Explores the fundamental rules of composition-then how to break those rules to take captivating and unique images. Informs and inspires you with the author's own gorgeous examples of landscapes, portraits, close-ups, and other photos that illustrate his concepts. Helps you jump-start your creativity by showing you new ways to see. Go beyond the basics and create a photography style that's all your own with this must-have guide.

Engineers of Independence

Mr Chaston Chapman collected works for two libraries; his working library, based at his laboratory in London, and a private, historical collection. Subjects include brewing and the brewing industry, wine and winemaking, beer, distillation and distilling industry, drinking customs, liquors, ciders and whiskey and legal issues surrounding alcohol. The brewing section represents part of Mr Chaston Chapman's library. The

collection contains works on brewing and alcohol which dates from 1578, with 'A Perfite platforme of a Hoppe Garden'.

Broken Idols of the English Reformation

Creative Composition

This book explores the cultural conditions that led to the emergence and proliferation of Saint Hermenegildo as a stage character in the sixteenth and seventeenth centuries. It considers how this saint became a theatrical trope enabling the Society of Jesus to address religious and secular concerns of the post-Tridentine Church, and to discuss political issues such as the supremacy of the pope over the monarch and the legitimacy of regicide. The book goes on to explain how the Hermenegildo narrative developed outside of Jesuit colleges, through works by professional dramatist Lope de Vega and Mexican nun Juana Inés de la Cruz. Stefano Muneroni takes a global approach to the staging of Hermenegildo, tracing the character's journey from Europe to the Americas, from male to female authors, and from a sacrificial to a sacramental paradigm where the emphasis shifts from bloodletting to spiritual salvation. Given its interdisciplinary approach, this book is geared toward scholars and students of theatre history, religion and drama, early modern theology, cultural studies, romance languages and literature, and the history of the Society of Jesus..

The Curiosities of Ale & Beer

This book collects the proceedings of the Parallel Computational Fluid Dynamics 2008 conference held in Lyon, France. Contributed papers by over 40 researchers representing the state of the art in parallel CFD and architecture from Asia, Europe, and North America examine major developments in (1) block-structured grid and boundary methods to simulate flows over moving bodies, (2) specific methods for optimization in Aerodynamics Design, (3) innovative parallel algorithms and numerical solvers, such as scalable algebraic multilevel preconditioners and the acceleration of iterative solutions, (4) software frameworks and component architectures for parallelism, (5) large scale computing and parallel efficiencies in the industrial context, (6) lattice Boltzmann and SPH methods, and (7) applications in the environment, biofluids, and nuclear engineering.

Nikon D60 For Dummies

One of the great classics of the 20th century, R. H. Tawney addresses the question of how religion has affected social and economic practices. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Hasselblad Compendium

Getting your Canon Speedlite to produce the light you need can be a real challenge. For those new to flash photography—or for anyone who has previously given up out of frustration—Speedlitter’s Handbook is a revelation. Photographer Syl Arena takes you on a journey that begins with an exploration of light and color, moves through a comprehensive discussion of the Canon Speedlite family and all of the accessories and equipment available to the Speedlitter, then settles down to crafting great light in one photo shoot after another. Whether you want to create a classical portrait, shoot an event, or simply add a little fill light to a product shot, Speedlitter’s Handbook shows you how. A fantastic in-depth resource illustrated with over 500 images, Speedlitter’s Handbook covers: how to see the various characteristics and properties of light itself, as well as the differences between how your camera sees versus how you see all the buttons

and dials of the entire Canon Speedlite family the basics of on-camera flash...and the necessity of getting your flash off the camera how to beautifully balance flash with the existing ambient light all the equipment necessary for great Speedlite shots how to get amazing shots with just one Speedlite how and when to use E-TTL versus manual flash the use of color gels to balance color, as well as create dramatic effects how to tame the sun—or any really bright light—with hi-speed sync and much, much more Whether you're shooting portraits, events, or sports, Speedlites Handbook is an essential resource that teaches you how to craft the light you need for any type of shot you want.

With new color pictures and improved print quality, this book covers the early history of Hasselblad, from the very early cameras before the Hasselblad name was used on them, and camera numbers manufactured are also listed. It covers the huge amount of camera lenses and the many accessories made by Hasselblad, which are listed in this most exhaustive book on this famous manufacturer. The sales literature as well as instruction books have been catalogued with illustrations going right back to the early material, and some of the promotional items are illustrated and listed. Finally, a very comprehensive index both of the Hasselblad code numbers and item index, as well as a comprehensive bibliography are included. Tables showing all the lenses available over the years with starting and finishing manufacture numbers and dates. This book will appeal to the camera user as well as the enthusiast and collector as it is the complete reference to Hasselblad with virtually every item manufactured illustrated.

