This manual has been prepared for use as a reference materials for their day to day inspection business and for assistance in the training of new inspectors. This is also a supplement to applicable Standards, such as ASTM, ACI, AWS, etc. as well as building codes, such as UBC, SBC, etc.; thus, any references made in this manual reflects to the applicable code and/or standard test method. Inspection is the observation of construction for conformance with the approved design documents. It shall not be relied upon by others as guarantee or acceptance of work, nor shall it in any manner relieve any contractor or other party from their obligations and responsibilities under the construction contract, or generally accepted industry custom, or building codes and standards. Included in this manual are materials for other testing and inspection, for which there are currently no special training program or certifications available or offered. H. John Parsaie, Ph.D. Seattle, Washington

The periscope is the eye of the submarine. It allows observation of the sea and the sky above, while the submarine remains submerged. It is also a crucial piece of combat equipment, featuring a stadimeter to estimate the range and course angle of a target. Originally printed by the U.S. Navy, this Periscope Manual explains the operation and design of the periscope, and includes descriptions of its complex optical and mechanical details. It also contains maintenance and repair information. It's a wonderful reference for anyone interested in the science of optics, for the modeler or museum docent, or anyone who ever wondered, ¿How the heck does that work?¿

Air Quality Compliance and Permitting Handbook provides a straightforward, easy-to-read, nonlegal explanation of the regulatory and technical concepts of air quality compliance, explaining how to effectively manage air compliance at a

facility. Although the majority of the book is devoted to a wide general applicability, it also describes the actual permit submissions that are required under regulations (many of which end up being state requirements) and the technical and analytical approaches which are needed in preparing the information required in the permit applications. Useful topics include: Fundamental 1990 and previous Clean Air Act concepts, Permitting, Compliance Checklists and risk assessment methodologies.
