Inspiring and insightful, *Our Better Angels: Seven Simple Virtues That Will Change Your Life* and the World celebrates the shared principles that unite and enable us to overcome life's challenges together. "When the waters rise, so do our better angels."—President Jimmy Carter Jonathan Reckford, the CEO of Habitat for Humanity, has seen time and again the powerful benefits that arise when people from all walks of life work together to help one another. In this uplifting book, he shares true stories of people involved with Habitat as volunteers and future homeowners who embody seven timeless virtues—kindness, community, empowerment, joy, respect, generosity, and service—and shows how we can all practice these to improve the quality of our own lives as well as those around us. A Vietnam veteran finds peace where he was once engaged in war. An impoverished single mother offers her family's time and energy to enrich their neighbors'

lives. A Zambian family of nine living in a makeshift tent makes room to shelter even more. A teenager grieving for his mother honors her love and memory by ensuring other people have a place to call home. A former president of the United States leads by example with a determined work ethic that motivates everyone around him to be the best version of themselves. These stories, and many others, illustrate how virtues become values, how cooperation becomes connection, and how even the smallest act of compassion can encourage actions that transform the world around us. Here are tales that will make readers laugh and cry and embrace with passion the calling of our better angels to change the way we take care of ourselves, our families, our communities, and the world.

John Fleming has put his wealth of knowledge into his new book, *The Complete Guide To Outboard Engines*. This book starts with the difference in design and power between the two-cycle outboard and its new brother, the four-cycle outboard. As with John's, *Complete Guide To Gasoline Marine Engines*, these pages take the reader deep inside the engine by discussing the design, function and results of the entire engine system and drive unit. The book's design allows the reader to start with the basics and progress through each skill level until a thorough understanding of engines is achieved. This book also delves deeply into the technical aspects of outboard engines, but the information remains extremely easy to understand and follow throughout each step. You will not find another book that will explain outboard engines as completely or easily as this book. One fact remains; when you have read, *The Complete Guide To Outboard Engines*, you will be the most popular person on the dock every Saturday morning.

Sixty years old in 1999, Mercury Marine is the world leader in the marine industry. The memory of its founder, Carl Kiekhaefer, lives on in the hearts and minds of engineers and boat enthusiasts alike. His manic genius and tireless energy found outlet in his need for greater speed, more features and higher value, first in outboards and then in stern drive products. Since Kiekhaefer's departure from the company in 1970, Mercury Marine has come into its own while holding onto those qualities inherited from its founder, qualities that abhor failure. Jeffrey L. Rodengen, author of Iron Fist: The Lives of Carl Kiekhaefer, continues to chronicle the fascinating story of Mercury Marine. The Legend of Mercury Marine details the company's struggle and ultimate triumph in this comprehensive, lavishly illustrated 225-page work.

### **Chilton's Repair and Tune-up Guide: Outboard Motors, Under 30 Horsepower**

\* Outboard motor repair for the average guy \* Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of “cheap power.” Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours’ work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You’ll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear
