book provides clear, no-nonsense guidance on the basic issues for new nonprofit board members. Using this book for board member orientation will ensure your organization has communicated fundamental governance issues and will assist the board in determining risk management strategies." -- Dan Busby, President, ECFA

***** The Simple Board Member Orientation Process Using This Book: 1. Your board members read Chapters 1-9 of the book, which will provide them with insights regarding the key elements of nonprofit board service. 2. You provide the board members with copies of the documents described in Chapter 10 related to your organization. 3. You meet with your board members to discuss the unique attributes of your organization following the discussion questions provided in Chapter 10. Done!

This is the operating manual for your mind that you should have received at birth. Nemonik thinking is a smarter way of thinking that aims to maximize your success by evaluating seventeen nemoniks, which are memorized keywords describing all the perceived aspects of your mind, reality, and their interaction. Success is obtaining what you seek and escaping what you suffer. Therefore, it is goal oriented. To maximize your success, nemonik thinking mobilizes your hidden genius, accelerates your thinking, improves your memory, reveals opportunities and threats, creates questions and ideas, and reduces your stress levels. It is like playing a musical keyboard with seventeen keys producing an infinite repertoire of smart strategies. Nemonik thinking is unique because it is the first exhaustive and transferable way of thinking. Comparisons with Sir Richard Branson's way of thinking show that it is extremely productive. Unfortunately, the educational system conditions students still with pass-fail grades to win. Winning is defeating opponents in competition. Therefore, it is conflict oriented. The compulsion to win inhibits the truth and, therefore, fosters the corrupted way of conventional thinking. Conventional thinking creates the malignant cognitive virus CS7. In turn, that virus consolidates conventional thinking with cognitive dissonance and groupthink. Conventional thinking is time consuming. Hence, the less time you have, the greater the necessity to study nemonik thinking. You might be the best thinker in the world, but only nemonik thinking could make you the smartest thinker you can be.

Field Manual (FM) 3-34.400, "General Engineering," is the primary implementing manual for the engineer function that bears its name (the others being combat and geospatial engineering). This manual provides general engineering (GE) doctrine for the United States (U.S.) Army and U.S. Marine Corps. As the implementing manual for the engineer function of general engineering (GE), FM 3-34.400 describes the operational environment (OE) and how to apply and integrate GE principles in support of full spectrum operations and the linkage of GE to assured mobility. This FM focuses on the establishment and maintenance of lines of communications (LOCs) and sustainment operations that support operational requirements throughout the area of operations (AO). FM 3-34.400 is designed primarily to assist Army engineers at all echelons in planning and coordinating GE operations at the strategic, operational, and tactical levels. It is also a resource applicable to Department of Defense (DOD), joint, and other Army organizations and agencies that have a role in supporting, establishing, and/or maintaining the infrastructure required to conduct and sustain military operations. It is the primary manual to define the engineer function of GE. FM 3-34.400 is applicable across full spectrum operations. This includes the four types of Army operations (offense, defense, stability, and/or civil support) across the spectrum of conflict (peace, crisis, and war). This FM recognizes the need for joint interdependence and the reality that operations will frequently be performed in a joint, interagency, and multinational environment.
