FIRE AND ICE . . . that's what you get when you take the cool looks of the Volkswagon Beetle, Bus, Karmann Ghia, Thing,

Squareback or Fastback and unleash the hot performance of the air-cooled VW engine. How to Hot Rod Volkswagen Engines gives the real skinny for breathing-on, blueprinting and bulletproofing your air-cooled Vee-dub. Street, custom, kit car, off road, or full-race, this book gives you all the air-cooled engine-building basics to find and put to the pavement hidden horsepower. Includes tips on carburetion, ignition and exhaust tuning, case beefing, cylinder-head flow work, camshaft selection, lubrication and cooling upgrades, 6-to-12-volt conversions and much more. Plus there's a natty 6-page history of the origins of the first air-cooled VW engines. All neat stuff, this. Go ahead. You deserve it! Double or triple the output of your air-cooled Volkswagon. Or add 10-15 horsepower with easy bolt-on mods. Mild or wild, do it the right way-with this book. More than 300 photos, drawings and charts to guide you through your VW's innards. And don't look back.

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the “need for speed” characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960–1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make’s status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year’s model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.