Surprised at Being Alive

Lady Jane Grey, is one of the most elusive and tragic characters in English history. In July 1553 the death of the childless Edward VI threw the Tudor dynasty into crisis. On Edward's instructions his cousin Jane Grey was proclaimed queen, only to be ousted 13 days later by his illegitimate half sister Mary and later beheaded. In this radical reassessment, Eric Ives rejects traditional portraits of Jane both as hapless victim of political intrigue or Protestant martyr. Instead he presents her as an accomplished young

woman with a fierce personal integrity. The result is a compelling dissection by a master historian and storyteller of one of history's most shocking injustices.

Hermenegildo and the Jesuits

Canon EOS 40D Guide to Digital Photography

Why were so many religious images and objects broken and damaged in the course of the Reformation? Margaret Aston's magisterial new book charts the conflicting imperatives of destruction and rebuilding throughout the English Reformation from the desecration of images, rails and screens to bells, organs and stained glass windows. She explores the motivations of those who smashed images of the

crucifixion in stained glass windows and who pulled down crosses and defaced symbols of the Trinity. She shows that destruction was part of a methodology of religious revolution designed to change people as well as places and to forge in the long term new generations of new believers. Beyond blanked walls and whited windows were beliefs and minds impregnated by new modes of religious learning. Idol-breaking with its emphasis on the treacheries of images fundamentally transformed not only Anglican ways of worship but also of seeing, hearing and remembering.

Existing Light Techniques for Wedding and Portrait Photography

The rewards of being a professional wedding photographer are great---not only financially, but also in terms of community status. As such, increasing numbers of ever-more-talented photographers are entering the field, making for a very competitive marketplace. Today, being good is not good enough; it takes greatness to truly stand out and succeed. In this book, Rangefinder editor Bill Hurter shows you what it takes to achieve that objective, covering all of the skills that must come together to create world-class images

Women's Creativity since the Modern Movement (1918-2018)

Presents a portrait of daily life in Tudor England, including food and diet, laws, clothing, punishments

for criminals, languages, lodging, and the appearance of the people.

Cold-Water Corals and Ecosystems

Sometimes you do everything right, but it just isn't your day. A part fails and your helicopter comes apart in flight, or, another aircraft runs into you and the pieces of both fall to the ground below, or the enemy gunner pulls the trigger at just the right moment and his rounds find your aircraft in exactly the right spot to take it out of the sky. Whichever way it happens, it wasn't your day. Which is why, after 24 years and over 5,000 flight hours with four armed services, Major Robert Curtis was so surprised at being alive when he passed his retirement physical. Starting with enlisting in the Army to fly helicopters during Vietnam, and continuing on through service with the National Guard, Marine Corps and Royal Navy, he flew eight different helicopters—from the wooden-bladed OH-13E, through the Chinook, SeaKnight and SeaKing, in war and peace around the world. During that time over 50 of his friends died in crashes, both in combat and in accidents, but somehow his skill, and not an inconsiderable amount of luck and superstition, saw him through. His flying career began with a misbegotten strategy for beating the draft by enlisting. With the Vietnam War raging full blast in 1968 the draft was inevitable, so he wanted to at least get some small measure of control of his future. Although he had no thought of flying when he walked into the recruiting office, he walked out signed up to be a helicopter pilot. What he did not know was that

43% of all the aircraft sent to Vietnam were destroyed in combat or accidents. Soon he was in the thick of the war, flying Chinooks with the 101st Airborne. After Vietnam he left the Army, but kept flying in the National Guard while going to college. He was accepted at two law schools, but flying is addictive, so he instead enlisted in the USMC to fly some more. Over the next 17 years he would fly around the world off US and British ships from Egypt to Norway and all points in between. His engaging story will be a delight to all aviation enthusiasts.

Human Osteology

WINNER of the ChessCafe 2008 Book of the Year Award SHORTLISTED for The Guardian 2008 Chess Book of the Year Award Why is it that the human brain so often refuses to consider winning chess tactics? Every chess fan marvels at the wonderful combinations with which famous masters win their games. How do they find those fantastic moves? Do they have special vision? And why do computers outwit us tactically? Forcing Chess Moves proposes a revolutionary method for finding winning moves. Charles Hertan has made an astonishing discovery:

the failure to consider key moves is often due to human bias. Your brain tends to disregard many winning moves because they are counter-intuitive or look unnatural. It's a fact of life: computers outdo us humans when it comes to tactical vision and brute force calculation. So why not learn from them? Charles Hertan's radically different approach is: use COMPUTER EYES and always look for the most forcing move first. By studying forcing sequences according to Hertan's method you will: Develop analytical precision Improve your tactical vision Overcome human bias and staleness Enjoy the calculation of difficult positions Win more games by recognizing moves that matter. This New and Extended Fourth Edition of Hertan's award-winning modern classic includes 50 extra pages with new and instructive combinations. There is a foreword by three-time US chess champion Joel Benjamin, and a special foreword to this new edition by Swedish Grandmaster Pontus Carlsson.

The Use of Eyeglasses

Cold-water coral ecosystems figure the formation of

large seabed structures such as reefs and giant carbonate mounds; they represent unexplored paleo-environmental archives of earth history. Like their tropical cousins, cold-water coral ecosystems harbour rich species diversity. For this volume, key institutions in cold-water coral research have contributed 62 state-of-the-art articles on topics from geology and oceanography to biology and conservation, with some impressive underwater images.

Twenty Fathoms Down

Reacting to a preference in the marketplace for more natural, spontaneous-looking images, today's portrait photographers are spending less time in the confines of the studio. This has serious implications for creating professional-looking lighting. The key to success lies in controlling the existing light - being able to harness it, redirect it, shape it and intensify it. Fortunately, with the advent of digital photography it's never been easier. Here, Bill Hurter covers all the tools and techniques in using existing light to create great images.

THE EVERY DAY BOOK OF HISTORY AND CHRONOLGY

Learn how to take professional-quality photographs using the same tricks today's top photographers use (surprisingly, it's easier than you'd think)!

This is a completely, totally updated version of the #1

best-selling digital photography book of all time! It's the award winning, worldwide smash hit, written by Scott Kelby, that's been translated into dozens of different languages.

Here's how Scott describes this book's brilliant premise: "If you and I were out on a shoot, and you asked me, 'Hey, how do I get this flower to be in focus, with the background out of focus?,' I wouldn't stand there and give you a photography lecture. In real life, I'd just say, 'Put on your zoom lens, set your f-stop to f/2.8, focus on the flower, and fire away.' That's what this book is all about: you and I out shooting where I answer questions, give you advice, and share the secrets I've learned just like I would with a friend—without all the technical explanations and techie photo speak."

This isn't a book of theory—full of confusing jargon and detailed concepts. This is a book on which button to push, which setting to use, and when to use it. With over 200 of the most closely guarded photographic "tricks of the trade," this book gets you shooting dramatically better-looking, sharper, more colorful, more professional-looking photos every time.

Each page covers a single concept that makes your photography better. Every time you turn the page, you'll learn another pro setting, tool, or trick to transform your work from snapshots into gallery prints. If you're tired of taking shots that look "okay," and if you're tired of looking in photography magazines and thinking, "Why don't my shots look like that?" then this is the book for you.

Canon EOS 30D Guide to Digital SLR Photography

Canon EOS Rebel T3i / 600D For Dummies

This collection of documents, including many previously unpublished, details the role of the Army engineers in the American Revolution. Lacking trained

military engineers, the Americans relied heavily on foreign officers, mostly from France, for sorely needed technical assistance. Native Americans joined the foreign engineer officers to plan and carry out offensive and defensive operations, direct the erection of fortifications, map vital terrain, and lay out encampments. During the war Congress created the Corps of Engineers with three companies of engineer troops as well as a separate geographer's department to assist the engineers with mapping. Both General George Washington and Major General Louis Lebéque Duportail, his third and longest serving Chief Engineer, recognized the disadvantages of relying on foreign powers to fill the Army's crucial need for engineers. America, they contended, must train its own engineers for the future. Accordingly, at the war's end, they suggested maintaining a peacetime engineering establishment and creating a military academy. However, Congress rejected the proposals, and the Corps of Engineers and its companies of sappers and miners mustered out of service. Eleven years passed before Congress authorized a new establishment, the Corps of Artillerists and Engineers.
